SECTOR AT A GLANCE

Work-Integrated Learning

Skilling, Livelihoods and Labour Welfare Sector in India

DRAFT

Sector at a Glance

Work-Integrated Learning

Skilling, Livelihoods and
Labour Welfare Sector in India

The '**Sector-at-a-Glance**' provides an easy-to-read overview and basic understanding of a sector, sub-sector, or thematic area. The facts and insights on the sector are supported by relevant data and best practices from credible government and multilateral sources. The document covers the structure, key trends, opportunities and challenges, government initiatives, and the way forward for the sector.

Overview

Work-Integrated Learning has been defined by UNESCO as a form of learning or training for youth and adults that takes place inside an enterprise or workplace.¹ The term has been defined differently by stakeholders including multilateral agencies across countries. The concept of work-integrated learning in India was first introduced in 1959 through National Apprenticeship Scheme. Later, the apprenticeship training was institutionalized through the Apprenticeship Act enacted in 1961 and the scheme was also brought under the ambit of the act.

Most of the work-integrated learning initiatives introduced in the skills ecosystem have been designed to support the mid to long-term training. The key initiatives undertaken by Government are National Apprenticeship Promotion Scheme (NAPS), Dual System of Training (DST), Flexi-MoU, National Apprenticeship Training Scheme (NATS), and Recruit-Train-Deploy (RTD) model. Private sector has also come forward in support of these initiatives.

In the global context, there are some popular models such as Dual System of Vocational Training in Germany, Switzerland etc. wherein a certain portion of the training takes place in the Industry premises. Some of the good practices in work-integrated learning system such as promoting localized engagement, branding the traditional apprenticeship and alignment with employment opportunities in countries such as Australia, Germany, Denmark, Switzerland etc. can be further explored for suitable adoption in India.²

Some of the work-integrated learning programs in India under various ministries are as follows

Existing Models of Centre of Excellence envisaged by MSDE

- 1. **National Apprenticeship Promotion Scheme (NAPS)**
Target Group: Class 5th onwards
- 2. **Dual System of Training (DST)**
Target Group: Students eligible for Industrial Training Institute (ITI) courses
- 3. **Flexi-MoU Scheme**
Target Group: Specific to course, decided by Industrial Training Partner (ITP)
- 4. **Recruit-Train-Deploy Model**
Target Group: Specific to course, depends on partnership modalities

Ministry of Education (MOE)

- 1. **National Apprenticeship Training Scheme (NATS)**
Target Group: Engineering/Non-engineering graduates and diploma holders/pursuing
- A snapshot of achievements across some of the key work-integrated learning programs in the country³

Sub-sectoral Trends

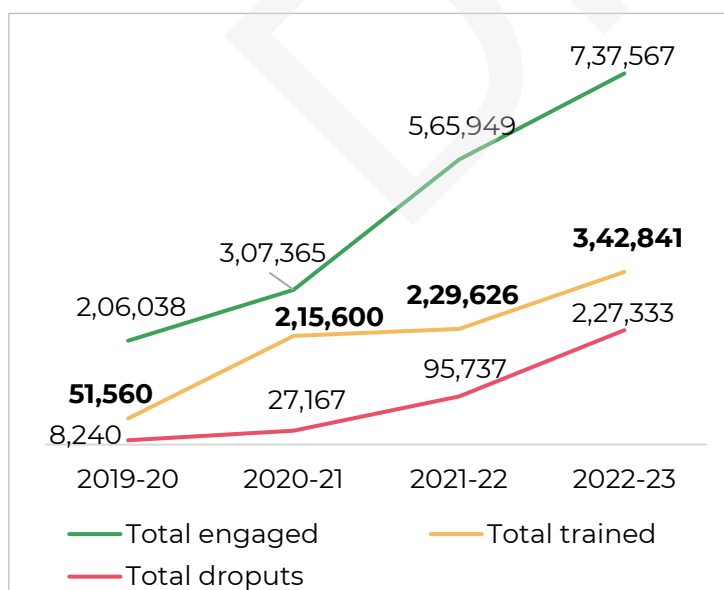

National Apprenticeship Promotion Scheme (NAPS)

As defined by the Apprentices Act 1961, apprenticeship is any 'course' undertaken in an industry establishment in line with a contract and a set of terms and conditions applicable to different categories of apprentices. ⁴ As per the act, it is mandatory for industry establishments having 30 or more employees to engage apprentices within the range of 2.5% to 15% of total workforce strength.

NAPS was introduced with a focus on encouraging apprenticeship via two components: (a) sharing of stipends to apprentices with employers, and (b) sharing of basic training cost with basic training providers (BTPs)

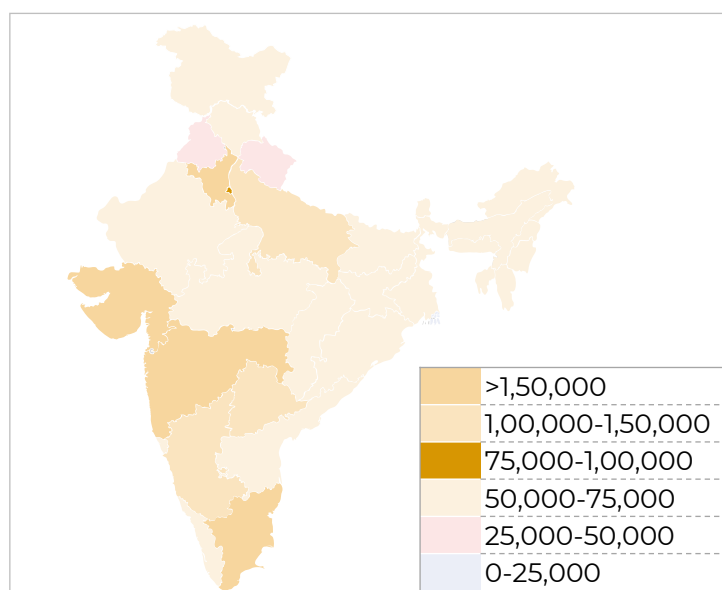

The training under NAPS happens in two different types of trades viz. designated trades and optional trades. As per the Act, designated trades are trades or occupations or any subject field in engineering or non-engineering or technology or any vocational course which the Central Government, after consultation with the Central Apprenticeship Council, may have notified. Whereas, optional trade means any trade or occupation or any subject field in engineering or non-engineering or technology or any vocational course as may be determined by the employer. As per the recent estimates, total of **9 lakhs+** candidates have been trained under NAPS. There has been a growth trend in number of apprentices engaged and trained under NAPS for the duration 2019-20 to 2022-23. While there has been an increase in the number of dropouts as well, mitigating the root cause can help improve the 'apprentices trained to engaged' ratio.

Figure 3: Apprenticeship numbers over past 4 years

Source: www.apprenticeship.org (as on July 2023)

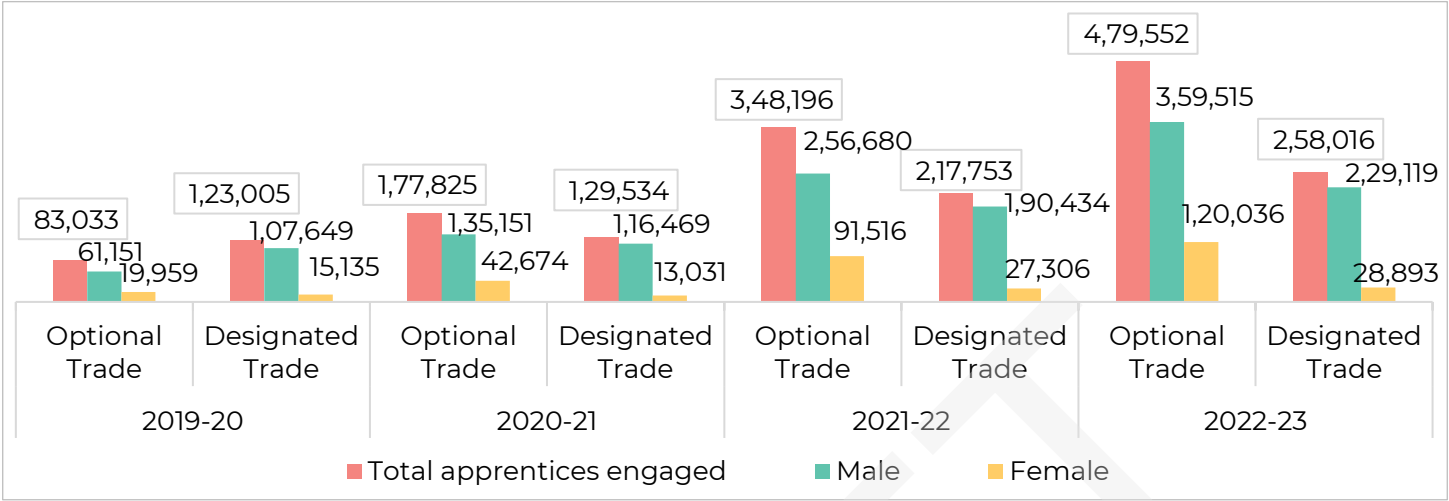

Figure 4: Total number of Apprentices engaged

⁴ Apprenticeship Portal. (2023). Apprenticeship Act. Retrieved July 2023

There has been a YoY growth in number of apprentices under NAPS for both optional and designated trades with the growth more visible in optional trades. While the female representation is not at par with the male across both the trade types, the optional trade segment has a better participation of females as compared to designated trades.⁵

Figure 5: Number of Apprentices engaged over last 4 Years

Source: www.apprenticeship.org (as on July 2023)

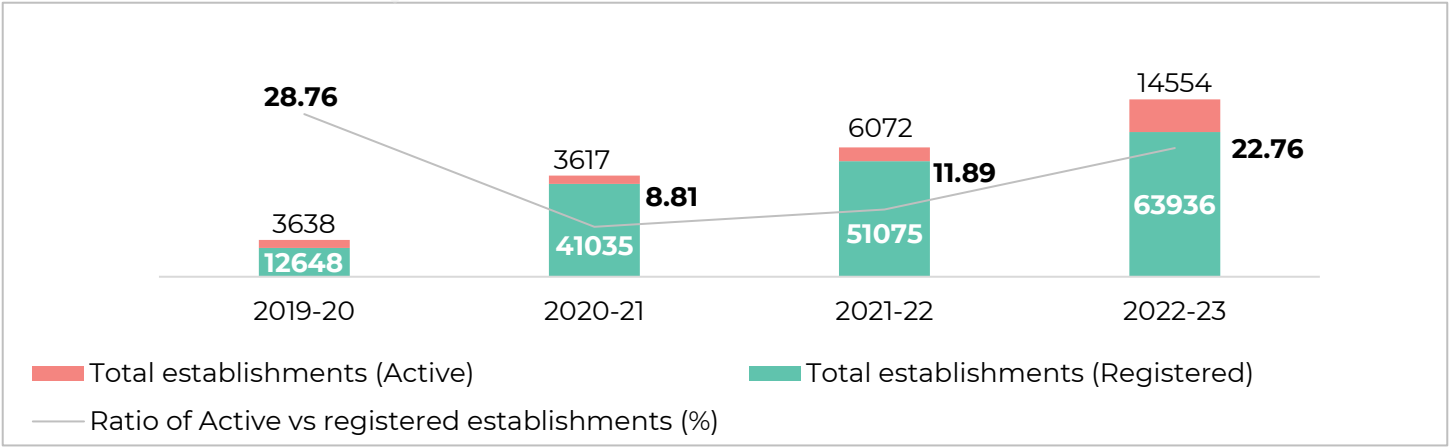

Figure 6: Sectoral performance for Optional and Designated trades

Source: www.apprenticeship.org (as on July 2023)

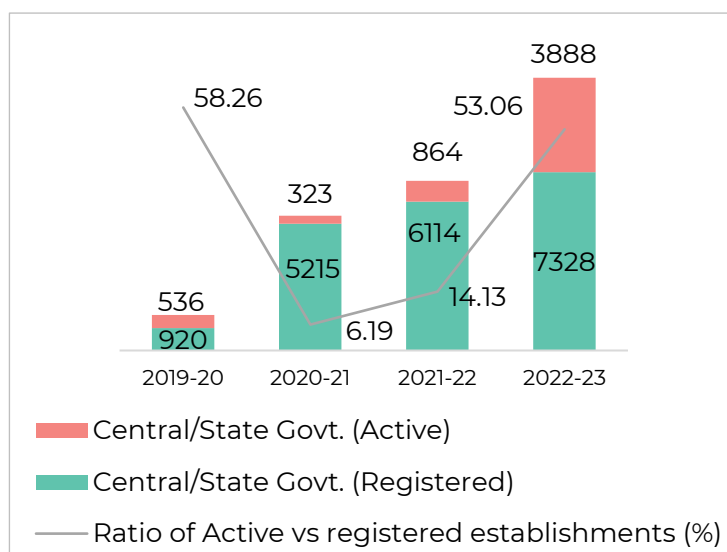

There has been a positive trend in the growth of active establishments offering apprenticeship opportunities for the duration 2019-20 to 2022-23 and it can be clearly seen that the private sector has been an active contributor towards apprenticeship. The ratio of active to registered establishments has seen an increase after COVID-19 which can be attributed to the post-pandemic recovery along with the outreach activities undertaken by MSDE such as Pradhan Mantri National Apprenticeship Melas (PMNAMs).

Figure 7: Registered and Active Establishments Profile over past 4 years

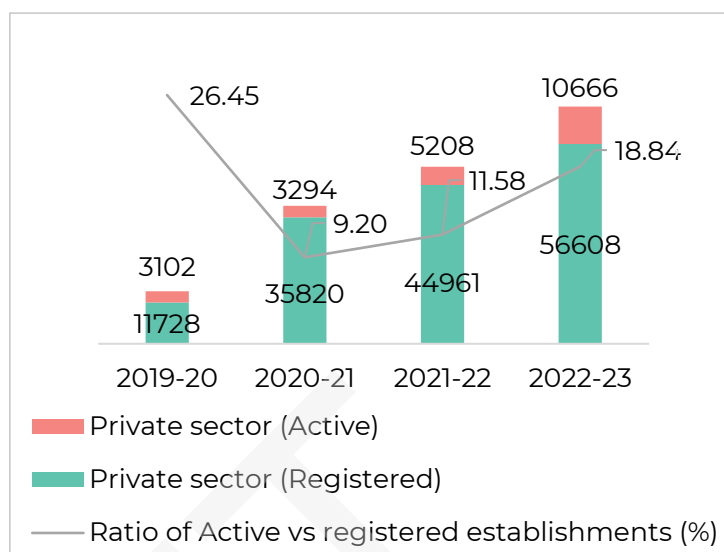

Source: www.apprenticeship.org (as on July 2023)

Figure 8: Government sector Establishments (Registered vs Active Profile) over past 4 years

Source: www.apprenticeship.org (as on July 2023)

Figure 9: Private sector Establishments (Registered vs Active Profile) over past 4 years

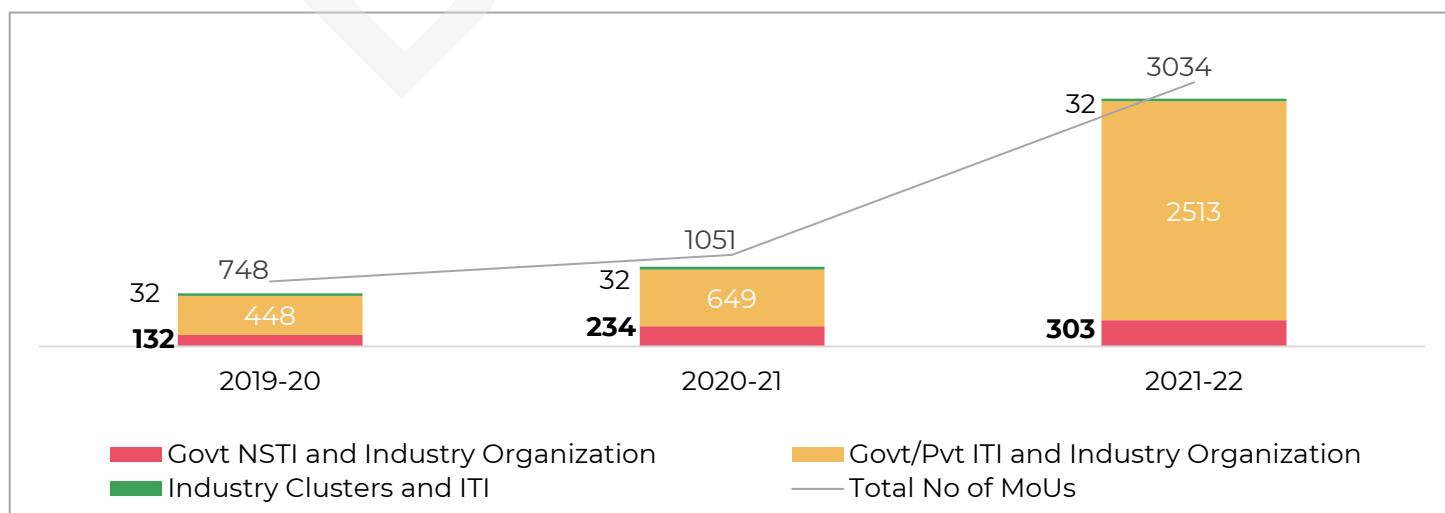

'Degree Apprenticeship' courses can also be one of the alternatives that can increase the penetration of apprenticeship programs in general education streams and ensure job-readiness of graduates while ensuring promotion of apprenticeship on a large scale.

Dual System of Training (DST)

The Dual System of Training (DST) scheme was introduced with an objective to add industry exposure as a component of the Industrial training institute (ITI) training courses. The duration of industry exposure varies from 1 month to 12 months depending on course duration of the ITIs.

As per the recent estimates, a total of **3034 MoUs** have been signed under the DST scheme. The number of MoUs signed by ITIs and National Skill Training Institutes (NSTIs) with the industries and industry clusters under DST has seen a growth for the duration 2019-20 to 2021-22. The jump in partnerships post 2020 could be attributed to the revamp of the scheme in 2019 which allowed more autonomy to Govt. and Pvt. ITIs to directly sign MoUs with Industries, easing of eligibility criteria for industries and bringing all ITI courses under the ambit of the scheme.⁶

Figure 10: Number of MoUs signed (cumulative) under DST over past 3 years

Source: MSDE Annual Reports

⁶ Directorate General of Training. (2023). Policy Guidelines for DST

Flexi-MoU

The Flexi-MoU scheme was introduced with an aim to fulfil the twin objectives of creating industry-ready workforce and allowing flexibility to industries w.r.t their involvement in the training from mobilization to course development and placement. This opened pathways for demand-led skilling in the ecosystem.

As on today, a total of 13 MoUs have been signed with Industrial Training Partners (ITPs) which include a mix of industry organizations (corporations, private limited companies), foundations, and skill universities. The number of trainees to be trained by ITPs should be between 100 and 1000 per annum with job placement of at least 50%. Some of the sectors across which the courses are available are: **Automotive, Mining, Construction, Capital Goods and Manufacturing, Power etc.** ⁷

Recruit-Train-Deploy ⁸ (RTD)

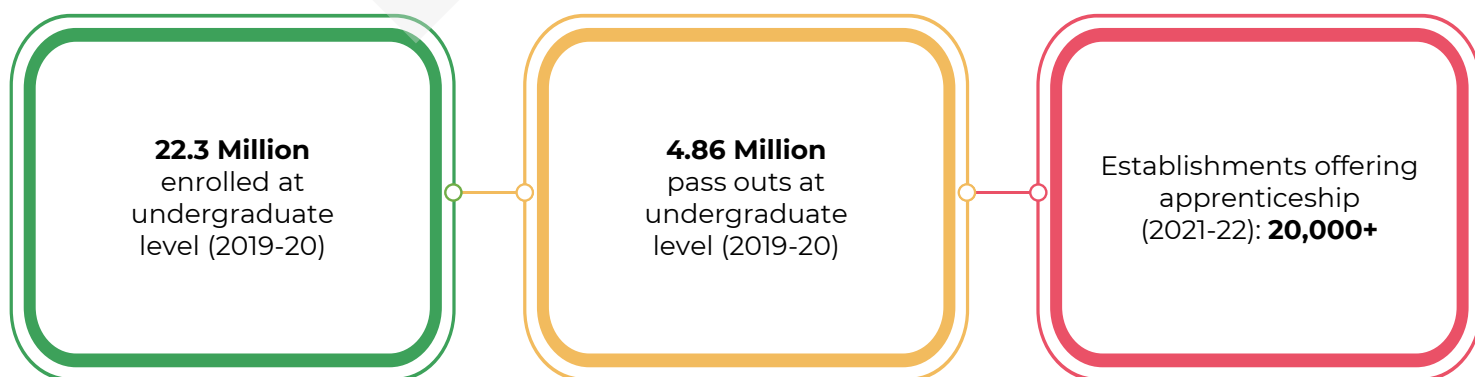

The Recruit-Train-Deploy Model aims to solve the twin issues related to outcome driven and industry-aligned skilling by institutionalizing linkage with the Industries. This model involves selecting best fit candidates by the concerned Industry partner, imparting required training as per the job role and deploying trained candidates on jobs immediately post completing of training.

As on today, the RTD model is being implemented in some States in the country such as Bihar, West Bengal, Rajasthan, Assam etc. wherein the respective State departments have invited proposals and formalized contracts with suitable partners based on finalized criteria for implementing the skilling programs. The model has been a topic of discussion amongst stakeholders including the Center, States, Industries and Industry Associations and the focus is on tapping into its full potential. The model is expected to gain traction through the Skill India Initiative of MSDE as well. CII is supporting the RTD model through one of its CSR initiatives across States such as Rajasthan, Uttar Pradesh, Madhya Pradesh, Himachal Pradesh, NCR, Bihar and Maharashtra.

National Apprenticeship Training Scheme (NATS)

NATS is one of the flagship programs of Government of India on Apprenticeship providing practical training of one year to trainees. The key objectives of the scheme are as follows: (a) reducing employability gap of the graduates (b) meeting skilled manpower requirement for emerging areas like Production linked Incentive(PLI) and PM Gati Shakti schemes.

Some of the key performance numbers for NATS based on recent available data are as follows ⁹

⁹ International Labor Organization. (2022). How to improve Graduate Apprenticeship Programme in India?

Private Sector initiatives

A few of the examples highlighting the involvement of the private sector in Government initiatives are as follows ¹⁰

Figure 11: Case Studies for Industry Academia Partnership

 Lumax Technologies	- Started participating in the NAPS with a pilot training 12 establishments with a total employee strength of 7500 are registered and 690+ contracts generated so far
 Maruti Suzuki	- Maruti Suzuki has signed MoUs with ITIs through which it offers DST programs and absorbs the students into its workforce - It provides soft skills training as well
 Daikin	- Daikin Air Condition Ltd. has setup RAC labs in ITI Pusa where it offers technical training under DST - It also supports in introduction of new courses and Training of Trainer (ToT) programs as well

Some of the prominent organizations in the private sector who have been offering work-integrated learning programs are as follows ¹¹

Figure 12: Case Studies for Industry Initiatives of Work Integrated Learning

 Manufacturing and Construction	Amara Raja - Amara Raja Skill Development Center offers skill development programs - On-the-Job Training (OJT) of 21 months to students as part of the program Larsen & Toubro - Larsen and Toubro offers work-integrated learning programs via L&T Edu-Tech platform - Internship opportunities for students Adani - Hybrid and online courses available 40 Saksham centres offering 75 courses across sectors - Partnership with other corporates

Retrieved July 2023, Toyota Bharat. (2023). Toyota training program. Retrieved July 2023, Mercedes. (2022). Advanced Skill Development. Retrieved July 2023

IT-ITeS

Salesforce

- Salesforce offers learning pathways for different roles in the Salesforce ecosystem via its Trailhead Academy and Smart Internz Program
- Programs for working professionals and students

Microsoft

- Microsoft offers several digital training programs in IT-ITeS sector via 'Microsoft Learn' platform

Automotive

Maruti Suzuki

- Maruti Suzuki Training Academy offers training programs for its employees, vendors and students
- Programs are focused on behavioral, technical and functional skills

Mercedes Benz

- Through its CSR initiative, Advanced Diploma in Automotive Mechatronics is taught in Mechatronics training school of Mercedes-Benz India
- The target segment is young graduates

Toyota

- Partnership with 41 technical institutes across India to provide Toyota-Technical Education program to aspiring youth
- The program offers 1-3 years courses in General Service, Automotive Body Repair, Automotive Paint Repair and Service Advisor

Hospitality

Oberoi

- Offers 3 types of programs in hotel management for 12th pass and graduates
- Bachelors program with OJT/internship
- Internship program for graduates and post-graduates with opportunities at Trident and Oberoi hotels

IHCL

- 3-year Bachelor of Vocation Education (B.VoC) program offered by IHCL in partnership with TISS-SVE
- OJT/internship opportunities at designated hotels coupled with placement assistance

Opportunities And Challenges

Some of the major challenges and opportunities in the sector are as follows ¹²

Challenges

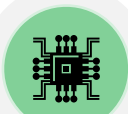

INADEQUATE INDUSTRY PARTICIPATION

Given the number of establishments present in the country, the participation rate of industries in apprenticeship and other work integrated learning programs has huge scope of improvement. As on 2020, 11 lakhs+ companies were registered in the country whereas the total number of companies registered for apprenticeship barely reached two lakhs by 2021-22.

LOW PARTICIPATION OF MSMEs

With MSMEs hiring almost close to 110 Mn citizens across the country and contributing to 30% of the GDP, the participation rate of MSMEs have been lower due to smaller workforce strength, leaving them out of the apprenticeship purview.

DIFFERENT ADMINISTRATIVE SYSTEMS

Incentives for promotion of work integrated learning are driven by different ministries and ministerial bodies. For instance, the apprenticeship incentives are provided under 2 different schemes viz. NAPS and NATS. Having different processes for similar initiatives may make the process complicated for the industry and beneficiaries.

LACK OF AWARENESS AMONG STUDENTS WITH REGARDS TO THE OPPORTUNITIES

Even after several apprenticeship reforms, lack of awareness remains a major issue among potential aspirants. This was also substantiated by several studies undertaken about TVET in India such as Tracer Study of ITI Graduates-Final Report (2018), DFID-Dalberg Study (2020), ILO report on good practices in apprenticeships in India (2022) etc.

LESS PENETRATION OF EMERGING TECH COURSES

Even though the Industry 4.0 courses have been introduced in vocational training ecosystem including the ITIs, it is yet to be introduced for apprenticeship programs. Apprenticeship opportunities need to be responsive to technological advancements to ensure minimal skill gap. The low adoption of such courses may be attributed to lack of flexibility in defining standards under flagship incentive programs.

Opportunities

INFORMAL SECTOR MAINSTREAMING

Almost 94% of the enterprises in the country are operating in the informal sector. Apprenticeship can offer an opportunity to the employees engaged in the sector to improve their overall productivity and wages in the economy.

PROGRESSION PATHWAYS FOR APPRENTICESHIP

Lack of systematic progression pathways for apprenticeship is one of the roadblocks for making it more aspirational. Progression pathways can give impetus to the work-integrated learning agenda. The operationalization of National Credit Framework (NCrF) could be a beginning on this front.

ALIGNMENT WITH HIGH GROWTH SECTORS

Work integrated learning initiatives can drive the development of talent pool for high growth sectors that are seeing increased investments in the country. Sectors such as IT-ITeS, Automobile, Electronic System Design and Manufacturing, Animation and Gaming etc. are seen having high growth potential and would require a skilled talent pool to drive adoption of new technologies and processes. This will support the twin agenda of fulfilling skill development requirements of industries and improving the overall workforce quality.

¹² Ashwani Aggarwal and Srinivas B.Reddy. (2022). Good practices in apprenticeships in India: Challenges and opportunities. Ministry of Finance. (2022-23). Economic Survey

Cross Cutting Themes

Some of the cross-cutting themes for work-integrated learning are mentioned below: ¹³

FUTURE OF WORK

The future of work is changing with emerging technologies and ensuing disruption in the job roles and skills required by the employers. Effective policy environment and stakeholder engagement shall be key to manage the rapidly evolving skills ecosystem. NATS focuses on coverage of emerging areas such as IoT, AI, AR/VR, Cybersecurity etc. Some of the key Industry initiatives in this regard with respect to work integrated learning are as follows;

- **TCS-Ion** Honor certification program offers industry relevant courses with industry aligned content and offers internship and job opportunities with industry.
- **Google** offers apprenticeship opportunities to graduates and diploma holders in four digital disciplines (data analytics, digital marketing, IT and project management).
- **Automotive Skill Development Council (ASDC)** has partnered with Pune based Automobile Research Association of India for developing Electric Vehicle (EV) based credentials.

INDUSTRY ALIGNED SKILLING

The skilling interventions can be aligned to Industry demand more effectively through the work-integrated learning programs. It ensures that the candidates are equipped with technical/soft skills required for workforce readiness. From a policy standpoint, there are several provisions such as provision for industries to introduce optional trades under Apprenticeship Act, including from the service sector & provision in Flexi-MoU guidelines for Industry to contribute to the training value chain starting from admissions to placement. A few of the notable initiatives by industries in this regard are as follows:

- **Microsoft** offers digital skills training and certifications in 13 programs in Partnership with **LinkedIn learning** and **GITHUB** via usage of micro-credentials.
- **Future Skills Platform** launched under Future Skills Initiative of **Melty and NASSCOM** offers courses in emerging technology in partnership with academia and industry OEMs like Microsoft, Salesforce etc.

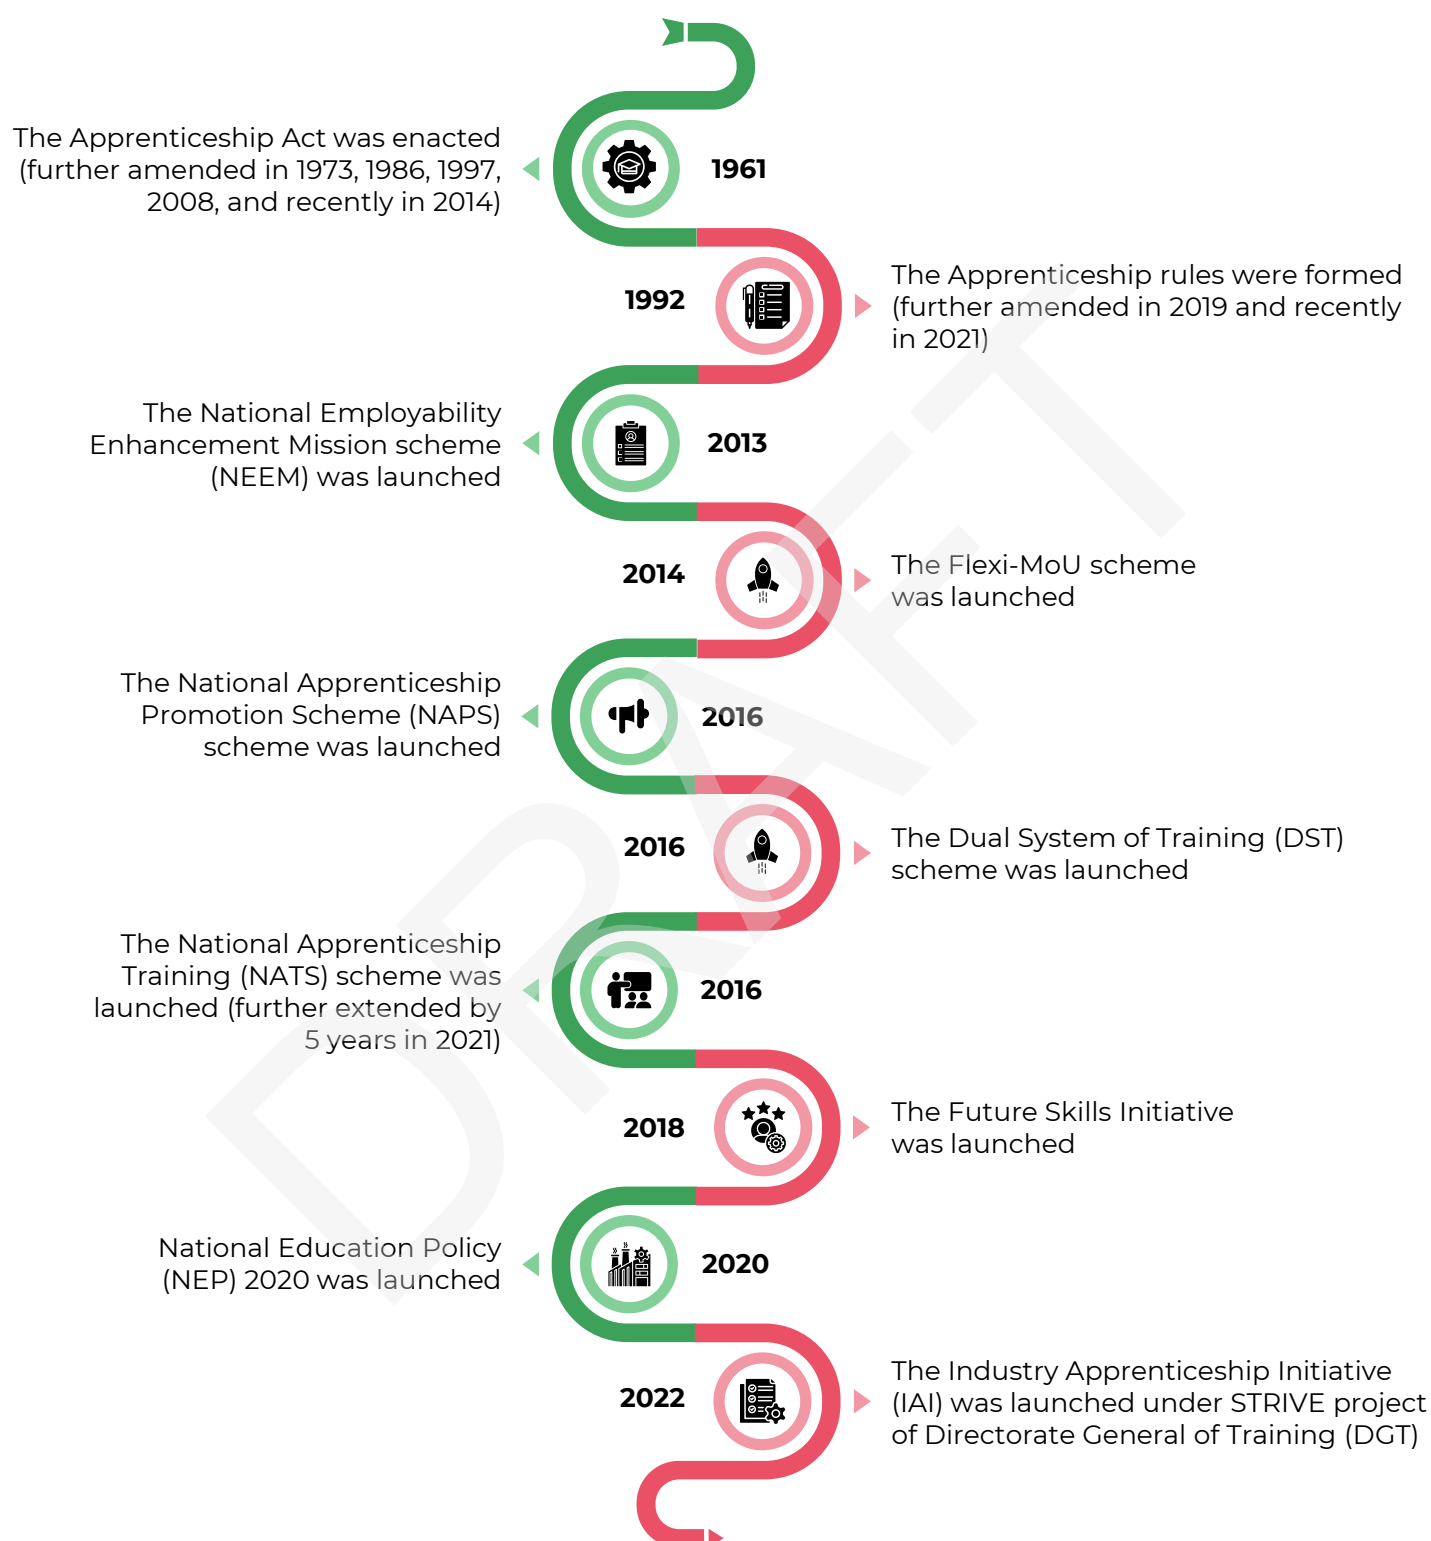

GENDER INCLUSIVITY

Gender inclusivity in work-integrated learning programs shall be key towards improving the labor force participation rate of the country in future. A total of more than two lakhs female candidates have been trained in optional trades in last 4 years. Industries are taking a step forward with **Tata Steel Mining Limited** launching an all-women apprenticeship batch. Incentivization to MSMEs for employing female apprentices can be a step towards increasing female participation.

¹³Ministry of Education. (2022). National Apprenticeship Training Scheme, Ashwani Aggarwal and Srinivas B.Reddy. (2022). Promoting apprenticeships to meet the skills needs of the digital and knowledge economy. Apprenticeship Portal. (2023). Apprenticeship Act. Retrieved July 2023, Directorate General of Training. Government Interventions

A brief snapshot of the key policy tailwinds that have impacted the work-integrated learning ecosystem are as follows:

कौशल विकास और
उद्यमशीलता मंत्रालय
MINISTRY OF
SKILL DEVELOPMENT
AND ENTREPRENEURSHIP

सत्यमेव जयते

- The Apprenticeship Act launched in 1961 underwent further amendments (including the amendment in 2014), with a focus on introducing more trades (designated/optional), including more industries/establishments and providing access to different categories of aspirants, among others.
- The Apprenticeship rules were introduced in 1992 which were amended (including the amendment in 2019) subsequently with a focus on introducing category wise stipends for apprentices.
- The STRIVE project launched by World Bank in 2017 aimed at transforming the ITI ecosystem on several aspects including Apprenticeship.
- The Industry Apprenticeship Initiative (IAI) initiative was launched under STRIVE project in 2020 which provides grants to increase engagements with the industry clusters for apprenticeship promotion and opportunities generation.
- NAPS was introduced with a focus on encouraging apprenticeship through sharing of stipends to apprentices with employers and sharing of basic training cost with basic training providers.
- Flexi-MoU and DST were launched with a focus on demand-led skilling and encouraging active participation from Industries.

शिक्षा मंत्रालय
MINISTRY OF
EDUCATION

सत्यमेव जयते

- NATS was launched with an objective of reducing employability gap of graduates in engineering and non-engineering streams, and meeting manpower demand for emerging sectors.
- Under NEP, the Professors of Practice initiative was launched in 2022 to integrate the experience of senior industry professionals with classroom learning through enhanced faculty development and industry aligned course curriculum.
- The Degree Apprenticeship program offers flexibility to HEIs and Industries while ensuring vertical mobility for aspirants along with demand side considerations.
- The NEEM which has been recently discontinued, aimed at offering OJT experience to underprivileged youth employed in graduation courses.

इलेक्ट्रॉनिक्स एवं
सूचना प्रौद्योगिकी मंत्रालय
MINISTRY OF
ELECTRONICS AND
INFORMATION TECHNOLOGY

सत्यमेव जयते

- Future Skills Initiative was launched to drive demand-led skilling and promote work integrated learning to meet the growing industry needs in the IT-ITeS sector with most of the courses being NSQF aligned and offered in partnership with Industry players and OEMs.

Some of the ongoing State level schemes/initiatives to promote work-integrated learning are as follows ¹⁴

Mukhyamantri Apprenticeship Scheme

- Reimbursement to establishments/apprentices.
- Focused outreach programs and decentralized implementation.
- ✓ 50,000+ apprentices engaged in 2019-20.

Maharashtra Apprenticeship Scheme

- Stipend payable to apprentices up to 75% of total amount.
- Reimbursement to BTPs.
- ✓ Target of training 100,000 apprentices every year.

Flexi-MoU Scheme

- Flexibility to Industry to train candidates as per demand and linked to outcomes.
- Special provisions in terms of relaxation for local industries and students.
- Involvement across different segments of the training value.
- Clear roles and responsibilities defined for ITP and Government.
- ✓ 250+ contracts awarded by Jan 2022.

Chief Minister Apprenticeship Promotion Scheme

- Monthly allowance to students under the scheme.

Karnataka Apprenticeship Promotion Scheme

- Reimbursement to the establishments for the apprentices.

Flexi-MoU Scheme

- Aims to reduce the demand and supply gap.
- Eligibility criteria defined for Industries/Industry clusters/staffing companies.
- Applicable to both manufacturing and service sectors.
- Clear roles and responsibilities defined for ITP and Government.
- ✓ 660+ MoUs signed with industries/organizations till date.

Mukhya Mantri Seekho Kamao Yojana

- Aims to equip youth with employable skills via Industry-oriented vocational training.
- Stipend provided during vocational training.
- Applicants should be domicile of Madhya Pradesh.
- Minimum education qualification shall be 12th / ITI or above.

Recruit-Train-Deploy Model

- Allows the industry to train as per their requirements.
- Inviting applications for 4 different types of industries: Industry Led (Type A Association) 2. HR/Placement Agency Led (Type B Association) 3. Training Partner Led (Type C Association) and 4. Special Projects.
- Eligibility criteria for different types of industries.
- Applicant students should be Bihar domicile.
- ✓ Sectors- Retail, Construction, Beauty and Wellness, Security etc.

Recruit-Train-Deploy Model

- Allows the industry to train as per their requirements.
- Inviting applications for 4 different types of industries: 1. Industry Led (Type A Association) 2. HR/Placement Agency Led (Type B Association) 3. Training Partner Led (Type C Association) and 4. Special Projects.
- Eligibility criteria for different types of industries.
- Applicant students should be West Bengal domicile.

Retrieved September 2023

Way Forward

The key thematic areas of focus for work-integrated learning as we move forward can be as follows ¹⁵

Accelerating industries' participation in apprenticeship by formulating targeted approaches for large enterprises, MSMEs and Government institutions along with a robust approach for untapped geographies. The cases of Norway, Australia and Germany can be studied in detail where collective training offices and customized placement program for SMEs helped increase the penetration of apprenticeship

Introducing apprenticeship/OJT opportunities in Industry 4.0 related job roles such as Data scientist, automation engineer, IoT Engineer etc. to keep pace with the integration of emerging technology in the economy.

Identifying and expanding innovative models like degree apprenticeships for engaging the private sector in work-integrated learning. The total enrolments across the degree programs in India has been growing with a positive CAGR since the past 5 years.

Scaling up the Recruit-Train-Deploy (RTD) Model across all the States by identifying target sectors and incentivizing industry participation in such models. Learnings can be drawn for programs implemented in Bihar and West Bengal wherein manpower intensive sectors were targeted to implement and scale the RTD model.

Strengthening implementation of existing schemes through capacity-building initiatives, robust Monitoring and Evaluation framework, simplified SoPs and guidelines, and integration of various initiatives such as NAPS, and NATS.

Rebranding the apprenticeship programs through the lens of a value-based approach i.e. the employers and apprentices should view the programs as a best fit for long-term gains rather than being fixated to short term incentives.
