Overview

Market-access initiatives are vital for India's Micro, Small, and Medium Enterprises (MSME) sector, enabling scale-up of business operations for multiple financial and operational benefits. These efforts empower MSMEs, particularly by strengthening the manufacturing clusters with resources, specialised skills, and strategic value-chain positions. They apply to diverse industries, including textiles, food processing, pharmaceuticals, and electronics. Market access is critical for artisan-based clusters, such as handicraft, where unique products and craftsmanship open the doors to new markets and drive local and global economic growth.

The participation of MSMEs in the global value chain helps them explore opportunities globally. The government is addressing market-access challenges for MSMEs through various initiatives, such as the Open Network for Digital Commerce (ONDC) and the Government e-Marketplace (GeM). These initiatives benefit sectors with diverse offerings, aiding them in overcoming trade barriers and accessing a broader audience, whether at the local, regional, or international level. MSMEs across sectors, including textiles and garments, food processing, pharmaceuticals, and electronics, are emphasizing e-commerce, strategic partnerships, data-driven strategies, niche markets, and innovation as recommendations to expand market access.

Exploring market access for MSMEs involves diverse channels: digital platforms for broader reach, industry clusters for collaboration, and trade fairs for showcasing products and networking opportunities.

Figure 1: Diverse channels for MSME market access

Digital market

Expanding MSME reach through online platforms, e-commerce, and digital tools for broader customer engagement.

Industry clusters and associations

Collaborative hubs enhancing MSMEs' market access through shared resources and expertise

Trade fairs and exhibitions

Digital solutions: Expanding market access for MSMEs

The advent of digital solutions and e-commerce platforms has presented transformative opportunities for MSMEs in India, and they are one of the key factors in enabling these businesses to extend their market reach and connect with a wider customer base. Digital and e-commerce channels emerged as the mainstream avenues for Indian MSMEs to sell their products and services, a shift that became particularly pronounced during the pandemic.

Figure 2: MSME's Share of Online Sales in Total Sales

Source: Indian Council for Research on International Economic Relations

According to a Go digital survey¹ conducted in fiscal 21, nearly 64% of MSMEs in India sold their products through online channels, with many of them experiencing higher sales than in previous years. The majority of online sales were facilitated through e-commerce platforms, although some firms also utilised their own apps or websites.

The survey highlights that most MSMEs follow a hybrid sales model, using both online and offline channels. A large portion depends on e-commerce platforms for online sales, with only 12% having their own e-stores. This underscores the widespread adoption of online avenues for business among MSMEs.

¹ Indian Council for Research on International Economic Relations, 2022, MSMEs Go Digital survey

Figure 3: Share of MSMEs Reporting Growth in Business after Integrating with E-commerce (in percentage)²

Note: The survey covers 1,537 manufacturing units in India across six product categories, namely sports goods, toys, furniture, readymade garments, handicrafts, and processed and preserved food sectors. Industry clusters were identified across 10 states in India. Within each state, select cities/clusters were covered. All the units covered in the survey were enterprises that sold through e-commerce platforms.

The objective of the survey was to examine the impact of the e-commerce industry on MSMEs in India, focusing on the manufacturing sector, and its impact on business volumes, market/supply chain linkages and employment. Due to the unorganised nature of manufacturing in India, a cluster-based approach was adopted to select the target respondents. The selection of states was based on a natural fallout of majority clusters in selected product categories. Once the cluster was selected, the right-hand rule method was followed to identify target respondents within selected cluster, where the investigator visited the MSMEs falling on the right of the centre of the cluster.

Source: Indian Council for Research on International Economic Relations

The major difference between B2B and B2C digital marketing is the audience. In B2B, end-customer intends to know about all the product / service along with the technical aspects. In B2C, the end-customer intends to know about the product/service in a colloquial manner.³

To give better access to MSME to the market, Ministry has promoted a Business-to-Business (B2B) Portal in National Small Industries Corporation (NSIC). Now, the endeavour would be to have a Business-to-Consumer (B2C) Portal in addition to the above.⁴

³ [International Journal for Multidisciplinary Research, 2023, Role of digital transformation in SMEs Sustainability](#)

⁴ Ministry of MSME, Strategic Action Plan of Micro, Small and Medium Enterprises

Industry clusters and associations

Industry clusters and associations offer MSMEs a gateway to growth. Tailored to specific sectors, these groups facilitate networking, connecting businesses to domestic and international opportunities. They serve as vital hubs, providing valuable industry insights, fostering partnerships, and expanding market reach, making them indispensable for MSME success. Some prominent MSME industry clusters and associations are:

	The Micro and Small Enterprises Cluster Development Programme (MSE-CDP) extends government grants for establishing common facility centres (CFCs) in existing clusters, setting up new clusters or upgrading existing industrial areas. The programme aims to foster improved market access and opportunities for MSMEs operating within these collaborative environments.
	Federation of Indian Micro and Small & Medium Enterprises (FISME)⁵ facilitates global MSME connections, promoting collaboration and knowledge exchange.
 Confederation of Indian Industry	The Confederation of Indian Industry (CII)⁶ serves as a prominent platform, connecting Indian MSMEs to global markets, promoting partnerships, and enhancing market outreach.
	National Small Industries Corporation (NSIC): The government body supporting MSMEs through financial aid, technology assistance, and market linkages for enhanced competitiveness and sustainability.
	MSME Chamber of Commerce and Industry (MSCI): Aims to empower MSMEs through advocacy, networking, and capacity-building, fostering their growth and contribution to the economy.
	Chamber of Indian Micro, Small & Medium Enterprises (CIMSME): Advocates for the rights of MSMEs, facilitating networking and providing a platform for addressing challenges and fostering their development.

⁵ [Federation of Indian Micro and Small & Medium Enterprises, FISME's Focus](#)

⁶ [Confederation of Indian Industry, About us](#)

Trade fairs and exhibitions

Trade fairs and exhibitions are vibrant arenas for Indian MSMEs to exhibit their offerings. These platforms facilitate crucial connections with prospective customers, collaborators, and investors, significantly broadening market access. By participating in these events, MSMEs can propel business growth and elevate their visibility on both the national and international fronts. Some prominent trade fairs and exhibitions are:

	Khadi and Village Industries Commission, a government body in India, organises the 'Khadi India' ⁷ exhibition at the India International Trade Fair (IITF) in Delhi, providing MSMEs from the handloom and handicraft sectors a platform to showcase their products.
	Export Promotion Council for Handicrafts (EPCH) ⁸ organises trade shows and exhibitions, such as the Indian Handicrafts and Gifts Fair, facilitating MSMEs in the handicrafts industry to exhibit their products and access wider markets.
	The Micro Small Medium Industry Expo (MSMI) serves as a vital platform for MSMEs, facilitating networking, showcasing products, and fostering business collaborations for sustained growth and market access.
	Udyog has a vast representation of trade and industry, government organisations, and the private and public sectors. 'UDYOG 2024' primarily aims at the development of trade, industry and services sector in Gujarat and across India.
	India International MSME Expo & Summit by MSME Development Forum facilitates investments, trade, and networking, boosting opportunities for MSMEs.

SMEs in India: Exporting through global value chains

Global value chains (GVCs) offer a strategic pathway for India's MSMEs to tap into these markets. Often associated with large corporations, GVCs extend benefits to smaller players as well.

⁷ Press Information Bureau, 2021, Ministry of Micro, Small & Medium Enterprises

⁸ Export Promotion Council for Handicrafts, About Us

Figure 4: Percentage of SMEs exporting globally

Source: Future of Business Survey, 2017⁹

By strategically engaging in specific production phases within GVCs, smaller enterprises can play a vital role in the global market. This approach, emphasising specialisation over the entire production process, not only boosts adaptability and flexibility, but also enhances resilience to changing conditions.

Even though Indian SMEs have a higher export percentage than their Asian peers, at around 13%, there is substantial untapped export potential. These SMEs can continue leveraging GVCs to tap into new markets, diversify their offerings and ultimately enhance their market access.

Figure 5: The top 10 export destinations for Indian MSMEs¹⁰

Source: India briefing

Tirupur cluster: A textile exports powerhouse

Tirupur, situated in Tamil Nadu, stands out in India's textiles and garment sector. With 10,000 manufacturing hubs and over 600,000 skilled workers, it contributed over 54% to India's textile exports in fiscal 2022, as reported by the Tirupur Exporters' Association. Several factors underpin its success:

⁹ United Nations Economic and Social Commission for Asia and the Pacific, 2017, Future of Business Survey

¹⁰ India Briefing, 2023, MSME India Guide for Foreign Investors

Water quality advantage: The local water's mineral content, once problematic for agriculture, benefits textiles. Clothes bleached with this water exhibit brighter hues, adding to the region's textiles appeal.

Skilled workforce: Tirupur's growth in garment production is attributed to its skilled labour force. Workers adeptly adapt to garment intricacies, positioning Tirupur as a sought-after destination for cost-effective and skilled labour in the industry.

Entrepreneurial spirit: Local entrepreneurs, often with traditional weaving backgrounds, have been pivotal. Their adaptability and willingness to experiment with modern machinery and techniques have driven Tirupur's textiles industry to new heights.

Cost-effective production: The town's global competitiveness is grounded in cost-effective production. Proficiency in modern manufacturing techniques, efficient practices, and streamlined operations reduce labour costs, fostering economies of scale and encouraging manufacturers to adopt lean practices.

These factors, coupled with strategic infrastructure development, and a keen eye for global market opportunities, establish Tirupur as an export-oriented textile hub.

Global lessons for Indian MSMEs

German market access triumph¹¹

Germany's diverse Mittelstand, comprising SMEs from family businesses to startups, is vital to the nation's economy, employing 60% of the workforce and constituting over 99% of businesses.

However, international expansion for these SMEs was not without its challenges. Challenges, such as language barriers, unfamiliar regulatory environments, and the need for substantial financial resources to expand internationally, hindered market access for the Mittelstand.

- Surmounted language barriers through focused training initiatives and the recruitment of multilingual staff, enhancing effective communication for international business endeavours.
- Effectively managed regulatory intricacies by seeking guidance from Germany Trade Invest and employing export credit guarantees, ensuring smoother compliance.
- Leveraged international trade fairs and government agreements to cultivate vital networks and facilitate streamlined access to foreign markets.

The results were significant, with about 44% of German companies exporting their goods to other markets. Even small companies significantly benefited from venturing into foreign

¹¹ Federal Ministry for Economic Affairs and Climate Action, 2019. [The German Mittelstand as a model for success](#)

markets, generating a substantial portion of their revenue from exports.

DRAFT

Market-access lessons for India from Enterprise Singapore¹²

Enterprise Singapore, a key government agency, is dedicated to enhancing market access for Singaporean businesses. Its approach involves partnering with companies to boost capabilities, promote innovation, and facilitate international expansion. Through a vast network of local and global collaborators and Industry Transformation Maps, it aims to enhance competitiveness. This includes fostering innovation, adopting advanced technologies, expanding into global markets, and nurturing leadership skills – all the essential elements for effective market access globally.

- Enterprise Singapore¹³ supported 18,100 enterprises in 2022, focusing on productivity, innovation, and internationalisation, creating S\$17.8 billion in value-add and 23,800 skilled jobs, boosting the Singaporean economy.
- In 2023, EnterpriseSG aimed to drive growth through internationalisation and sustainability efforts, supporting companies to innovate, expand overseas, and enhance sustainability for global competitiveness.
- Notably, 2,000 enterprises pursued internationalisation activities in 2022, a 25% increase from the previous year, exploring markets in Southeast Asia, the US, Europe, Latin America, the Middle East, and Africa. Collaboration with trade associations and chambers facilitated global ventures and business missions.

Indian MSMEs can learn crucial market-access lessons from Enterprise Singapore's success – prioritise partnerships for capability enhancement, foster innovation, collaborate globally, embrace internationalisation with a focus on diverse markets, and leverage trade associations for strategic expansion.

Challenges and Opportunities

Major challenges

	Financial constraints Financial constraints stand as a major barrier for MSMEs, preventing them from investing in vital areas, such as marketing, technology, and distribution enhancements. This limitation hampers market access and stifles their growth prospects. According to the Asian Development Bank report¹⁴, the slow growth of SMEs can be attributed to factors such as limited access to finance, underdeveloped sales channels, and low levels of financial inclusion.
	Brand recognition and competition MSMEs face a brand recognition and competition challenge due to constrained budgets and marketing expertise, thus hampering their visibility and limiting market access, growth, and market presence According to MSMEs Go Digital survey¹⁵, online sales for MSMEs surged, accounting for 27% of total sales in fiscal 2021, compared with 19% in fiscal 2020 and only 12% in fiscal 2019.
	Logistical bottlenecks Logistical bottlenecks are a significant challenge for Indian MSMEs, including issues such as inadequate transportation infrastructure, inefficient supply chains, and market-access difficulties. These constraints impede cost-effective and timely movement of goods, raising operational costs and causing delivery delays. According to the Report of the Expert Committee¹⁶, MSMEs in rural areas suffer disadvantages in the form of higher cost of logistics, limited market-access, lack of knowledge and uneven connectivity

¹⁴ Asian Development Bank, 2016, Major Challenges Facing Small and Medium-sized Enterprises in Asia and Solutions for Mitigating Them

¹⁵ Indian Council for Research on International Economic Relations, 2022, MSMEs Go Digital survey

¹⁶ Report of Expert Committee 2019, MSMEs RBI

Major Challenges

	Information gap faced by MSMEs MSMEs grapple with lack of market information and compliance know-how, thus restricting their capacity to align with consumer preferences and market trends, which are crucial for sustained market access. According to the Asian Development Bank report¹⁷, the lack of information infrastructure for SMEs exacerbates the information-asymmetry problem. A survey conducted by the India SME Forum reveals that a significant 70% of MSMEs lack the knowledge and understanding of digital tools.
	Balancing production with market demand MSMEs frequently grapple with the challenge of aligning their production capacity with market demand. Resource constraints and demand volatility make this synchronisation difficult, impacting operational efficiency and profitability. Indian MSMEs have increasingly embraced digital platforms, such as Zoho Inventory¹⁸, which offer robust demand-forecasting and inventory-management tools. These solutions enable MSMEs to align production with market demand more efficiently, reduce wastage, and enhance their competitiveness.

¹⁷ Asian Development Bank, 2016, Major Challenges Facing Small and Medium-sized Enterprises in Asia and Solutions for Mitigating Them

¹⁸ Zoho Inventory, About Us

Opportunities

Amid the challenges of financial constraints, brand recognition, logistical bottlenecks, information gap and matching production to market demand, MSMEs can seize opportunities to enhance their market access. Embracing digital marketing and e-commerce platforms can address budget constraints and boost brand visibility. Moreover, government initiatives can alleviate financial pressures and enhance infrastructure. Additionally, improving supply-chain efficiency can help overcome logistical bottlenecks, while access to market information and compliance support can mitigate regulatory hurdles. Strategically, agile production and collaborations can align production capacity with market demand, fostering growth and competitiveness

	Empowering Indian MSMEs through Global Value Chains Global Value Chains (GVCs) provide Indian MSMEs (Micro, Small, and Medium Enterprises) with a crucial opportunity for global growth. This involvement helps them develop technical skills, improve production efficiency, and engage in partnerships that boost their credibility. By operating cost-effectively, MSMEs contribute to the economies of scale within specific production chains. According to an Engineering Export Promotion Council of India (EETPC India) report¹⁹, the key factors influencing MSME participation in GVCs include skilled labour, productivity, financial stability, access to credit, and compliance with international standards. The integration of information technology further speeds up this process. A notable example is the contribution of MSMEs in the Indian electronics industry. MSMEs hold a substantial market share, accounting for nearly 30% of the sector. India's electronics exports have demonstrated robust growth with a CAGR of 22% over the last five fiscal years from FY18 to FY22²⁰. Their active participation in Global Value Chains (GVCs) emphasizes their pivotal role in fostering the growth and development of the electronics sector.
	Open Network for Digital Commerce (ONDC) for MSMEs²¹ ONDC, a government-led initiative, empowers India's e-commerce ecosystem with a decentralised approach. It is a community-driven network promoting inclusivity, supporting local businesses, and empowering MSMEs. By allowing MSMEs to list products and gain visibility, ONDC promotes hyperlocal delivery, encourages competition, and reduces costs,

¹⁹ Engineering Export Promotion Council of India , 2022, Integrating Indian MSMEs into Global Value Chains

²⁰ Ministry of Electronics and Information Technology, 2023, Annual Report

²¹ Open Network for Digital Commerce, 2023, About Us

	fostering a more accessible e-commerce landscape. The ONDC network has a live presence in 273 cities, with 47 active network participants, and boasts a network of over 50,000 sellers as of October 2023.
	Government e-Marketplace (GeM)²² GeM is India's online procurement platform, streamlining government purchases of goods and services. It promotes transparency, efficiency and cost savings, while providing MSMEs access to government buyers. GeM collaborates with stakeholders in the MSME ecosystem, particularly focusing on entrepreneurs from scheduled castes/scheduled tribes. The aim is to fulfil the mandatory procurement goal of 25% from MSMEs, including a sub-target of 4% from MSME entrepreneurs within SC/ST communities, by government departments and public sector enterprises (PSEs). The procurement of services through GeM has witnessed significant growth, rising from nearly ₹8,500 crore in FY21 to almost ₹66,000 crore in FY23, and further to nearly ₹1,82,000 crore by February 2024²³. In FY21²⁴, MSMEs constituted approximately 13% of the total Gross Merchandise Value (GMV).

Government interventions

The government of India has introduced a range of initiatives and schemes to empower its MSMEs. These programmes encompass diverse areas, such as procurement, marketing, international cooperation, and e-commerce, with an aim to enhance the MSMEs' market access, boost growth, and improve competitiveness. These initiatives provide vital support, offering financial incentives, marketing assistance, global exposure, and insights into market dynamics, ensuring a holistic approach to MSME development.

Major policies and schemes²⁵

Procurement and Marketing Support Scheme	Marketing Assistance Scheme	International Cooperation Scheme	Special Marketing Assistance Scheme (SMAS)
This scheme empowers MSEs by promoting domestic market growth, facilitating market access, and aligning with the 2012 Public Procurement Policy. It also educates MSMEs on business development and raises awareness of trade fairs and modern market techniques for holistic growth.	The Ministry of MSMEs' scheme acknowledges marketing's importance for MSMEs, overcoming their resource constraints. Operated by NSIC, it provides marketing support for growth, targeting both small-scale industries and service-related entities. The integrated approach strengthens rural and micro enterprises through strategic marketing	Under the International Cooperation Scheme, key components include Market Development Assistance (MDA) and Capacity Building of First-Time MSE Exporters (CBFTE). MDA assist MSMEs in exploring international markets and participating in trade fairs, while CBFTE focuses on supporting new MSE exporters by reimbursing fees, export insurance premiums, and testing and quality certification costs. In FY23-24 ²⁶ , the All-India Association of Industries will organise TRAFS in Thailand and Interplas in the UK, while the COIR board, under the IC Scheme, will conduct events in Germany, the US, and Japan.	National Scheduled Caste and Scheduled Tribe Hub offers Special Marketing Assistance Scheme (SMAS) for enhancing market competitiveness and product visibility for SC/ST enterprises by supporting their participation in four domestic and two international exhibitions/trade fairs every fiscal year.

²⁵ Ministry of MSMEs, 2023, Annual Report

²⁶ International Cooperation Scheme, 2023; Final List of International Exhibitions

Major initiatives ²⁷

Marketing Intelligence Cell This cell collects and evaluates data to understand the preferences, behaviour, and needs of current and potential customers. It also tries to gauge shifts in the business landscape that could impact market dynamics. This initiative seeks to expand the business prospects of Indian MSMEs.	National Small Industries Corporation (NSIC)'s E-Marketing NSIC offers E-Marketing services through MSME Global Mart Web Portal, providing a platform for MSMEs nationwide to enhance their business. The portal connects registered members seeking sustainable partnerships, subcontracting, and public-procurement opportunities. In fiscal 2023, 4,743 members enrolled, generating Rs 1.94 crore.	Market Development Assistance (MDA) for Khadi Institutions Financial assistance is provided based on the prime cost, excluding certain margins, with varying percentages for different Khadi types. The MDA is distributed among producing institutions, selling institutions, artisans, and Karyakartas. As of December 2022, Rs 169 crore was spent.
--	--	--

Other supporting schemes

The Micro & Small Enterprises-Cluster Development Programme (MSE-CDP) facilitates regional collaboration and innovation by nurturing business clusters. Meanwhile, the Development Commissioner-MSME (DC-MSME) provides crucial market research support, equipping MSMEs with valuable insights for informed decision-making. Additionally, statutory bodies, such as the Khadi and Village Industries Commission (KVIC), and initiatives, such as the NSIC Tender Marketing Scheme, further empower MSMEs, enhancing their market access and long-term sustainability.

²⁷ Ministry of MSME, 2023, Annual Report

Way forward

In the dynamic landscape of MSME marketing in India, embracing digital transformation, forming strategic partnerships, utilising data-driven strategies, and exploring niche markets are pivotal. These forward-thinking approaches unlock global opportunities, enhance competitiveness, and foster sustainable growth.

Digital transformation and e-commerce

Digital transformation and e-commerce empower MSMEs to reach global markets, overcome location constraints, and engage with a broad audience using data-driven, personalised marketing, ensuring competitiveness and growth in the digital landscape.

NSIC provides e-marketing services through platforms, such as MSME Global Mart²⁸, enabling MSMEs to expand their customer base, targeting both end consumers and the B2B sector, while strengthening their digital footprint.

Strategic partnerships and collaborations

Strategic partnerships with distributors, larger enterprises, or aggregators enable MSMEs to access new markets quickly, reduce operational hurdles, and foster knowledge exchange. This accelerates growth and taps into wider customer bases.

Collaboration between Indian handicraft MSMEs and renowned international retailers, such as Wal-Mart or IKEA, has been beneficial for MSMEs. Through such partnerships, these MSMEs have gained access to global markets, enhanced their product visibility, and improved their production capabilities to meet international standards and demand.²⁹

Data-driven strategies and personalisation

Data-driven strategies and personalisation enable MSMEs to optimise market access. By leveraging data analytics and customer insights, MSMEs can craft targeted offerings and enhance customer experiences. This approach not only boosts customer engagement but also augments brand loyalty, ultimately driving sustainable growth and expanding market presence efficiently.

²⁸ [National Small Industries Corporation, MSME Global Mart](#)

²⁹ [IKEA, 2021, Strategic Roadmap for Furniture Sector of India](#)

	According to the World Trade Organization report³⁰, data-driven solutions empower firms to embrace novel approaches in market access. The E-Empower initiative³¹, jointly led by the Khalifa Fund and partners, such as Amazon, Microsoft, noon.com, and Etisalat, facilitated online education, empowering Abu Dhabi MSMEs with data-driven strategies such as e-training, cloud tools, and enhanced market visibility.
	Niche market focus and diversification Niche market focus and diversification are key tactics for MSMEs to expand market access. By concentrating on specialised markets and diversifying offerings, MSMEs can carve unique positions, attracting dedicated customer bases. This approach bolsters competitiveness and fosters growth opportunities. According to a report by International Trade Centre³², niche market focus and diversification strategies have allowed MSMEs to tap into specific customer segments, resulting in deeper market access and competitiveness. Italy's MSMEs in the fashion industry thrive by focusing on niche markets, with regions such as Florence specialising in high-quality leather goods. Similarly, Portugal's MSMEs³³ in the cork industry showcase success through niche markets, emphasising sustainability and innovation, offering valuable lessons for global businesses.
