POLICY AT A GLANCE

Farm-based Livelihoods

Skilling, Livelihoods and Labour Welfare Sector in India

DRAFT

Policy at a Glance

Farm-based Livelihoods

Skilling, Livelihoods and

Labour Welfare Sector in India

The '**Policy-at-a-Glance**' provides users with curated information for first-level analysis and inter-state comparisons of policy. The document brings together all topic-relevant national and state-level acts, policies, and schemes in one place. Further, it identifies for a reader what policy features are covered in which document in a simple table.

The first section of this document sets out some '*Context and Background*' on the topic; the subsequent sections explain the '*Policy Features*' that have been compared and include a '*Glossary*' of technical terms used; the last section is the '*Table of Insights*' that marks out what '*Policy Feature*' has been covered (and on which page) in each of the topic-relevant documents.

I. Executive Summary

Farming sector in India is not only essential for food production and economic growth but also for addressing social, environmental, and cultural aspects of the country's development. Its significance extends far beyond economic considerations and has a profound impact on the lives of millions of people. A substantial portion of India's population resides in rural areas and farming is a primary source of income for these communities. The farming sector supports millions of rural households by providing employment, income, and a way of life.

Key Features and Practices Enabling Success of Farm-based Livelihoods –

- **Farmers to Agripreneurs:** Transformation of farmers into agripreneurs by fostering their business skills, thereby empowering them to adopt a more entrepreneurial approach to production.
- **Promoting Value Chain Development:** Schemes such as PMKSY and Mission for Integrated Development of Horticulture (MIDH) supports a combination of measures for promoting value chain development through farm-level diversification, improving productivity, enhancing post-harvest infrastructure, ensuring better market access for farmers.
- **Digitalisation of Markets:** Strategic programs such as Rashtriya Krishi Vikas Yojana, National e-Governance Plan (NeGPA) – Agriculture, Sub-Mission On Agricultural Mechanization among others aims to provide producers with access to technology tools for better price discovery and reduce the role of intermediaries in the marketing process.
- **Infrastructure Development:** The government has been investing in rural infrastructure development through schemes such as Agriculture Infrastructure Fund (AIF) and Animal Husbandry Infrastructure Development Scheme (AHIDF) among others for developing logistics routes, cold storage facilities, processing units and more to strengthen the farm-based value chains.
- **Cluster based Farming Approach:** There has been a growing emphasis on institutionalization of farmer groups for building capacity in farm business activities. Schemes such as National Rural Livelihood Mission (NRLM) and Central sector scheme “formation and promotion of 10,000 new farmer producer organizations (FPOs)” aims to promote farm level collectivization for production and marketing of their produce.
- **Financial Inclusion:** There has been an impetus on increasing farmers' access to credit and financial services through initiatives such as Kisan Credit Card scheme as well as various subsidies and grants under schemes such as Rashtriya Krishi Vikas Yojana (RKVY) to promote farm-based entrepreneurship and sustainable rural livelihoods.
- **Crop Insurance:** Government initiatives such as Pradhan Mantri Fasal Bima Yojana (PMFBY) mitigates risks associated with crop failures due to natural calamities and diseases. The scheme promotes use of technology solutions to estimate crop losses (e.g., remote sensing, satellite photos etc.) and to streamline claim settlement process.
- **Enabling Technology Access:** Initiatives such as Kisan Credit Card (KCC), e-National Agriculture Market (e-NAM), NLM among others promote various digital instruments to enhance farming efficiency, decision-making and credit availability.
- **Sustainable Farming:** Government initiatives emphasize on capacity building measures to enhance soil health, water use efficiency, and farm productivity while addressing climate change challenges through organic cultivation and climate resilient and sustainable farming practices. Various schemes

such as Paramparagat Krishi Vikas Yojana (PKVY) encourage cluster based organic farming, reducing the use of chemical inputs, and promoting natural resource management.

2.

Policy Features –

- **Institution Building:** Process of forming or strengthening organizations such as Self-Help Groups (SHGs), Farmer Producer Organisations (FPOs) and Cooperatives) and their governance structures to facilitate the effective implementation and oversight of policies and programs, aimed at improving livelihoods within a specific sector or community.
- **Capacity Building:** The strategic effort to enhance the knowledge, skills, abilities, and utilization of resources by individuals, communities, or organizations to empower them to engage in livelihood activities, make informed decisions, and respond effectively to challenges and opportunities.

Institutional and capacity building initiative by Ms Anupama Rupali to form Rupali SHG in Village Janigog, Nalbari (Assam)

Anupama Bezboruah, a 43-year-old single woman residing in the village of Janigog, is not just a tuition teacher but also the president of Rupali Self Help Group (SHG), a part of Jagrata Gramya Sangathan.

In 2008, recognizing the need for financial support for herself and women facing similar challenges, Anupama, along with nine other women, established a Self Help Group. Each member contributed 30 INR monthly, allowing them to save and withdraw small amounts when necessary.

The turning point came in 2014 when the Mahila Kisan Sashaktikaran Pariyojana (MKSP) was introduced in Janigog. This project aimed to empower women and their families through sustainable agriculture and allied activities, enhancing their livelihoods. Under the MKSP, Anupama played a pivotal role in organizing and participating in various training sessions covering SHG management, fishery, horticulture, vermicomposting, and the System of Rice Intensification (SRI) method.

Motivated by the learnings from these sessions, Anupama implemented the SRI method in her 4 katha plot of land, resulting in a harvest of 4 to 5 quintals of paddy, a significant improvement compared to the conventional method which yielded only 2 to 3 quintals. Her success inspired fellow community members to adopt the SRI technique, leading to Anupama's election as one of the Community Resource Persons (CRPs) for her village.

As a CRP, Anupama now receives a monthly remuneration of INR 1300 for her contributions to SHG activities, including registration, monitoring, and bank linkages. Reflecting on her journey, Anupama expresses gratitude to MKSP and emphasizes, "Through MKSP, I understood how a village working together can flourish and become self-sufficient. My journey has been very satisfying because I believe I am contributing to the well-being of women in my village. MKSP not only gave me the chance to help these women but also to earn more, learn more, and, above all, become a better person."

- **Business Environment Enablement:** A comprehensive approach encompassing infrastructure development and technological advancements aimed at creating a conducive setting for livelihood-related enterprises and activities. It involves enhancing physical and digital infrastructure, fostering innovation, and improving the overall conditions for business growth and sustainability within a specific region or sector.

- **Infrastructure Development:** Planned construction and maintenance of physical structures and facilities that support livelihood activities, aiming to improve access, productivity, and the overall ease of business.
- **Technological Advancements:** The adoption and integration of innovative technologies, tools, and digital solutions to boost the productivity, competitiveness, and resilience of livelihood activities, promoting economic growth and development.

Infrastructure and technology development through CHC's (Custom Hiring Center) in Dhemaji (Assam)

The insufficient mechanization of farming operations significantly hampers the economic gains in the agricultural sector, particularly affecting small and marginal farmers who lack the financial means to invest in necessary machinery. Renting these machines is often not a viable solution due to high hiring rates. Addressing this challenge, the Krishi Vigyan Kendra (KVK) Dhemaji, a part of Assam Agricultural University, initiated a Community Hiring Center (CHC) under the Tribal Sub Plan (TSP) project named "Promotion of Agriculture-Centric Sustainable Livelihood Security for Tribal Farmers of Assam" in Holokhani village, Silapathar Dhemaji, during the 2013-14 period.

Equipped with essential machinery such as a tractor, rotavator, paddy reaper, power tiller, power sprayer, seed cum fertilizer drill, power weeder, paddy thresher, and maize sheller, the CHC serves as a pivotal institutional arrangement. As part of the project, a concrete house for storing implements and village godowns with threshing floors was constructed. The CHC is efficiently managed by a monitoring committee consisting of 11 villagers, overseeing the operations and ensuring sustainability.

The committee members and ten village youths received skill training and demonstrations to perform minor services and minor repairs on the equipment. Commencing its activities in Rabi 2014, the CHC has been running sustainably, with the center handling maintenance, addition of tools and parts, and the training of local youth.

As of the financial year 2020-21, the CHC has generated a gross income exceeding INR eight lakh fifty thousand, utilized for operational costs, driver and worker payments, recurring expenditures, and spare parts purchases. This CHC has evolved into an income-generating venture for tribal youth, inspiring local farmers to opt for double cropping, transforming some youths into full-time farmers, facilitating easier farm operations, and ensuring timely completion of agricultural activities.

Directly benefiting all 66 farm families in the village and over 100 families in nearby areas, the CHC has led to a remarkable increase in summer vegetable cultivation area from 1.3 hectares to 5.5 hectares (313% increase) and Rabi vegetable cultivation area from 2.0 hectares to 4.0 hectares (100% increase). This transition from mono-cropping to double cropping, which was previously fallow after paddy cultivation, has uplifted the economic and social living standards of the farmers.

The initiation of double and triple cropping has mitigated the vulnerability of farm operations to adverse weather conditions, as activities can now be conducted at the required times. Many youths in the village have enthusiastically embraced cultivation, particularly of various vegetable crops, further contributing to the success of the CHC initiative

- **Self-Employment /Entrepreneurship Support:** Initiatives and policies designed to encourage and empower individuals to establish and manage their own businesses or entrepreneurial endeavours for

livelihood development. It may be in the form of grants/subsidies for infrastructure, plant and machineries, packaging, marketing, licensing and other related investment.

Transformation of a Rural Youth into a Successful Dairy Farmer

Mr. Barjesh Ranjan, aged 35, resides in Ibrahimpur village, Muzaffarpur District. In 2006, his journey took a turn when he received training on Artificial Insemination from the NDRI regional demonstrations and training centre in Siliguri.

Inspired by the training, Mr. Ranjan ventured into dairy farming. His connection with the scientists at KVK, Saraiya, Muzaffarpur, led him to attend further training sessions on dairy farming. Starting with just one desi cow and one heifer, he gradually expanded his dairy farm and currently manages 55 animals, including 35 cows and 25 followers.

His dedication and success in dairy farming earned him recognition, such as the best milk producer award by TIMUL, Sudha, Muzaffarpur in 2008, and a recognition award through ATMA, Muzaffarpur (documentary film) in 2010. In his crossbreed (Jersey, HF) and Desi (Sahiwal) cow farm, he achieves a daily milk yield of approximately 300 liters. The fresh milk is sold to the Sudha collection centre, and he also produces milk products like paneer, cream, and curd.

Mr. Ranjan actively manages his dairy farm, engaging in artificial insemination work not only for his own farm but also assisting neighbouring villages. To minimize production costs, he cultivates green fodder year-round near the dairy farm and feeds it to his animals.

His farm is well-equipped with a primary veterinary aid laboratory, Sudha collection centre, and an artificial insemination centre. With an annual income of around 6 lakhs through dairy farming and an additional venture into vermicompost production, Mr. Ranjan stands as a leading example of a thriving small dairy farmer.

- **Value Chain Development:** Systematic approach focused on enhancing the efficiency, inclusivity, and sustainability of livelihood-related products or services from production to consumption, involving all stakeholders to maximize economic benefits among others.
 - **Access to Finance:** The availability and ease of obtaining financial resources, including loans, credit, and investment capital, to finance livelihood-related activities, enabling individuals and communities to pursue sustainable business opportunities.
 - **Market Linkage:** The establishment of direct or indirect connections between livelihood producers, manufacturers, or service providers and potential customers to enhance the sale and distribution of livelihood-related goods and services, thereby improving income and economic stability of businesses.

Note 1: All the central schemes/policies are assumed to be implemented by all states/union territories, hence have not been captured repeatedly under the states' heads unless it is exclusively distinct.

Note 2: The cells that do not have any page number mentioned, directly leads to a webpage associated with that policy/scheme since the associated document couldn't be captured over the landing webpage.

Note 3: Documents linked in the tables include original Acts, Policies, Schemes, Programmes and Guidelines. The Policy-at-a-Glance is aimed at highlighting and enabling a comparison of relevant policy features covered in the documents, across the centre and the states. While all important documents have been identified, the coverage may not be exhaustive.

Note 4: The 'Policy-at-a-Glance' is not aimed at analysing nuances of policies. Page numbers specified in the Table of Insights are as per the PDF pagination opened in a Google Chrome browser. It is possible to encounter differences in the actual page number for some of the documents when opened in a different web browser/application.
