NITI AAYOG'S Mandate

Working with States

*Promoting
Knowledge &
Innovation*

*Driving
Transformative
change*

Monitoring and Evaluation

Supporting States to achieve socio-economic goals

Hon'ble Prime Minister in his address to the Nation on the occasion of 76th Independence Day, while setting the tone for **Viksit Bharat@2047**, set the stage for this mission for the nation.

Translating this vision into outcomes, the **SSM** aims to empower States and UTs with strong institutions and **data-driven governance** to lead India's journey towards Viksit Bharat@2047.

- i. **Central Sector** scheme for structured State–UT engagement
- ii. **Demand-driven participation** by interested States/UTs

Hon'ble PM highlighted the need for a knowledge infrastructure to enable India's bureaucracy

“...encourage real-time sharing of best practices and success stories”

“...develop a repository to collate the innovations developed in Aspirational Districts and Blocks so that other states and countries can learn from them”

“...all officers to spend at least 100 hours a year in mentoring their junior officers”

“...AI, Blockchain, Quantum Computing and other New Age Technologies must be adopted in Governance in the years ahead”

Three Components of NITI for States (NFS) Platform

1

NFS Online Portal
www.nitiforstates.gov.in

Web-based knowledge-sharing
and resource hub for state
officials

2

**Viksit Bharat Strategy Room
(VBSR)**

Data-driven policy analysis and
decision-support environment

3

**NITI TARA — Toolkit for
Analysis, Review and Action**

Portable, internet-enabled all-in-
one device for field use

NITI TARA

(Toolkit for **A**nalysis, **R**eview and **A**ction)

“In the age of technology, governance is not about managing systems, it is about multiplying possibilities. We must become tech-savvy, so that every policy and scheme can be made more efficient and accessible through technology. We must become experts in data-driven decision-making, so that policy design and implementation become more accurate.”

PM’s address on the 17th Civil Services Day

All-in-One Device

Combines a computer, projector, display, audio system & more in a single compact unit.

Touch-Enabled Interactive Screen

Turns any wall into a touch-enabled interactive screen. No separate meeting room needed.

Always Online

SIM-based connectivity, plus Wi-Fi and Bluetooth support.

Built for Collaboration

Supports web conferencing with in-built camera & microphones.

Smart & Connected

M2M tech for live data sync and automatic software updates; secure access via whitelisted websites.

Large-Format Projection

Projects up to 300-inch high-resolution visuals.

What Officials can do with the device?

1

One click access to dashboard that enables monitoring of Aspirational Districts and Blocks as well as Departmental performance

2

Access NITI for States Best Practices, Policies and Data including State, District and Block profiles - ANYWHERE ANYTIME

3

Access PM Gati Shakti platform layers in Area Development Strategy tool powered by BISAG-N.

4

Access to curated sectoral analysis and use cases in VBSR.

5

Generate AI-enabled multi-lingual Record of discussion for the meetings powered by SMRITI (System for Meeting Recording, Information & Transcription Interface) by Bhashini.

6

Other Governance : Create videos and contribute as best practices to NITI ; Use the device for virtual meetings;

1| Key Capabilities of NITI TARA for Viksit Bharat

Viksit Bharat Strategy Room

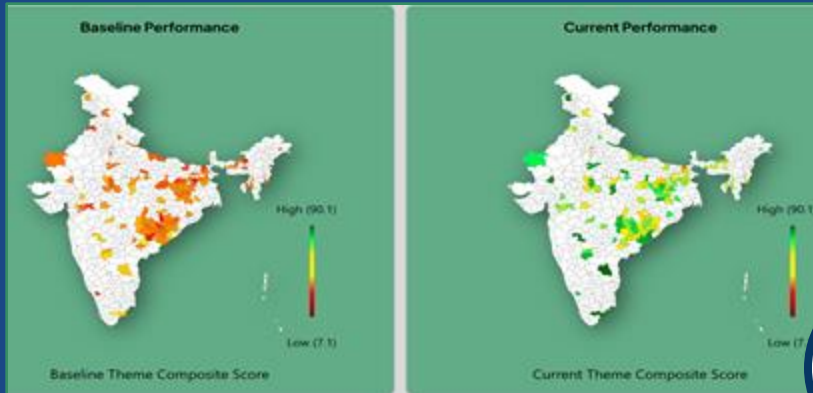

Single click access to sectoral insights and visualisations as available in NITI's Viksit Bharat Strategy Room.

Provides integrated access to **75+ sector-specific focus areas** and **20+ governance and development use cases** from district /blocks within the Viksit Bharat Strategy Room, supporting strategic planning, targeted interventions, and outcome-based monitoring.

2| Key Capabilities of NITI TARA for Viksit Bharat

NITI Programmes

Dashboard for **Tracking** of NITI Programme Implementation in **Aspirational Districts and Blocks**

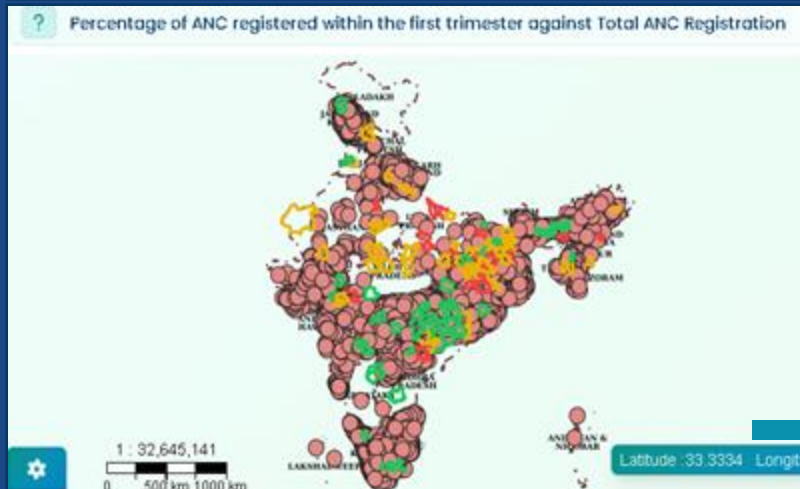

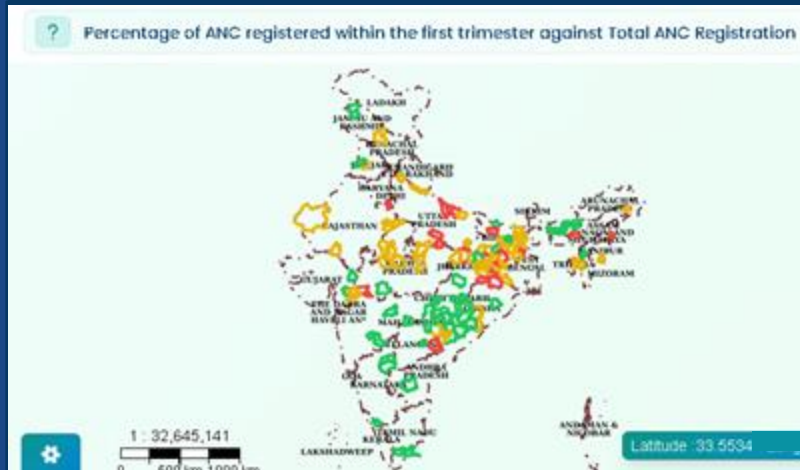

Top 5 Overall Delta Ranks Sept 2025

- 1 Karsha, Kargil
- 2 Dasda, North Tripura
- 3 Gangapur City, S. Madhopur
- 4 Narnoor, Adilabad

Enables tracking of program implementation through continuous monitoring of NITI initiatives, with **quarterly progress assessments** across **Aspirational Districts and Blocks** to support evidence-based decision-making and course correction.

3| Key Capabilities of NITI TARA for Viksit Bharat

Area Development Strategy

Enable **area development planning** for all ADP/ABP Districts and Blocks using **PM Gati Shakti geospatial layers**

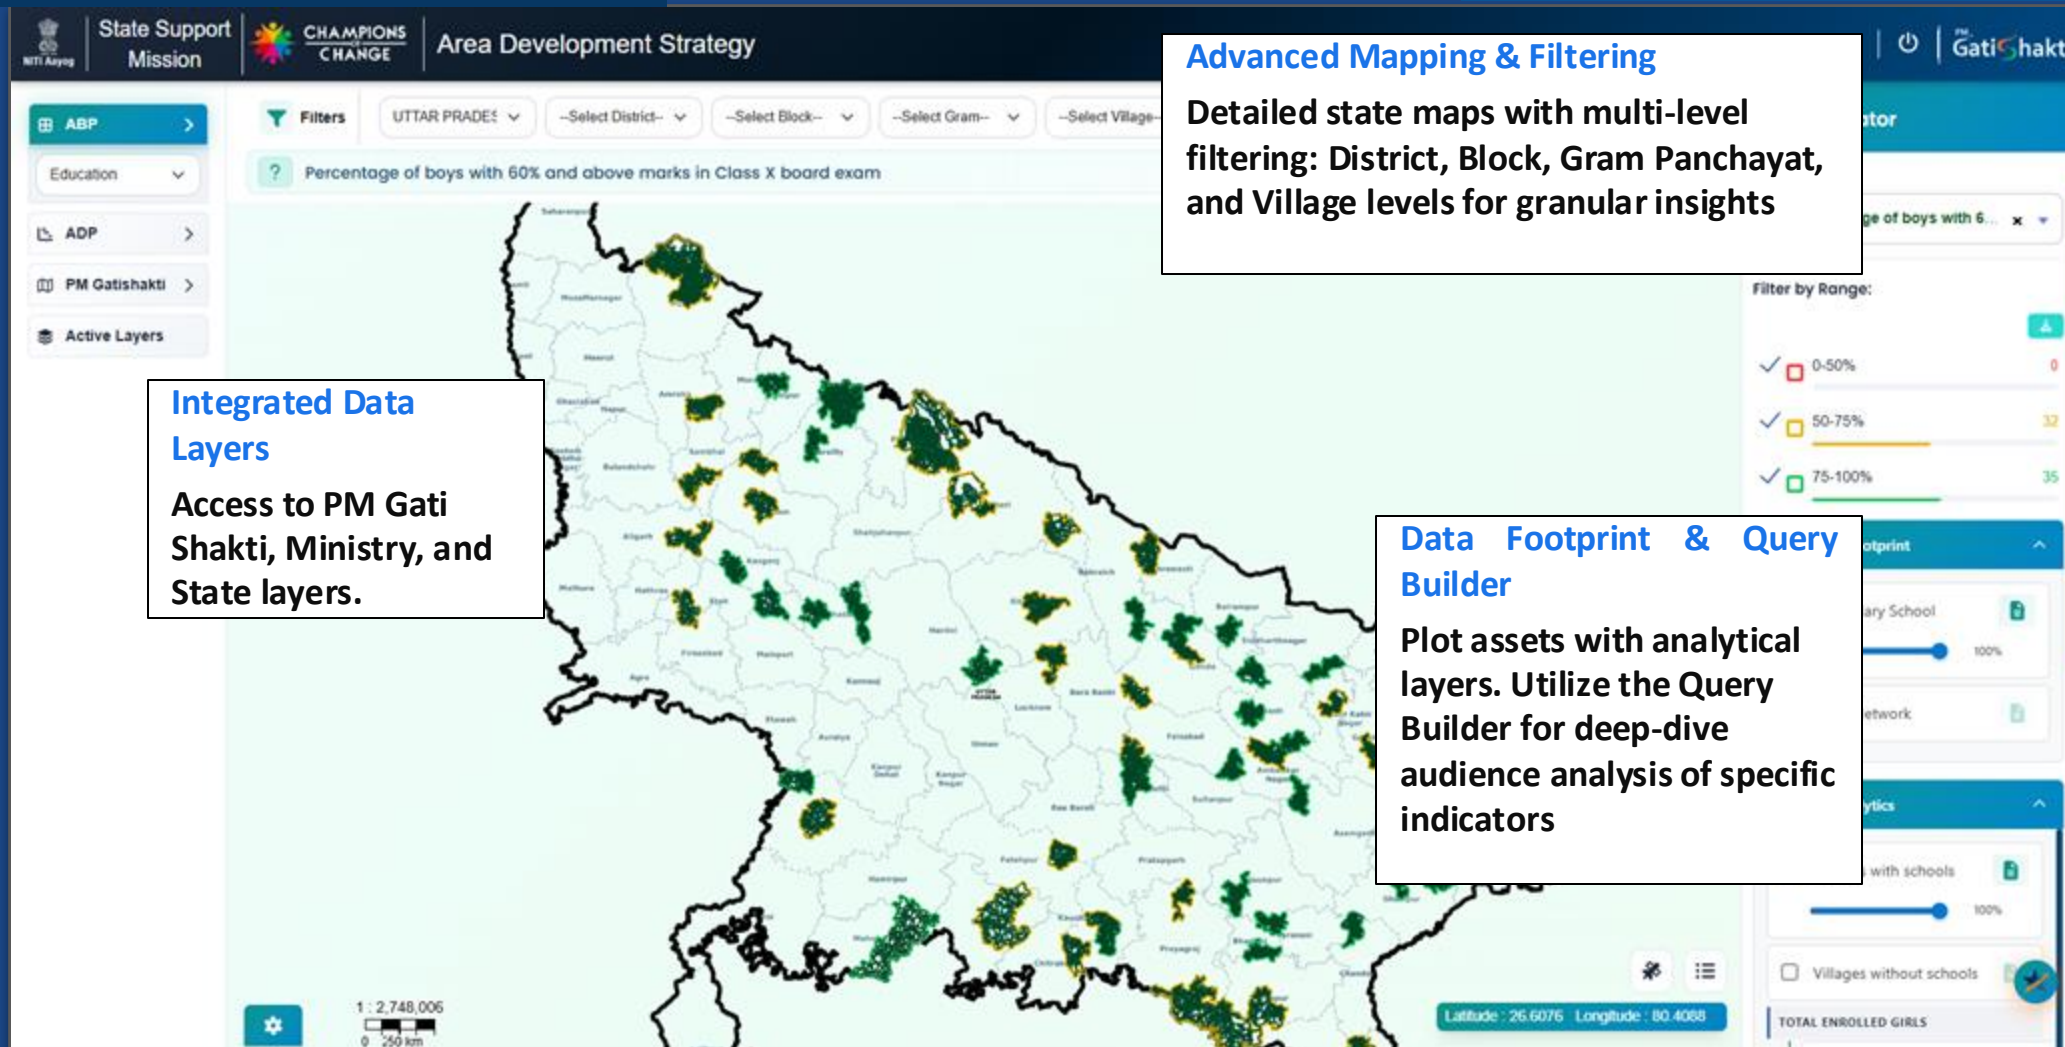

The **Area Development Strategy (ADS) Tool** is a geospatial platform designed to help district and block officials implement the Viksit Bharat 2047 goals through evidence-based planning. It aims to streamline governance by focusing on four practical applications:

1. Spatial Gap Analysis
2. Resource Allocation
3. Scheme Monitoring
4. Data Integration

3| Key Capabilities of NITI TARA for Viksit Bharat

Area Development Strategy

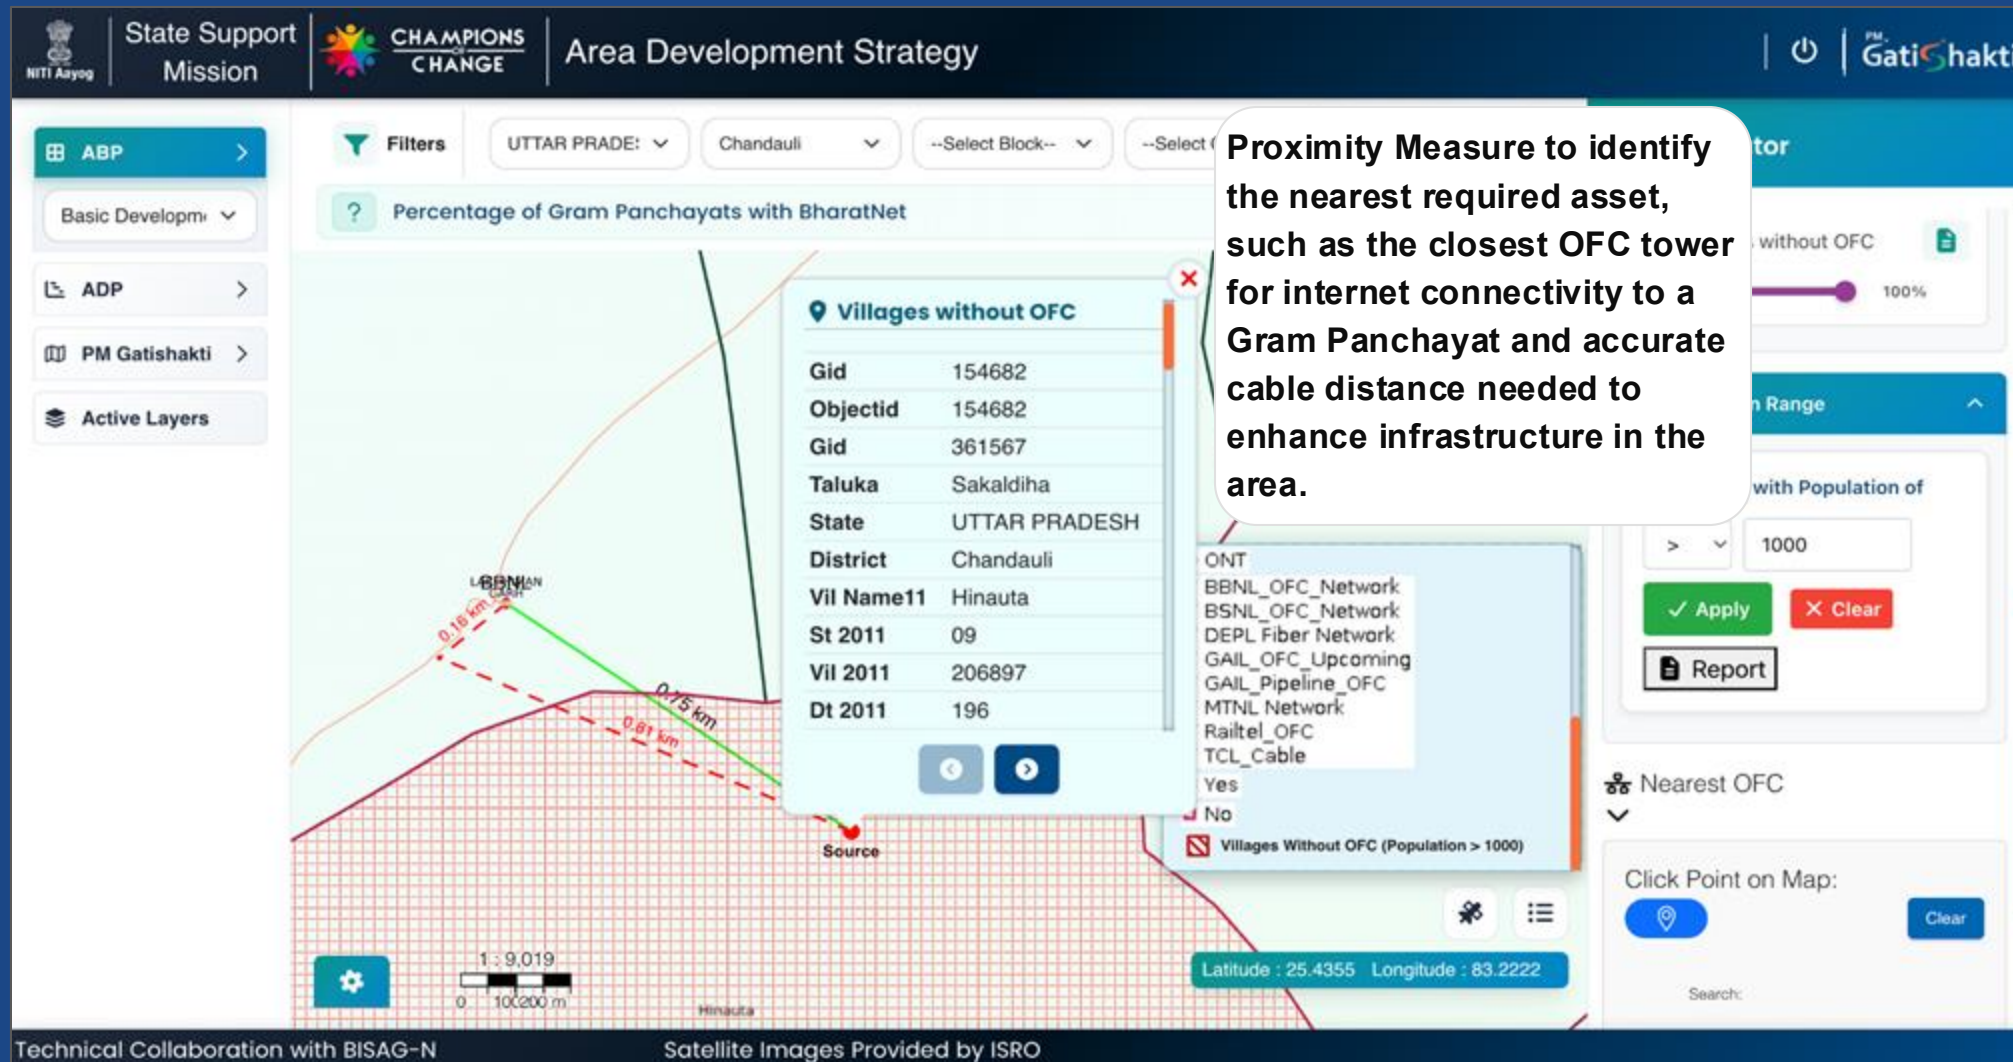

Interactive Query Builder

3| Key Capabilities of NITI TARA for Viksit Bharat

Area Development Strategy

Proximity Measure & Allocator

Proximity Measure to identify the nearest required asset, such as the closest OFC tower for internet connectivity to a Gram Panchayat and accurate cable distance needed to enhance infrastructure in the area.

Detailed Set up and operations of NITI TARA Device

How does NITI TARA help Districts and Blocks?

Wireless Keyboard

Wireless Signal Receiver

Wireless Mouse

Stylus Pen

Remote Control

Charger for Stylus Pen

Power Cord

Interfaces of NITI TARA

USB Type-C
Connector

Mic In

Audio Out
(Headphone, Aux.
Sound System)

Display
Port (DP)

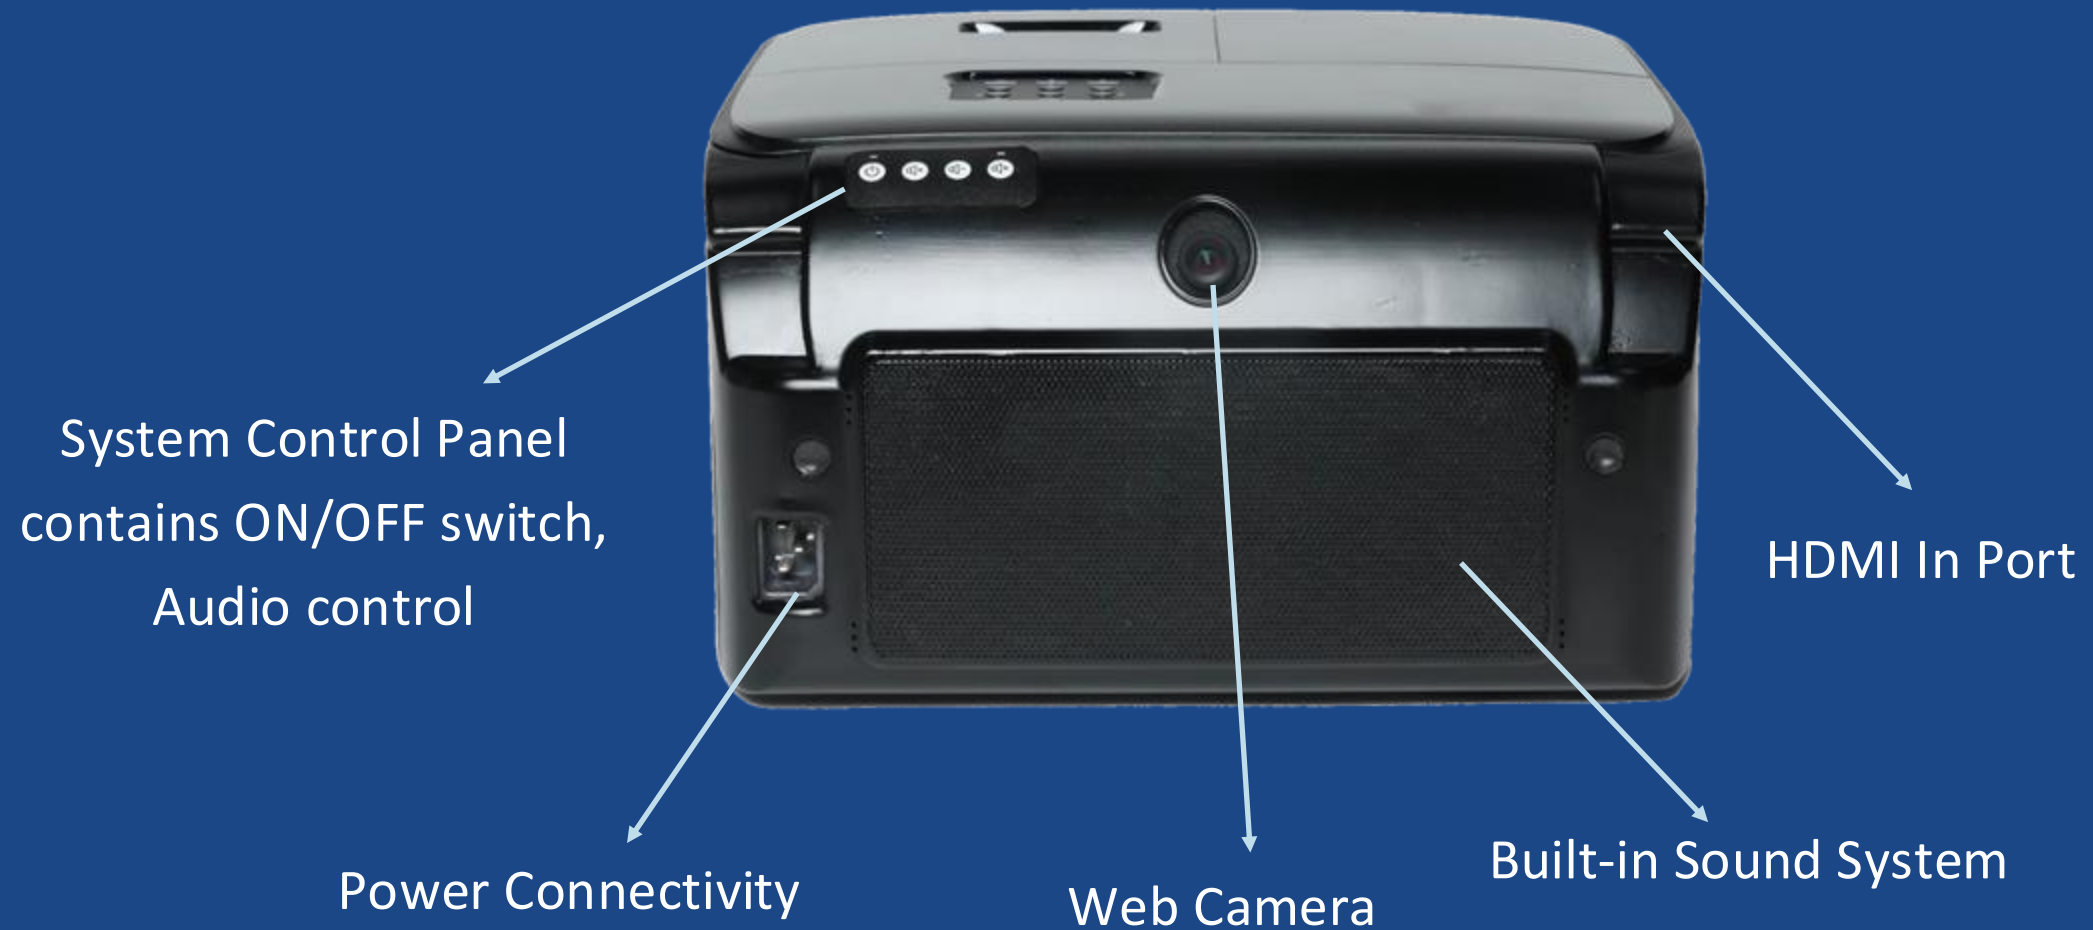

HDMI Out Port
(Monitor, Laptop)

Network
Port

USB 2.0

USB 3.0

(Connect Pen Drive, Printer,
Mouse, Keyboard, Webcam)

1. Plug the UPS on the wall socket.

2. Connect the power cable one side at the back of NITI TARA and the other at the back of UPS.

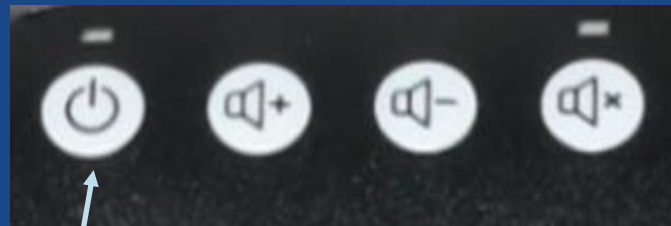

3. Make sure that the signal receiver for the wireless keyboard and mouse is connected to one of the USB ports of NITI TARA.

Proceed...

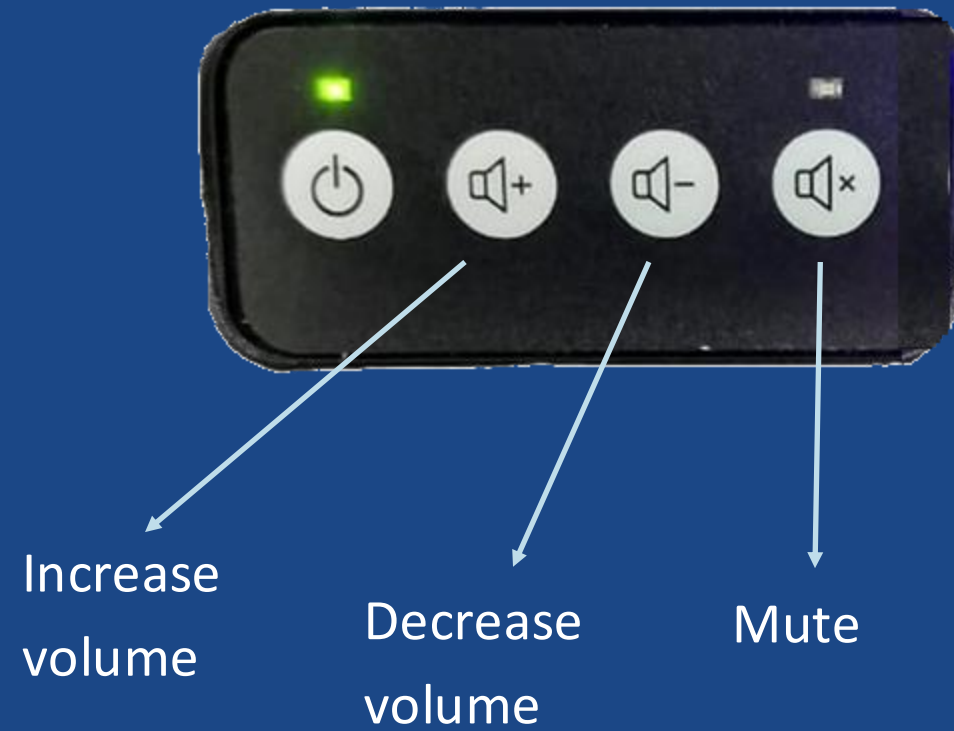

4. Open the lens cover.

5. Press the Projector Power button.

6. Press Power button of the computing system.

By default, the audio is on mute at startup

Increase in distance between the tool and the projection surface increases the projection area.

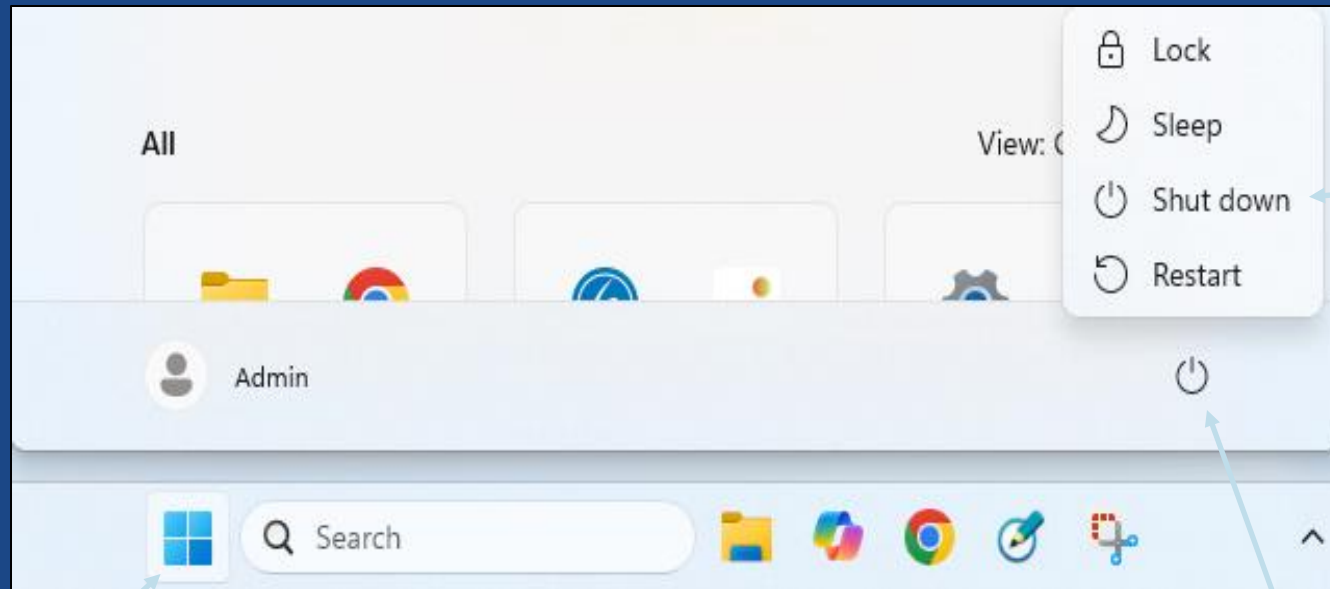

For interactivity to work properly, distance between the device and the projection surface should be within 5 ft.

NITI TARA – Startup Interface

NITI TARA – Shutdown Process

If you are on the Desktop or any other application window, use the following steps to shut down :

1. Click on the **Start** button.

2. Click on the **Power** button.

3. Click on the **Shut down** option.

Proceed...

4. Press the **Power** button of the projection system twice to shut down the Projector.

5. Switch off the **Power** button of the UPS.

6. Put the wall switch OFF.

Process of Charging Stylus Pen

Converting a Wall into Digital Interactive Interface

Calibration process converts a wall into digital interactive board.

EyeRIS application
does the calibration
process.

Calibration is automatically
done by the device when it
starts.

So, user does not require to do
this process unless the position
of device is changed after
startup.

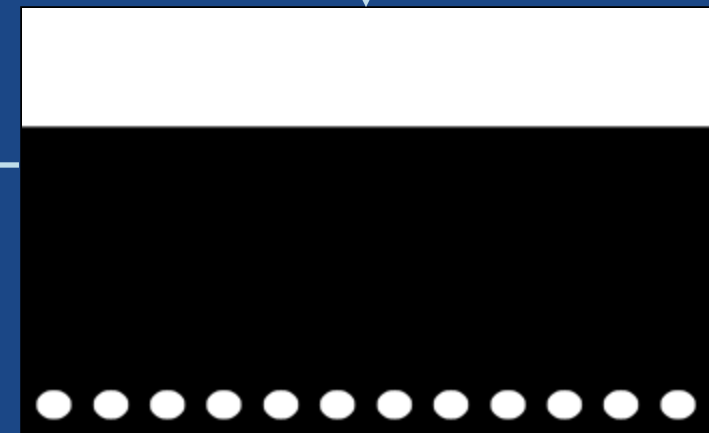

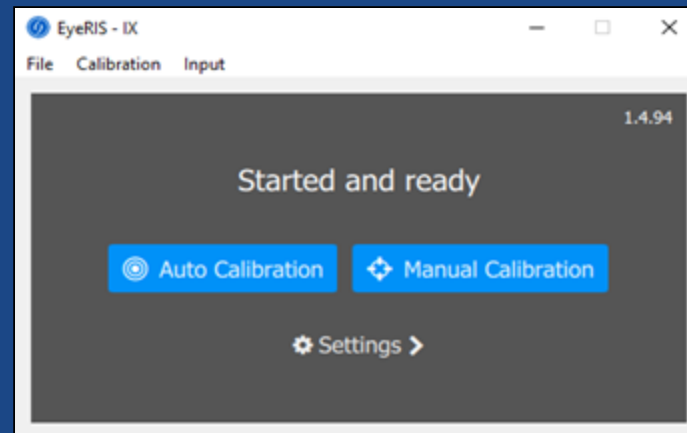

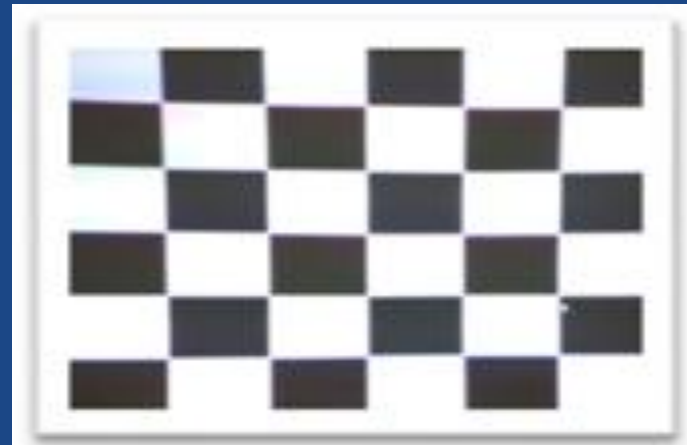

System tray shows all
the apps running in
the background.

User should click EyeRIS icon from System Tray, if calibration is required.

Auto Calibration Process

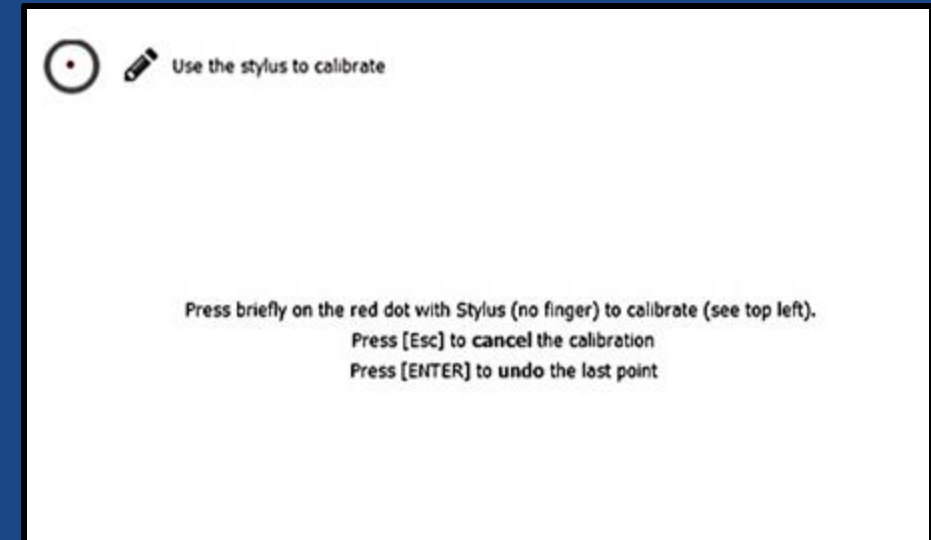

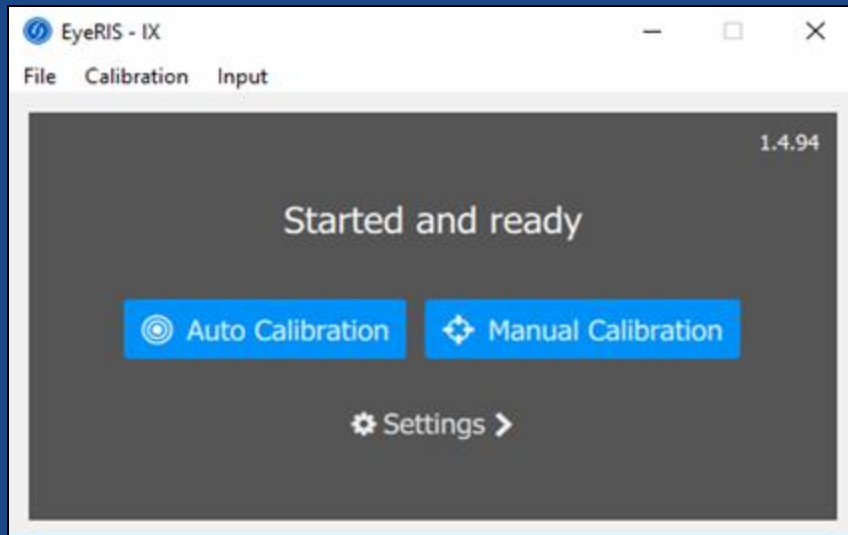

The device measures the area of the wall where it displays and then scan its surface to check quality, before making it interactive.

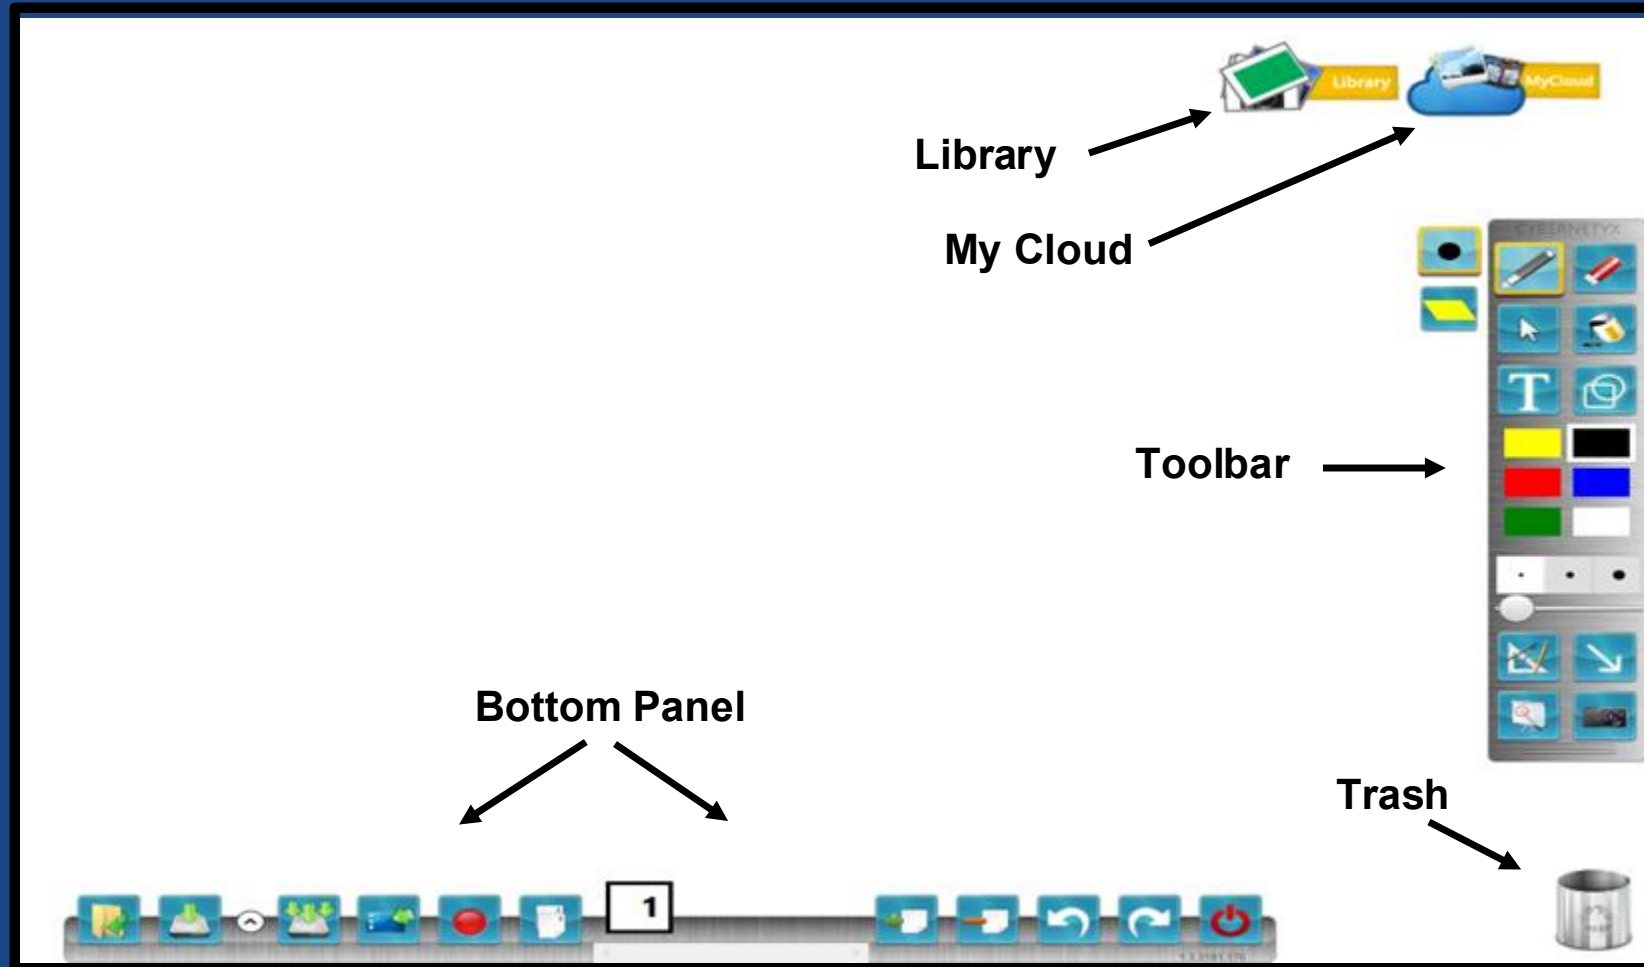

Manual Calibration Process

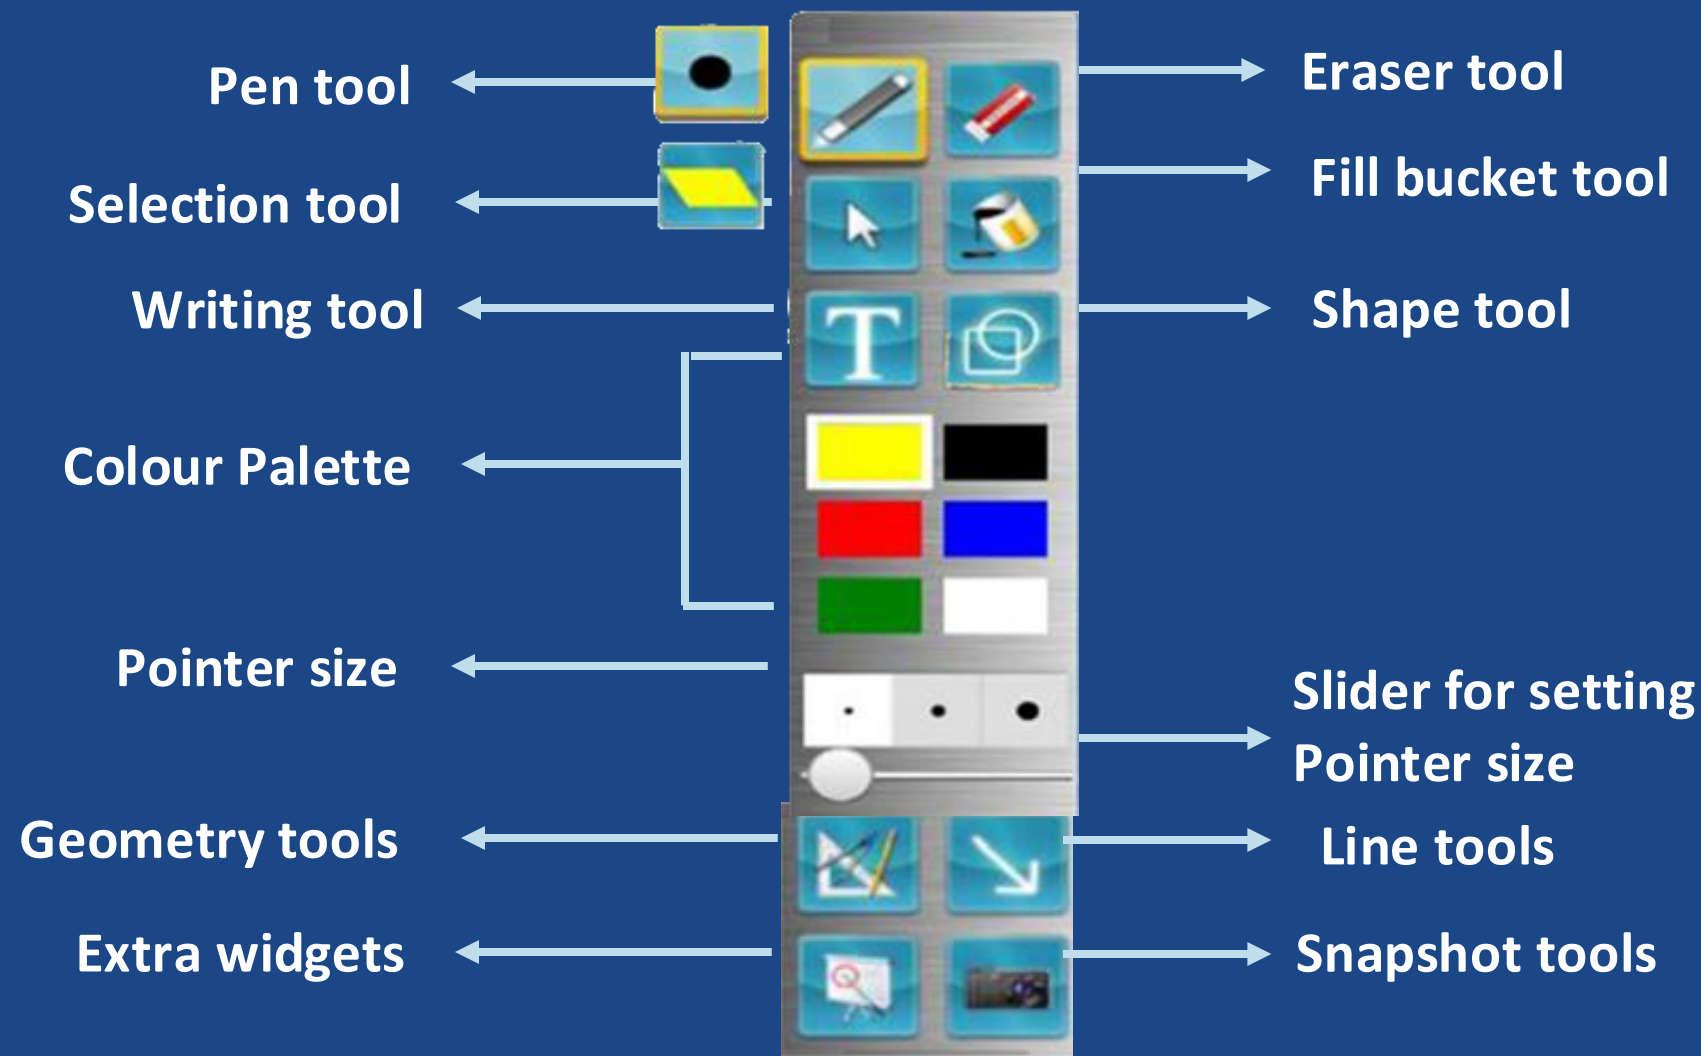

If the Device is unable to make the wall interactive through “Auto Calibration”, user should do the “Manual Calibration”.

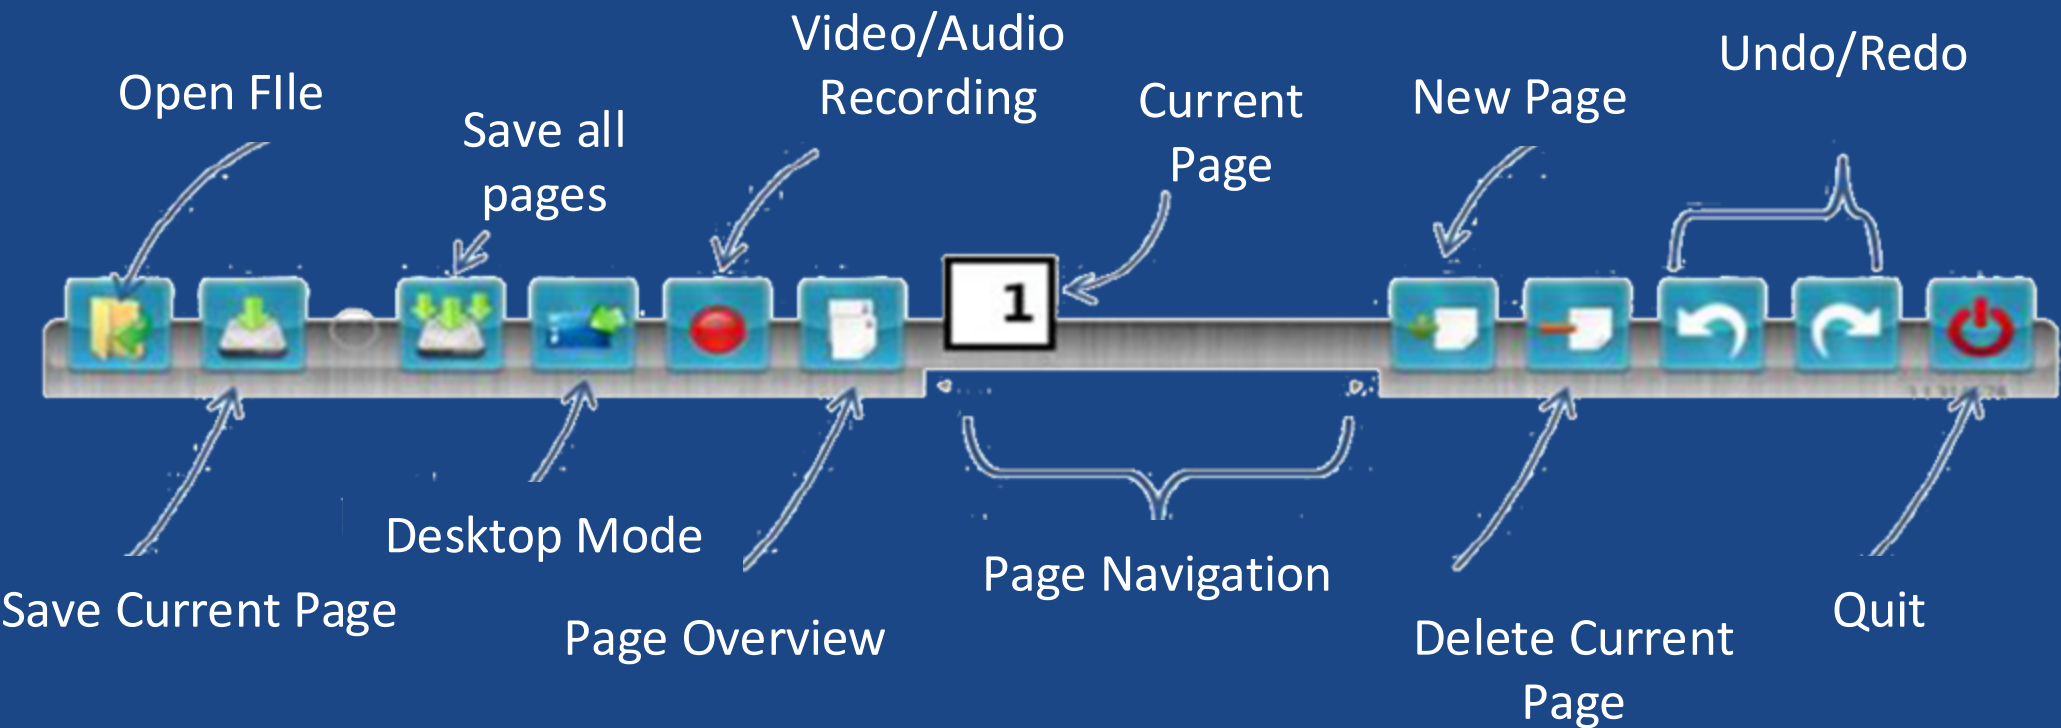

Choose “Manual Calibration” and tap on the red dots using stylus pen, as the system guides step-by-step.

Double-click the IntelliSpace icon, available on the Desktop to open the Interactive Board.

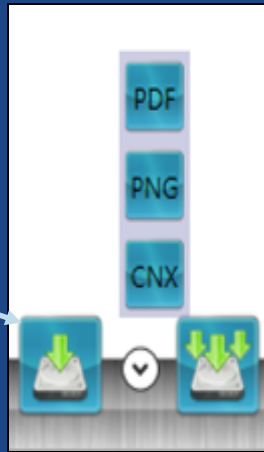

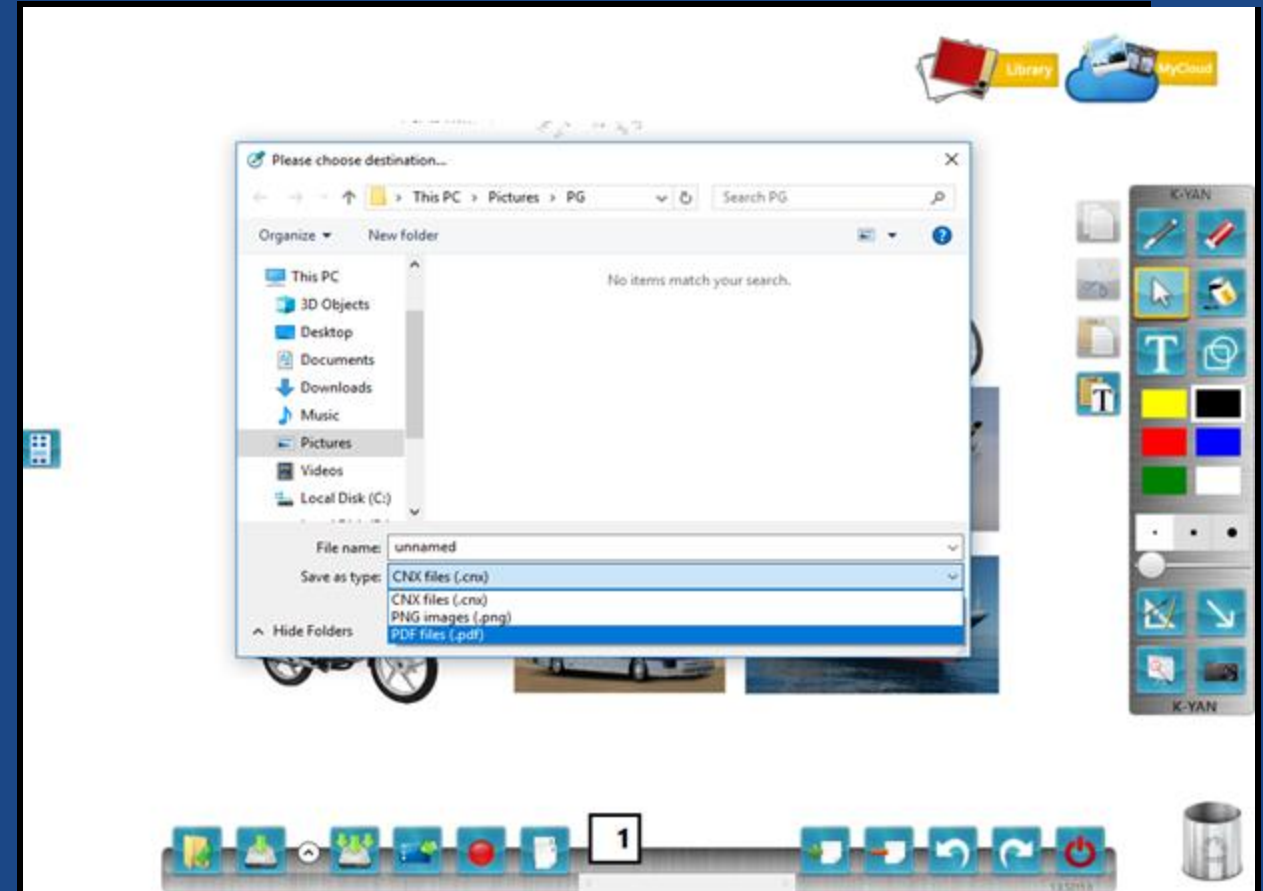

Saving Interactive Board content into NITI TARA storage

Click to save
current page
only.

Click to save
all page.

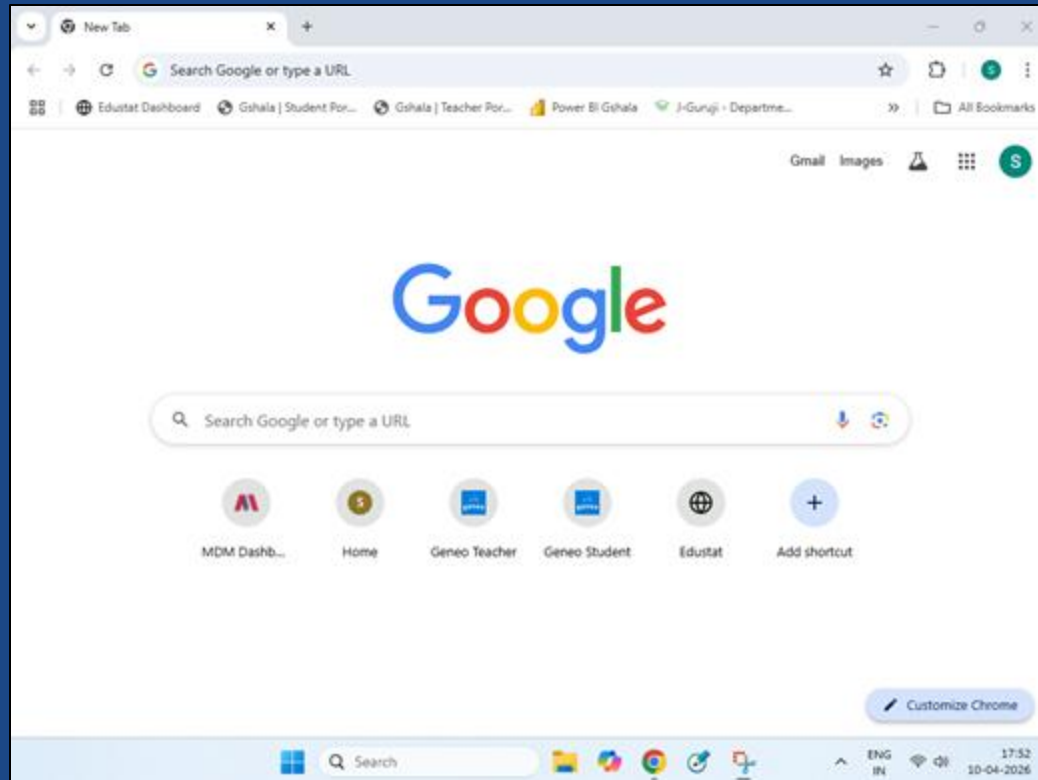

- Interactive board content can be saved as PDF, PNG (Image) or CNX format.

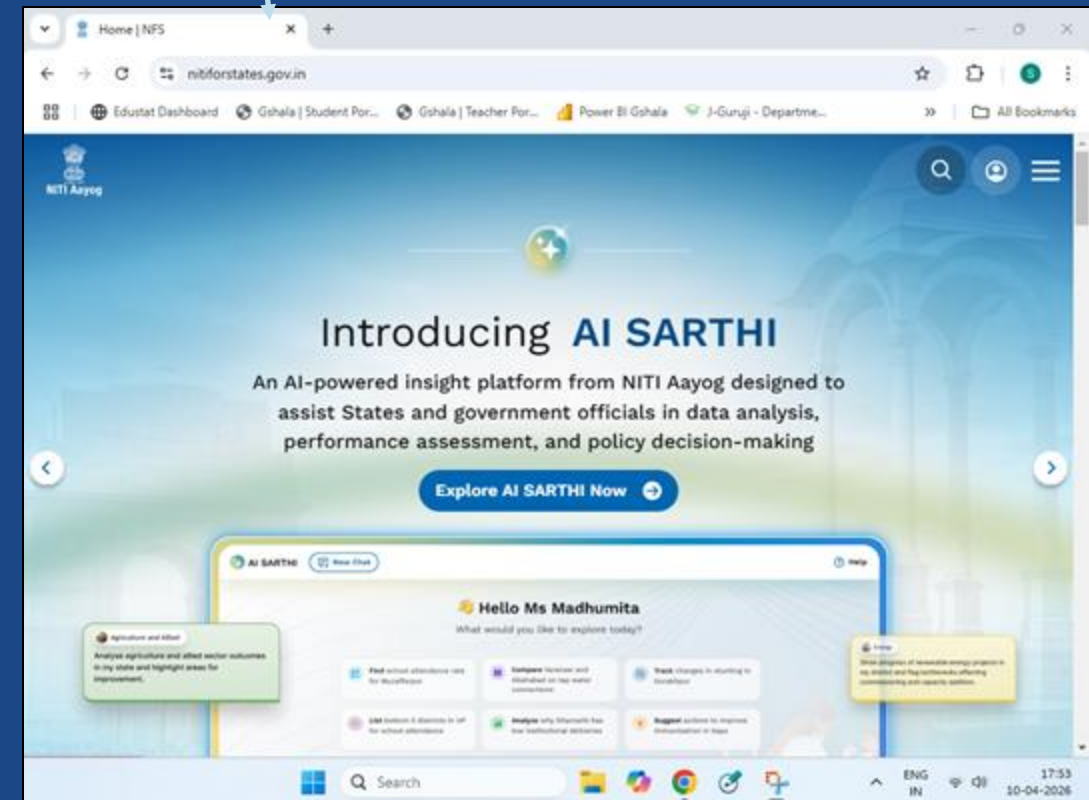

- CNX format is used when the user needs to add something later within the saved content.

Connecting NITI TARA to Internet

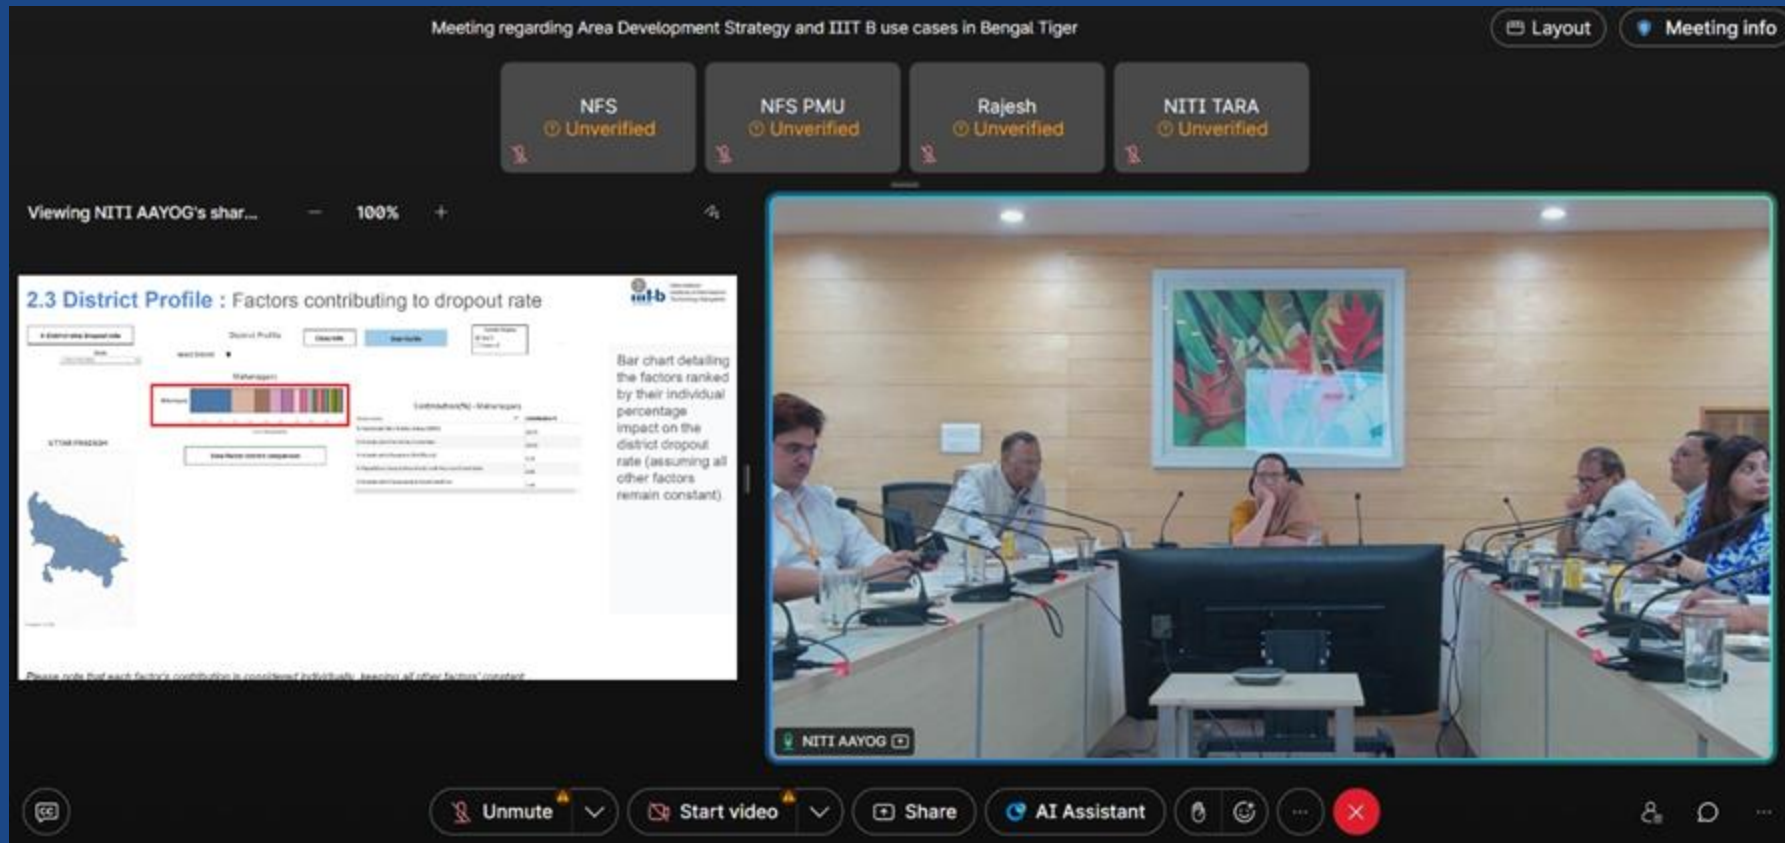

Type the Website address on the Address bar and press Enter key.

It provides SIM-based connectivity. Click on Web Browser icon available on the Taskbar.

2.3 District Profile : Factors contributing to dropout rate

Bar chart detailing the factors ranked by their individual percentage impact on the district dropout rate (assuming all other factors remain constant).

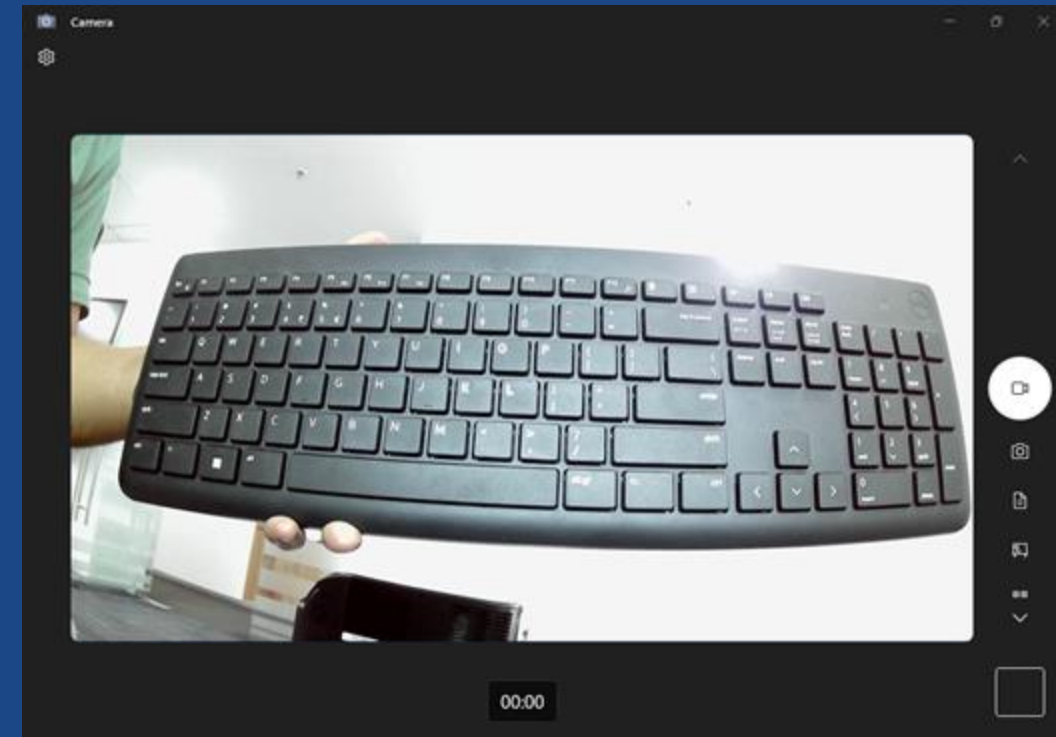

Unmute Start video Share AI Assistant

NITI TARA helps conducting online meeting for blocks and districts to connect remotely. Officers can use Teams, Zoom, Google Meet or any other Government meeting platform to connect.

Create your own Video Content in NITI TARA

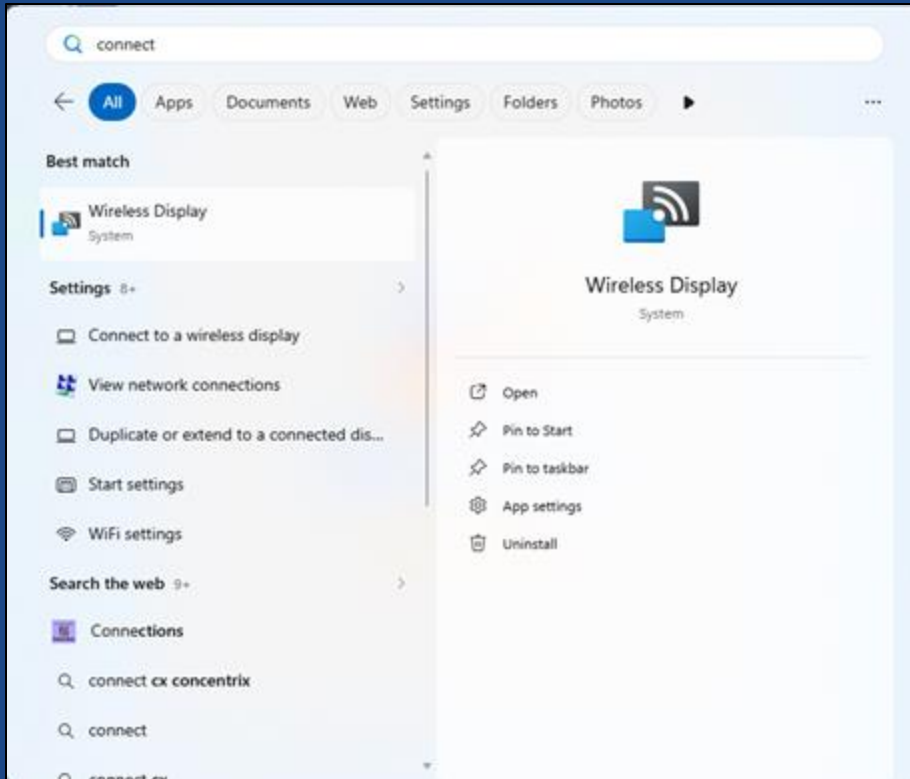

Step 1: Click on Start button and search for **Camera** application.

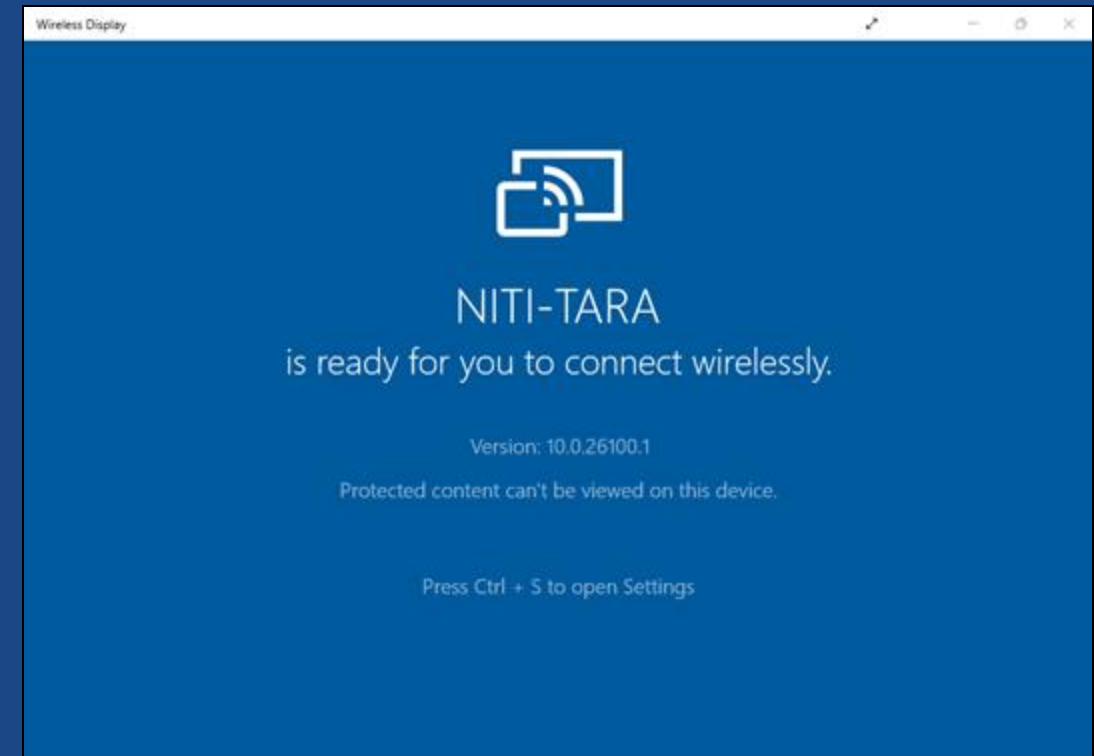

Step 2: Sit in front of the webcam at the back and click on video icon to start recording. Stop the recording when done. File is saved under **Pictures → Camera Roll** folder as MP4.

Casting Smartphone Content on the Projection Area

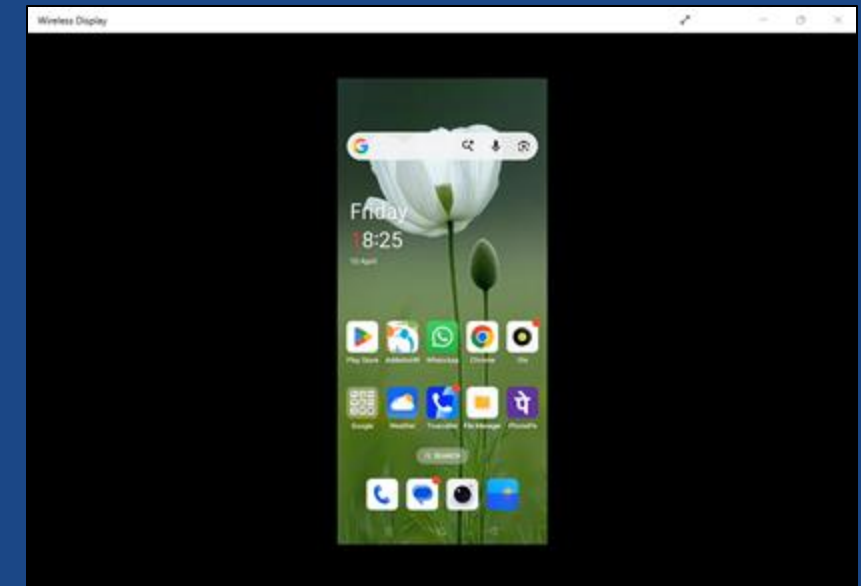

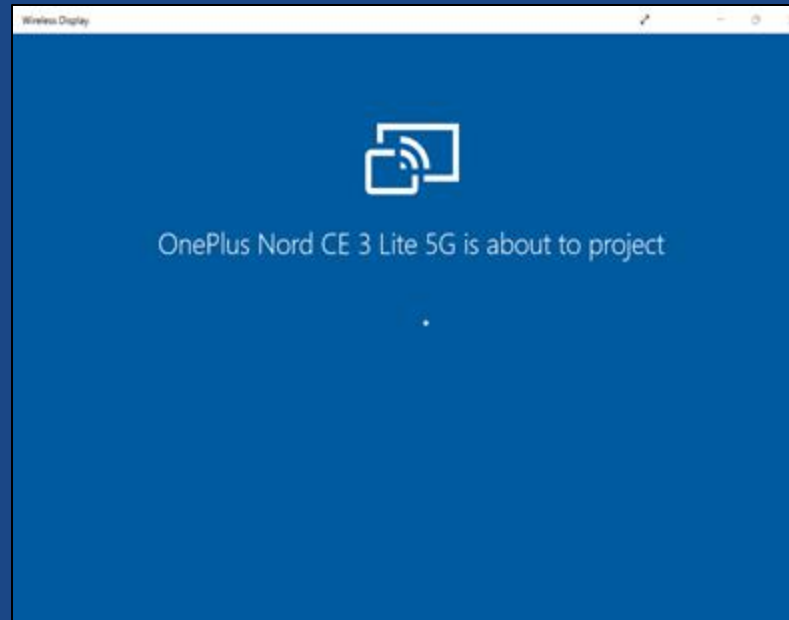

Step 1: Click on the Start button and search for Connect / Wireless Display.

Step 2: NITI TARA is ready to connect wirelessly. Turn Wifi and Bluetooth of your Smartphone ON.

Casting Smartphone Content on the Projection Area

Step 3: Connect your Smartphone using same wifi. Open Cast / Screencast / Smart Cast option on your Smartphone.

Step 4: Choose NITI TARA from the device found. It will connect and display the smartphone content on the projection area.

Annexure 2

**Program Overview: SSM,
NITI For States Platform, ABP-ADP and the
Viskit Bharat Strategy Room**

- State Support Mission is an umbrella initiative by NITI Aayog aimed at fostering structured and institutionalized engagement with States and Union Territories.
- Its primary objective is to assist States in achieving their socioeconomic goals by 2047.
- The mission has been strategically designed to support States/UTs in developing a roadmap aligned with national priorities and their core strengths.

NITI for States (NFS)

- The “NITI for States” platform was conceptualised under the State Support Mission of NITI Aayog to strengthen structured and institutionalised engagement with States and Union Territories in line with the vision of Viksit Bharat 2047.
- The platform was developed to support evidence-based governance by enabling data-driven decision making, strengthening monitoring and evaluation systems, and facilitating cross-learning through sharing of best governance and policy practices across states

Aspirational Districts and Blocks Program

- The Aspirational Districts Programme (ADP), launched by NITI Aayog in 2018, focuses on improving development outcomes in underperforming districts through data-driven governance, real-time monitoring and targeted interventions across key sectors.
- The Aspirational Blocks Programme (ABP), launched in 2023, extends the same approach to the block level to strengthen last-mile delivery and identify hyperlocal development gaps.
- NFS, ADP and ABP together form the foundation of “NITI Tara” — a decision-support and analytics platform that enables states, districts and blocks to identify key development challenges, analyse influencing factors and support targeted policy interventions through data visualisation and insights.

State wise Number of Districts and Blocks under NITI for States Programmes

484 blocks of 321 districts across country will be covered under this project.

State Name	No. of Districts	Total No. of Blocks
Andaman And Nicobar Islands	1	2
Andhra Pradesh	7	15
Arunachal Pradesh	5	5

Detailed View

0% of people find this useful. Do you?

State: **ANDHRA PRADESH**

District: **Multiple**

Cross Cutting Themes: **Gender & Social Inclusion**

Best Practice

In 2016, Andhra Pradesh established a 14-member Assessment Cell within the State Council of Educational Research and Training (SCERT) to administer standardized, quality assessments at the State level. The Assessment Cell implemented several key interventions, including:

- Academic Standards Mapping: Questions were mapped to academic standards, providing a broader categorization than learning outcomes. Each standard was assigned a weight, guiding the creation of questions.
- Question Review: The Assessment Cell reviewed questions to ensure alignment with academic standards and assessed the phrasing of procedural and conceptual questions, enhancing assessment quality.
- Remediation Programs: Learning enhancement programs were integrated into the formal schooling system to address learning gaps quickly and effectively. These programs became a part of regular school hours, ensuring teacher and student attendance.
- Centralized Learning Content: The State centralized the production of teacher handbooks and student workbooks with specific remediation content, allowing for strategic choices and expert input at the State level.
- Student Grouping: Students were grouped based on their learning levels, and teachers were assigned to each group, allowing focused attention on students' specific learning needs.
- Continuous Remediation: Remediation was conducted continuously throughout the academic year, enabling consistent bridging of learning gaps.

Beneficiaries and Impact

After the implementation of the project:

- The beneficiaries of these interventions were both students and teachers. Steady improvements were observed in student learning outcomes, particularly in State assessments. These interventions helped bridge the learning gap and improved student performance across subjects and grades. Additionally, teachers benefited from concrete guidance through scripted handbooks, enhancing their ability to support students effectively.

Key Learnings and Takeaways

The project's key learnings and takeaways are:

- Program Placement: Integrating remediation programs into regular school hours is crucial for impact, focus, and scalability.
- Learning Content: Centralized production of learning materials ensures consistent usage and quality.
- Student Grouping: Grouping students based on learning levels allowed teachers to provide targeted support.

Knowledge → Data → Data Profiles

The picture shows various developmental progress of Education sector of state Andhra Pradesh and comparison with the progress of the whole country.

Knowledge → Data → Data Catalogue

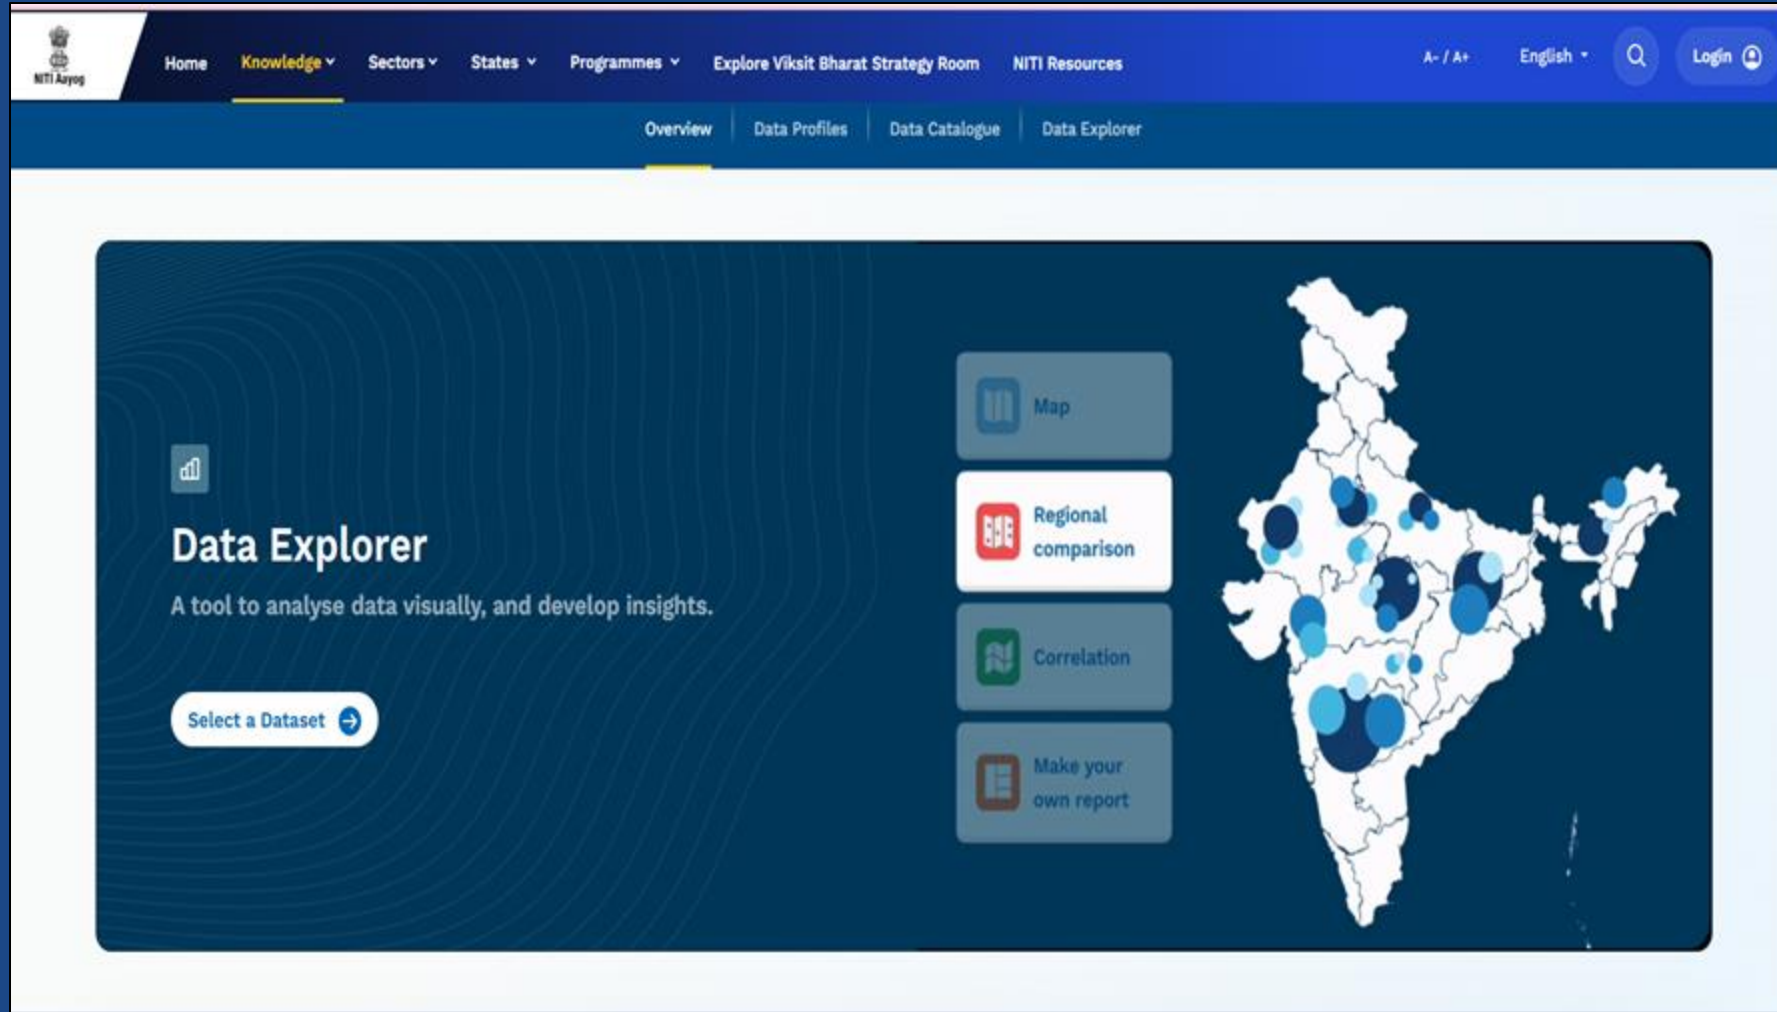

Data Catalogue is a repository of datasets comprising public, government and academic data.

The screenshot shows the NITI Aayog Data Catalogue homepage. The top navigation bar includes links for Home, Knowledge (highlighted), Sectors, States, Programmes, Explore Viksit Bharat Strategy Room, and NITI Resources. Below this is a secondary navigation bar with Overview, Data Profiles, Data Catalogue (highlighted), and Data Explorer. The main heading is "Data Catalogue" with a subtitle "A repository of datasets comprising public, government and academic data". A button labeled "Explore Datasets" is in the top right. Three featured dataset cards are displayed: "National Family Health Survey (NFHS)" with a "Health & Nutrition" tag, "Rural Health Statistics (RHS)" with a "Health & Nutrition" tag, and "Health Management Information System (HMIS)" with a "Health & Nutrition" tag. Each card includes a brief description and an "Explore More" link.

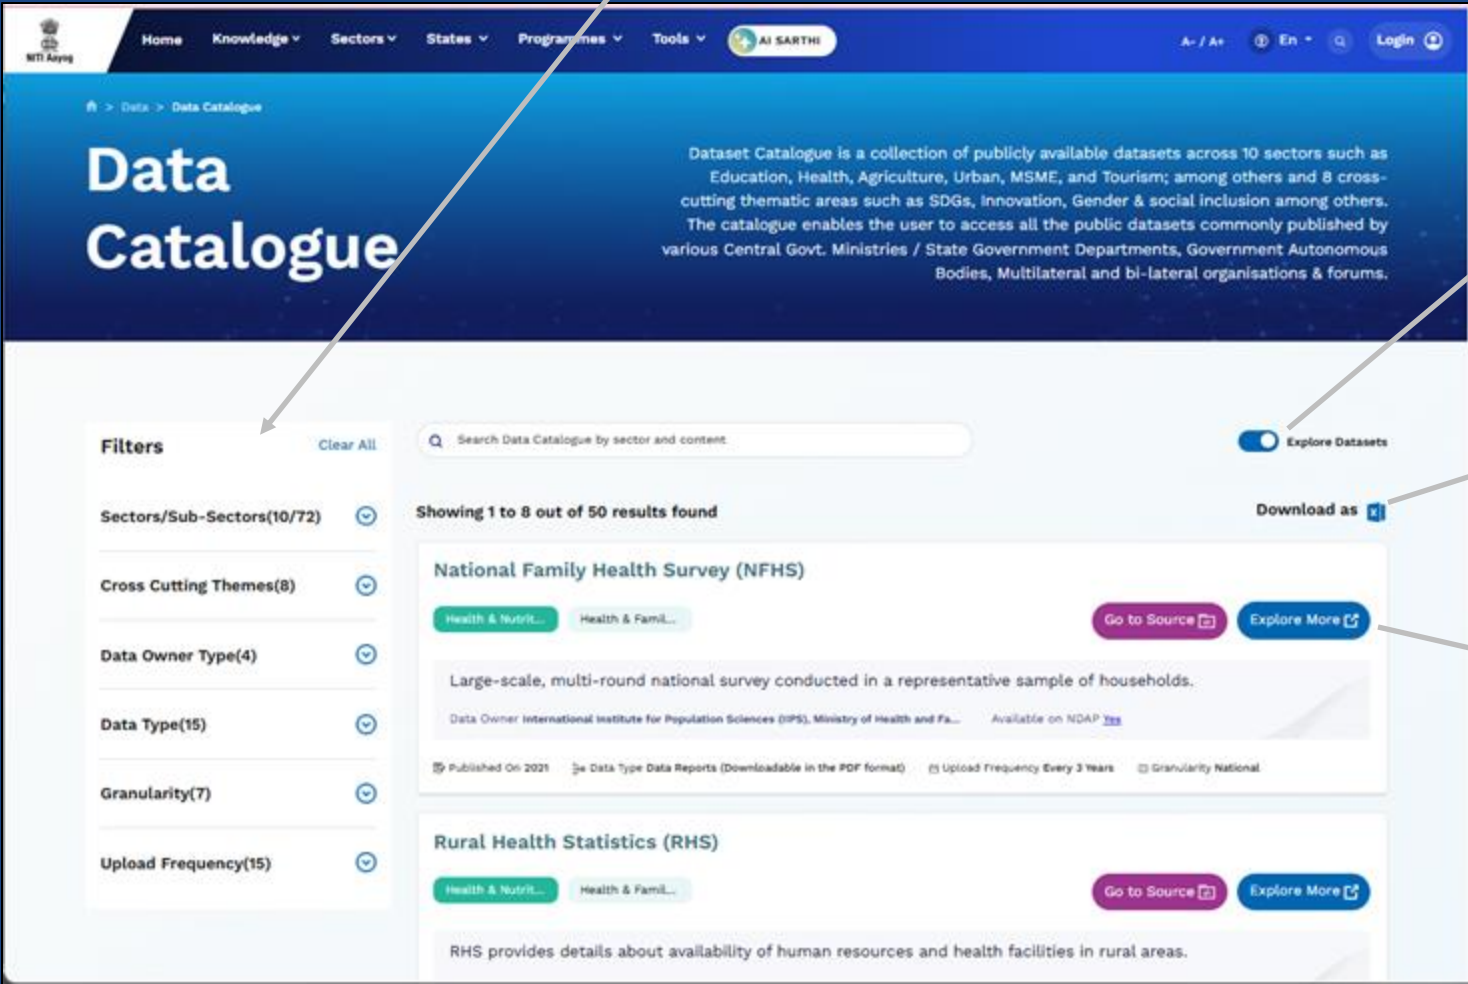

Knowledge → Data → Data Explorer

Providing 24x7 Academic Support to School Students

This use case identifies solution pathways to solve declining learning outcomes and high dropouts at the secondary school level. The Sampurna Shiksha Kavach intervention provides 1:1 doubt clearing and 24x7 support through an application and existing ICT used for education in the district. This led to a 10% increase in overall pass rate and a 12% increase in Class 12 Mathematics performance for children enrolled in the SSK intervention.

AI SARTHI

New Chat

Login

Suggest actions to reduce dropouts in Jharkhand schools.

1. Overview

Strengthening school infrastructure, consolidating sub-scale institutions, and enhancing community engagement are essential to reducing dropout rates and improving learning outcomes in Jharkhand.

2. Key Details

- **Current Gaps:** In 2018, 45% of schools in Jharkhand had fewer than 60 students, and 65% had only 1 or 2 teachers. Furthermore, secondary dropout rates have seen an upward trend; for girls, the rate rose from 10.3% in 2021-22 to 15.1% in 2023-24, while for boys, it increased from 10.3% to 15.2% in the same period (*Unified District Information System for Education (UDISE)*).

Ask your query

- **Operational Constraints:** Large numbers of sub-scale schools make visit-based monitoring difficult for

AI SARTHI – An AI-powered Insight Platform

Sample prompts that can help District Magistrates leverage data-driven insights and take actionable decisions for their districts

- 1 How does Gaya district perform in terms of the proportion of the population living in households using improved drinking water sources and improved sanitation facilities compared to the state average of Bihar? What targeted interventions can be implemented to bridge the gaps?
- 2 How can the net sown area as a percentage of the total geographical area in Ujjain be increased while leveraging Farmer Producer Organizations (FPOs) and Primary Agricultural Credit Societies (PACS)?
- 3 What do the rates of anaemia and severe wasting among children under 5 in Kolkata indicate about child health and nutrition challenges, and what targeted strategies can help improve these outcomes?
- 4 As the District Magistrate of Lucknow, how can I determine whether the district should prioritize building new schools or improving existing school infrastructure? Additionally, can improved road connectivity contribute to higher school enrollment and accessibility outcomes?

An example of how we can use AI Sarthi for district-level data analysis

How does Gaya district perform in terms of the proportion of the population living in households using improved drinking water sources and improved sanitation facilities compared to the state average of Bihar? What targeted interventions can be implemented to bridge the gaps

1. Overview

Gaya district significantly outperforms the Bihar state average in improved drinking water source coverage but lags behind the state average in the use of improved sanitation facilities.

2. Key Details

The following table compares the proportion of the population with access to improved water and sanitation in Gaya versus the state average for Bihar based on *National Family Health Survey (NFHS-5)* | Ministry of Health and Family Welfare | Govt. of India.

Comparison Table:

District / Group	Improved Drinking Water Source (%)	Improved Sanitation Facility (%)	Gap Analysis
Gaya District	99.2%	44.4%	High Water Access; Low Sanitation
Bihar State	61.1%	49.4%	Moderate Water Access; Moderate Sanitation

3. Snapshot

Indicator	Gaya Value	Bihar Average	Difference
Improved Drinking Water Source	99.2%	61.1%	+38.1 percentage points
Improved Sanitation Facility	44.4%	49.4%	-5.0 percentage points

4. Key Takeaways

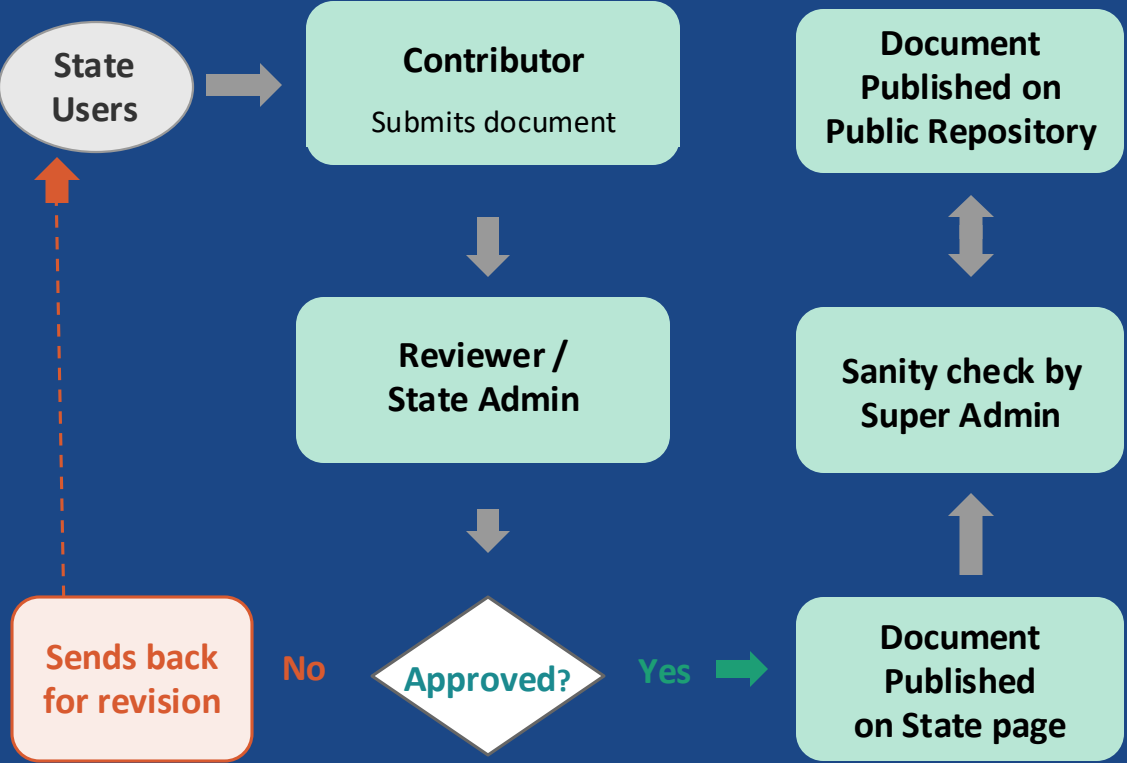

- **Drinking Water Excellence:** Gaya has achieved near-universal coverage (99.2%) for improved drinking water sources, exceeding the state average by over 38 percentage points. This indicates successful infrastructure deployment for water supply.
- **Sanitation Deficit:** Despite high water access, Gaya's sanitation coverage (44.4%) is lower than the state average (49.4%), highlighting a 5-percentage point gap that requires administrative focus.

**Area Development Strategy (ADS) Tool -
Features, How to use, Value Add**

Area Development Strategy Tool - About

Enable planning using integrated PM GatiShakti layers from 47 ministries to support evidence-based infrastructure and investment decisions.

- Visualizes key development indicators on a map
- Shows multiple assets together in one simple view for planning
- **Highlights high-need and underperforming areas**
- **Identifies gaps** in access and service delivery
- ADP & ABP Indicators mapped for performance review

Logins created for ADP district and ABP Block DM/DCs. Around 800+ login credentials have been created on the tool.

Form link for access issues (QR can also be added if required redirecting to the google form)

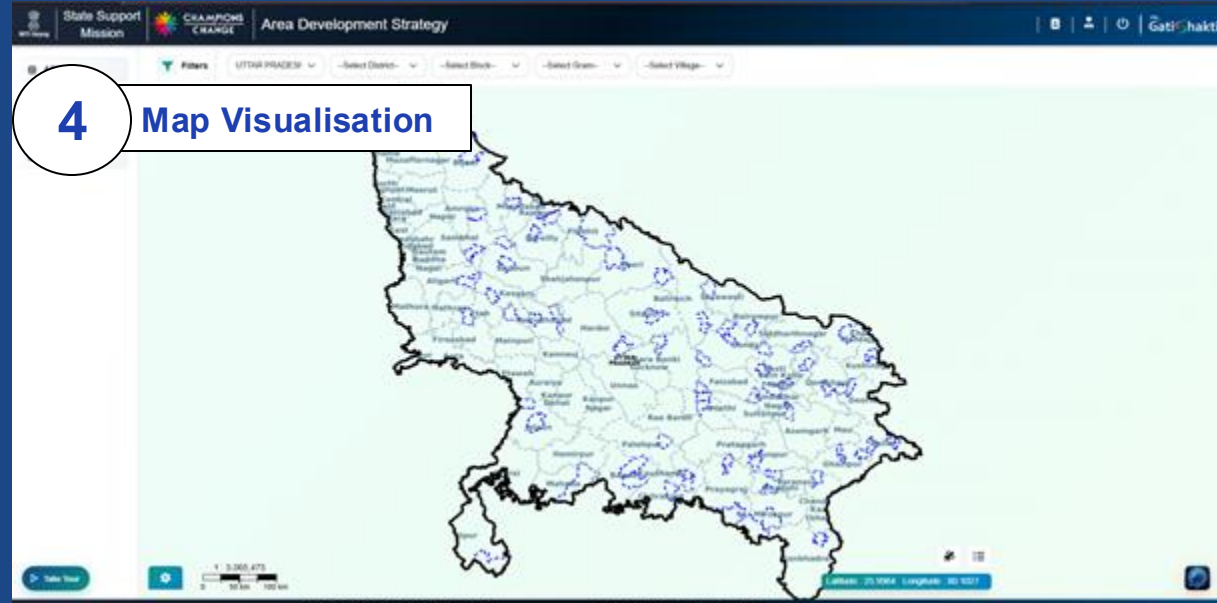

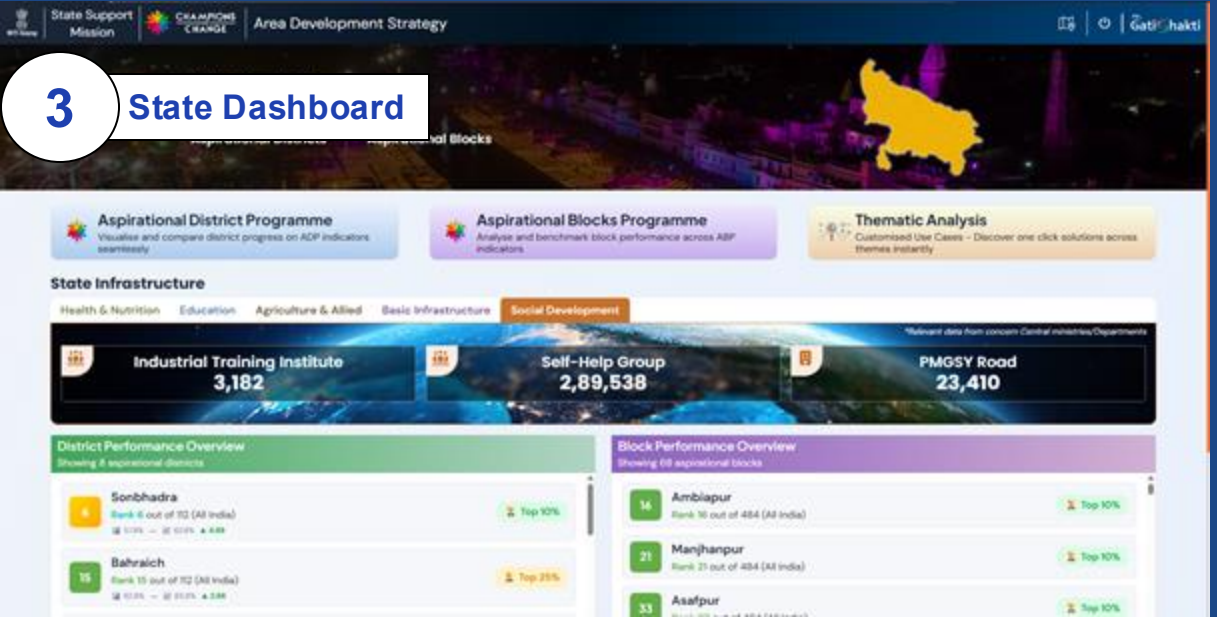

Overview

- All ADP, ABP KPIs mapped and available for analysis (107)
- One-click solutions for cross-sector problem statements (12).
Example: Site suitability for Amrit Sarovar based on water fluctuations.
- Access to all PM Gati Shakti layers via the tool.

Features

- Login module for NIC and Gov IDs. Logins for DM/DCs in Aspirational districts/blocks are pre-created.
- 36 State and UT specific dashboards mapped to district and block logins.
- Feedback submission via integrated chatbot feature.

Area Development Strategy Tool - Various Stages/Pages

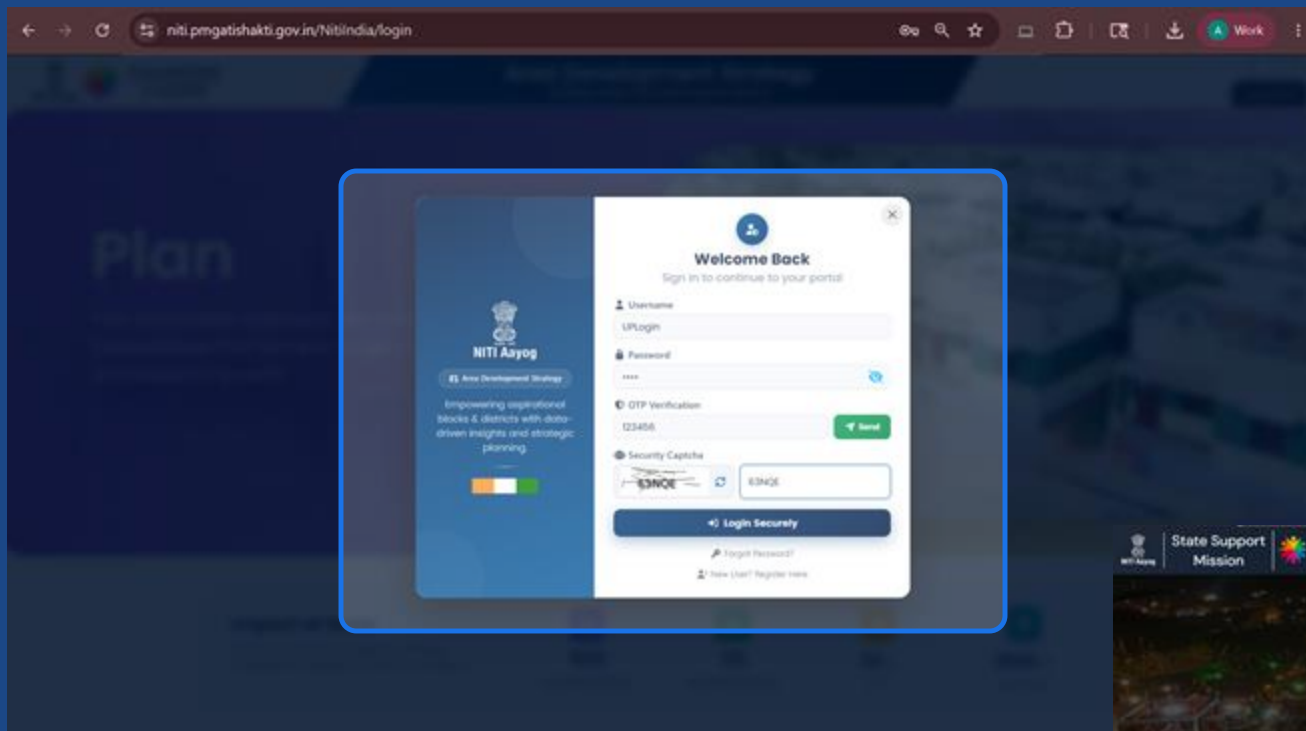

Programme: ADP

Theme: Basic Infrastructure

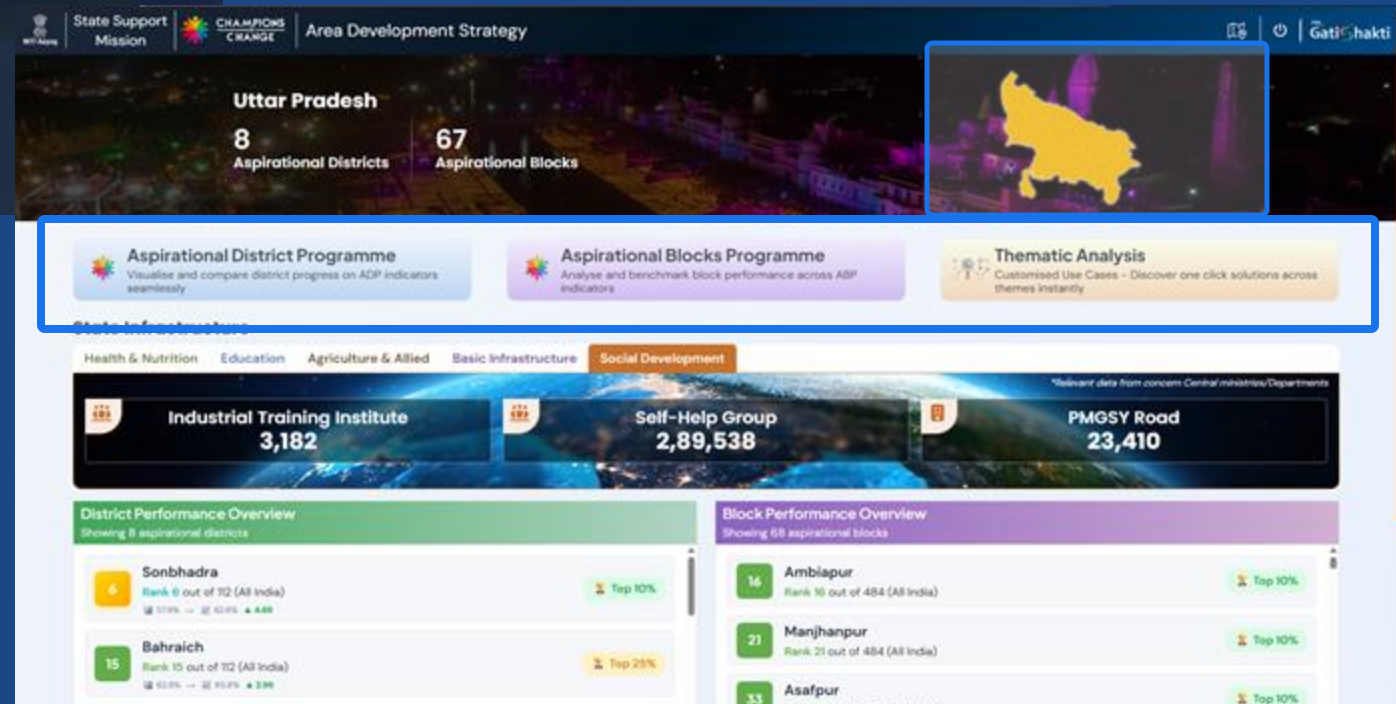

Indicator (Problem Statement): Providing BharatNet connectivity in Gram Panchayats

Let us login to the Uttar Pradesh State level login and try to solve this problem statement for the state

again that the lives of people who do not know the noble initiative of one person.

I appreciate all those who have done such noble deeds. During the Amrit Mahotsav of the independence of my first countrymen, I had said Panch Pranon Ki Bhaag from the Red Fort, this is one of them.

Freedom from the mentality of slavery and the country has started giving importance to things from the culture of slavery. Our Sansthi Bhavan has also taken an important step in this direction.

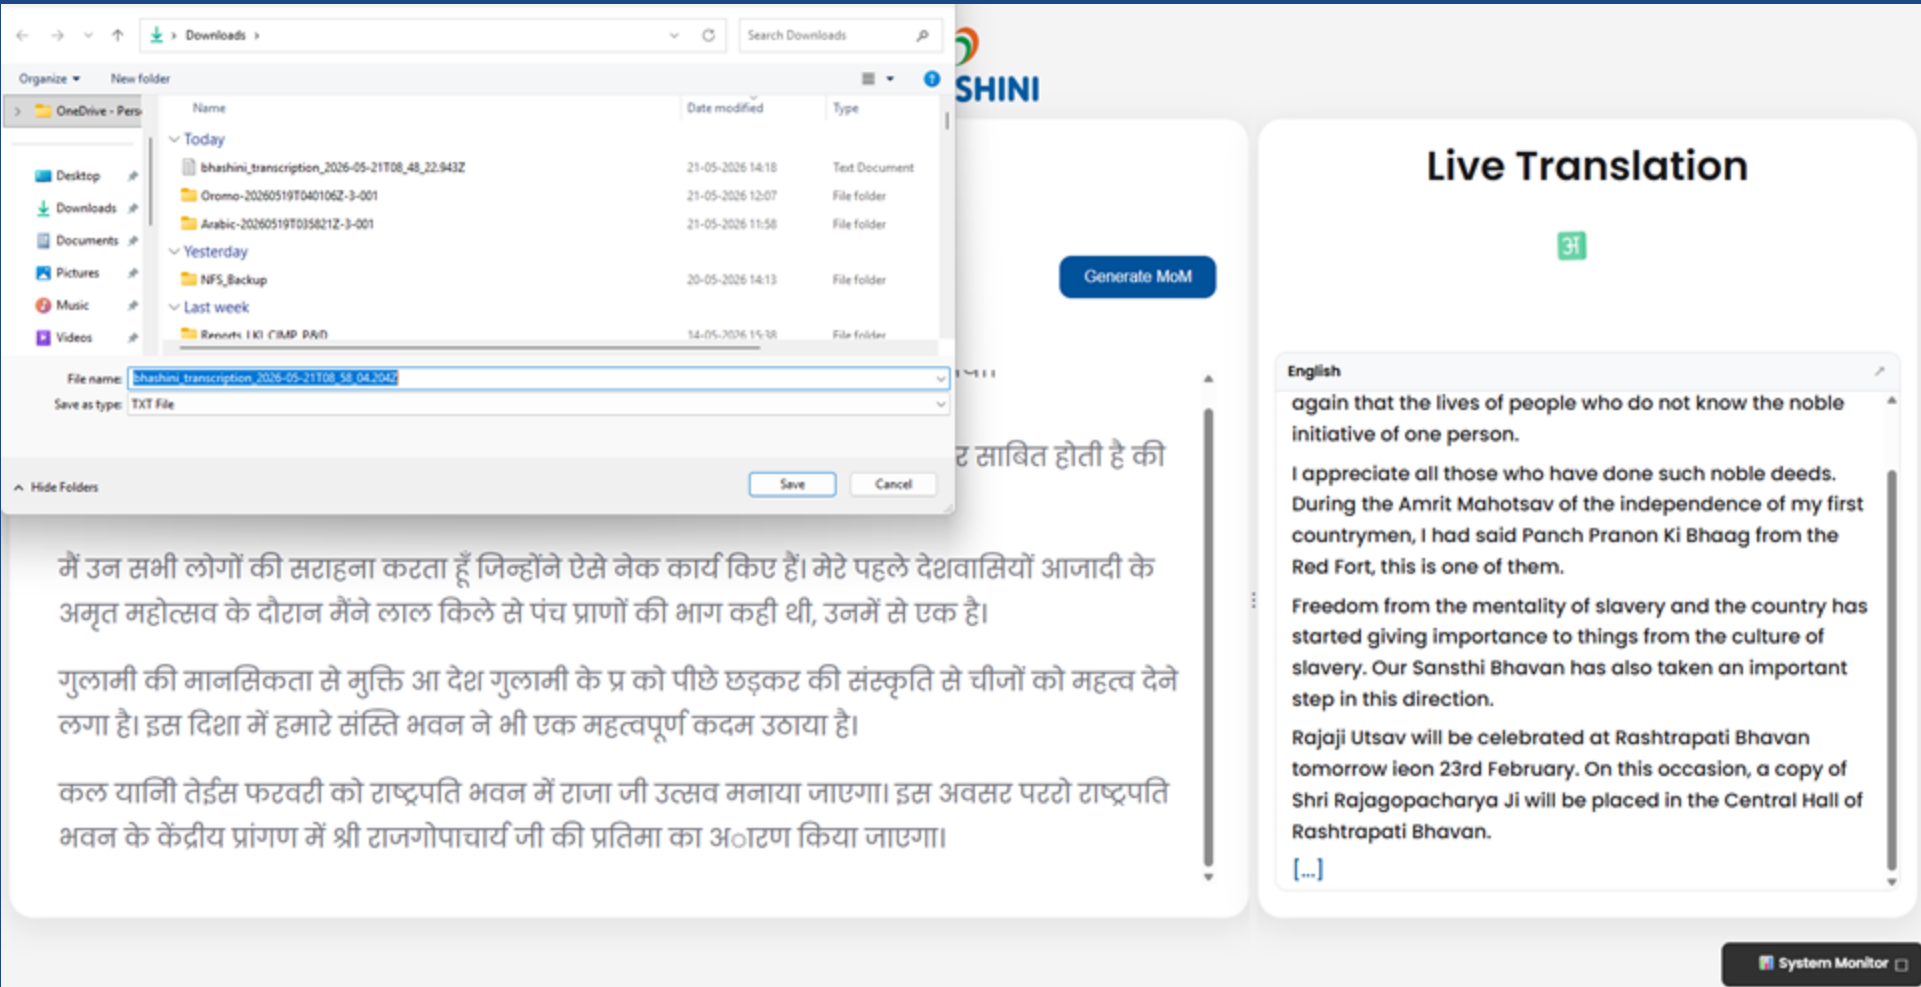

Rajaji Utsav will be celebrated at Rashtrapati Bhavan tomorrow ieon 23rd February. On this occasion, a copy of Shri Rajagopacharya Ji will be placed in the Central Hall of Rashtrapati Bhavan.

Annexure 7

Use Cases of NITI TARA device

1

Persona: District Magistrate

Programme: Aspirational Districts Programme (Education Sector)

Task: Monitor compliance of elementary schools with RTE-mandated Pupil-Teacher Ratio

Steps:

1. Open the [Champions of Change](#) portal and check the district's **overall monthly performance score**
2. Go to the **Education sector** and review the indicator **"Elementary schools complying with RTE-specified Pupil-Teacher Ratio"**
3. Identify **top-performing districts** for this indicator
4. Review **best practices** adopted by these districts
5. Select **replicable interventions** and plan implementation in your district

1

Persona: Newly appointed District Magistrate Programme: District Overview

Task: To get a district overview for multiple sectors

Steps:

1. Open the [NITI for States portal](#) and go to **Data → District Profile**
2. Select your **State**, **District**, and **Sector** to view key indicators and performance data
3. To understand ongoing priorities and discussions, review past meeting records on the **SMRITI** (meeting transcripts and summaries)

1

Persona: Block Officer

Programme: Aspirational Block Programme

Task: Monitor availability of functional toilets in operational Anganwadi Centres and prioritise interventions

Steps:

1. Select **ABP → Health & Nutrition** and choose the indicator “% of operational Anganwadi Centres with functional toilets”
2. Apply range filters (0–50%, 50–75%, 75–100%) to assess block-wise performance
3. Plot Anganwadi Centres and JJM assets on the map
4. Filter to identify Anganwadis without toilet facilities
5. Use population and proximity tools to prioritise locations for intervention

For guidance on navigating the NFS portal, see [Slide 88](#)
