1. About NITI TARA

1.1 What is NITI TARA

A portable, internet-enabled, all-in-one governance solution that brings data, planning tools, and collaborative review capabilities directly to districts and blocks.

Device Capabilities

1. **All-in-One Device:** Combines a computer, projector, display, audio system & more in a single compact unit
2. **Built for Collaboration:** Supports web conferencing with an in-built camera & microphones
3. **Turns any wall into a touch-enabled interactive screen:** No separate meeting room needed
4. **Smart & Connected:** Machine-to-Machine (M2M) tech for live data sync and automatic software updates; secure access via whitelisted websites
5. **Always Online:** SIM-based connectivity, plus Wi-Fi and Bluetooth support
6. **Large-Format Projection:** Projects up to 300-inch high-resolution visuals

1.2 What to Explore

1. **Dashboard to monitor Aspirational District Programme/ Aspirational Block Programme (ADP/ABP):** Using quarterly updated KPIs, the dashboard enables monitoring of Aspirational Districts and Blocks as well as departmental performance
2. **Area Development Strategy:** 1600+ PM Gati Shakti platform layers in Area Development Strategy tool powered by BISAG-N that can be leveraged
3. **NITI for States Knowledge Access:** Access to the NITI for States portal including 7500+ best practices, 5000+ policy resources, 1300+ data profiles including State, District and block profiles
4. **Viksit Bharat Strategy Room (VBSR) Curated Sectoral Insights:** Access to curated sectoral analysis (75+ focus areas) and 20+ use cases in the VBSR
5. **AI Enabled Meeting Minutes:** AI enabled multi-lingual minute taking software for meeting documentation powered through Bhashini, MEITY

1.3 Why Use NITI TARA

1. Conduct **Review Meetings** for Aspirational District & Block performance
2. **Identify gaps** using Key Performance Indicators and through comparative data profiles
3. Learn from experiences and solutions across the country, across similar blocks/districts by exploring **best practices for replication in your district**
4. Explain progress to community visually
5. Build District and Block Area Development **Strategies using geospatial layers** across sectors
6. Use **sectoral insights** and visualisations to present in high level meetings
7. **AI-enabled** generation of **minutes of the meeting** and action items

2. Roles, Responsibilities, Custodianship & Usage Protocols

2.1 NITI Aayog

Apex Level:

NITI Aayog - Program Authority

1. **Program Management & Strategic Oversight:** Overall management and strategic guidance for implementation of the NITI TARA initiative across districts and blocks.
2. **Funding & Administrative Oversight:** Providing funding support and overseeing administrative coordination for deployment, training and operational activities.
3. **Content Ownership & Governance Tools:** Ownership and curation of dashboards, governance applications, knowledge resources, sectoral content and analytical tools available on NITI TARA.
4. **Monitoring & Implementation Tracking:** Monitoring deployment progress, usage analytics, adoption levels and implementation status across locations.
5. **Coordination & Capacity Building Support:** Coordination with State Governments, District Administrations and implementation partners to support rollout, training and institutional adoption.

2.2 Implementation Partner:

EdCIL (India) Ltd. (a PSU under Ministry of Education)

1. Conduct **pre-installation surveys** at all deployment locations, including:
 - Site visits and readiness assessment
 - Collection of district/block nodal officer details through survey forms
 - Verification of office address and installation location
 - Assessment and documentation of existing infrastructure required to support the device
2. **Deployment, installation,** commissioning and activation of NITI TARA devices at designated district and block locations.
3. Conduct **on-ground training** and handholding sessions for district and block officers on:
 - Device operations and features
 - Governance tools and applications available on NITI TARA as well as content navigation and dashboard usage
 - Practical day-to-day governance applications, review meetings, planning and monitoring use cases
4. Customer Support
 - **Dedicated Helpdesk:** 24X7 toll-free number, email support and WhatsApp integration for rapid issue logging and assistance.
 - **Multi-tier Escalation Matrix:** Response escalation from frontline support to engineering teams and national technical leads with specific response timelines
 - **Onsite Resolution:** Wherever required, technicians visit the site for repair/replacement in line with warranty/AMC terms.

- **Preventive Maintenance Schedule:** Includes daily, weekly, and monthly upkeep steps- minimizing device downtime and maximizing usability in rural/remote conditions.
 - **Quarterly Maintenance Checks** are included during the warranty period.
5. Further, EdCIL will maintain a **centralised device tracking and monitoring dashboard**, accessible to NITI Aayog, which will log usage frequency, issue history, training sessions conducted, and preventive maintenance status for each unit. This will help assess block-level adoption and ensure transparency in usage and upkeep.

2.3 Custodianship, Usage Protocol and Safeguards

a. Custodian Officer:

- i. The **Nodal Officer nominated by the DM/DC** will be designated as the **official custodian** of the device.
- ii. The custodian (Nodal Officer) will be responsible for logging usage, upkeep, reporting technical issues and coordinating training needs.
- iii. **Change of Nodal officer:** In the event of transfer /change of nodal officer, name, designation and contact details of new nodal officer as designated by DM/DC may be communicated to NITI Aayog by email to nfs-niti@gov.in with subject line “change of nodal officer for NITI TARA”

b. Usage Protocol:

- i. The device shall be used **primarily for training, visualisation, planning discussions and experience-sharing workshops** under the Aspirational Districts/ Blocks Programme and related government initiatives.
- ii. It may be taken to **meeting rooms, field demonstration sites or community interaction venues within the district/block** as needed, provided proper care and logging is ensured.
- iii. Movement outside the district/block premises should be permitted only with **written approval of the DM**, and with **proper entry in a movement logbook**.

c. Storage and Security

- i. When not in use, the device must be stored in a **designated secure cabinet or locked storage area within the office of Nodal officer/BDO office/District Headquarters**.
- ii. The device should be placed in its protective carry case and powered down properly as per SOP before storing.

d. Incident Protocol

- i. In case of **theft**, the device will **not be eligible for free replacement**. The nodal officer must **file an FIR** and submit a copy to the District Administration and NITI Aayog.
- ii. Misuse, **unauthorised use, or unreported movement** outside block/district boundaries will be treated as a violation of protocol and may result in withdrawal of device support.

e. Safeguards against Misuse

- i. The device is **not to be used for non-government, private, or commercial purposes** under any circumstances.
- ii. Any damage, theft, or irregularity in usage must be **reported immediately by the nodal officer to the DM/DC** and noted in a logbook.

3. Installation & Setup

3.1 Pre-Installation Processes

3.1.1 Dispatch Process (Pre-Dispatch Controls & Compliance Framework)

The dispatch process follows a structured 2-stage compliance mechanism to ensure zero discrepancy and full traceability.

A. Device Serial Number Mapping & Allocation

- Before dispatch each device is assigned with Unique Serial Number (OEM Serial) & Internal Asset Code (Project Code)
- Serial numbers are mapped in the Central ERP/Asset Management System linked to the designated deployment location
- A Dispatch Allocation Sheet is generated containing the details including device Serial Number/ Destination address/ Consignee details/ Transport details/ Assigned Engineer. This sheet is digitally archived.

B. Quality Assurance (QA) Check

Each unit undergoes a structured Quality Assurance covering:

- Hardware Validation
- Software Validation
- Documentation Validation
- Packaging Integrity Inspection

3.1.2. Room Allocation & Readiness (Preferred)

A. Recommended Room Type

- District Review Room / Block office/ Meeting Room / Conference Hall
- Minimum carpet area: 300–350 sq ft
- Dedicated room, for regular usage while device is also portable

B. Environmental Requirements

- Dust-free environment
- Proper ventilation or air conditioning

C. Projection Wall Specifications

- Well conditioned white wall
- Recommended projection area: 100–120 inches
- Wall to be free from texture/gloss

D. Distance from Wall to NITI TARA

- Recommended 3 to 5 feet for a projection of 100–120 inches

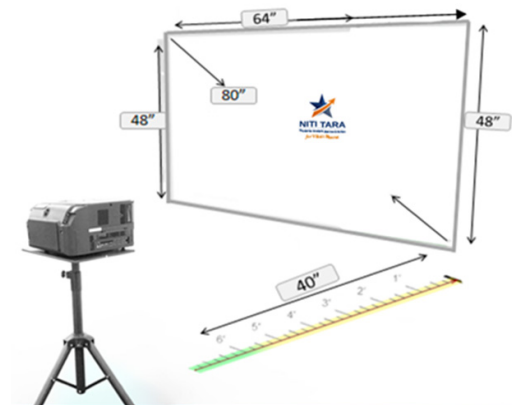

E. Electrical & Power Compliance

i. Power Socket Requirements

- Dedicated 6Amp Industrial socket
- Proper earthing mandatory
- Earth resistance < 1 ohm preferred
- Certified by local electrical engineer

ii. Backup Power

- UPS backup minimum: 30–60 minutes
- Recommended UPS capacity: 1 KVA
- In district HQ: Consider inverter/generator backup

3.2 Installation & Handover

3.2.1 Delivery Confirmation

Upon arrival at district/block location, the following structured acceptance process to be followed:

A. Physical Verification by District Nodal Officer

The designated nodal officer shall:

- Verify consignee details
- Match Delivery Chalan with shipment
- Count number of boxes
- Inspect for visible physical damage

If any discrepancy is observed:

- Immediate remark on delivery challan
- Photo documentation
- Escalation within 4 working hours

B. Serial Number Confirmation

Before acceptance:

- Check on the outer box for device serial number
- Match device serial number with Invoice

Serial number confirmation shall be:

- Recorded on Delivery Verification Form
- Digitally uploaded

C. Box Condition & Damage Report

A structured Box Condition Report shall include:

- Outer carton condition
- Seal integrity
- Accessory count verification (optional at this stage)
- Any transit damage

D. Delivery Acknowledgment

Upon satisfactory verification:

- District/Block/Nodal officer signs Delivery Acceptance Note (DAN)
- Date & time recorded
- Official seal affixed
- Soft copy shared with Central PMU

3.2.2 Asset Registration & Digital Governance

After delivery and prior to installation, the asset to be digitally registered for lifecycle tracking

A. Serial Number Entry in Central Dashboard

The following data fields shall be captured:

- Device Serial Number
- BIOS Serial (Bios is a program built into the computer that starts the system and checks that all hardware is working before loading the operating system)
- AC Address
- State
- District
- Block
- Installation Address
- Nodal Officer Details
- Date of Delivery
- Installation Status

B. Geo-Location Tagging

At the time of installation:

- Latitude & longitude captured via mobile app
- Geo-tagged installation photograph uploaded
- Auto-mapped on central dashboard

C. District/Block Mapping

Each device will be linked to State Code/ District Code/ Block Code/ Administrative hierarchy

D. Engineer Assignment Tagging

Post-registration, the device will be mapped to Assigned Regional Engineer/ Zonal Technical Lead. This ensures accountability and Service Level Agreement (SLA) adherence.

3.3 Capacity Building

The Training & Capacity Building framework is designed to ensure effective adoption, optimal utilization, sustainability, and institutional ownership of NITI TARA at District and Block levels.

The framework follows a structured Pre-Training → Training → Post-Training Reinforcement model aligned with governance standards and measurable outcomes.

1. Training Categories

User Type	Target Audience	Objective
District Officers	District Magistrate, CEOs, Department Heads	Strategic utilization & data-driven review
Block Officers	BDOs, Block-level Officials	Operational usage & reporting
IT Staff	District/Block IT Personnel	Technical management & troubleshooting
Admin Users	Dashboard Managers, Data Officers	Advanced analytics & reporting

2. Training Modules

The training curriculum follows a modular structure:

Module 1 - Detailed Set up and operations of NITI TARA Device

Module 2 - Program Overview: State Support Mission (SSM), NITI For States Platform, ABP-ADP and the Viksit Bharat Strategy Room

Module 3 - NITI For States (NFS) Portal: Deep Dive

Module 4 - Viksit Bharat Strategy Room (VBSR)

Module 5 - Area Development Strategy (ADS) Tool - Features, How to use, Value Add

Module 6 - SMRITI (System for Meeting Recording, Information & Transcription Interface)

Module 7 - Use Cases of NITI TARA device

3. Capacity Building Model

The capacity-building model ensures scalability across 805 locations while maintaining quality and accountability.

Onsite Training Model

1. Instructor-Led Sessions

- Conducted by certified engineer or master trainer
- Structured presentation format
- Use of live dashboard

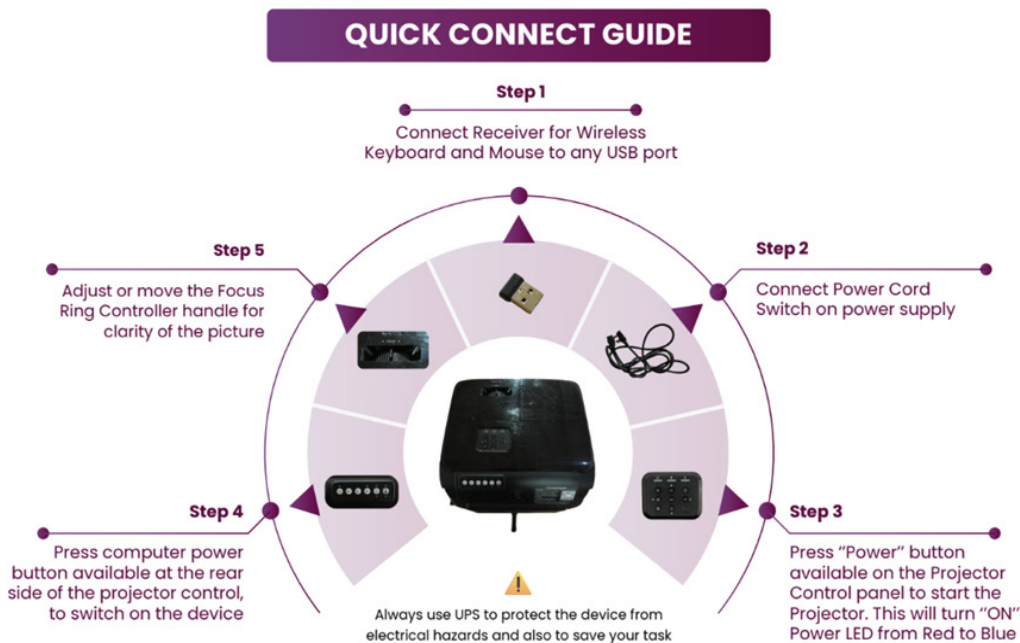

2. Hands-On Practice

- Participants operate device individually
- Report generation practice
- Calibration & troubleshooting practice

3. Live Demonstrations

- Mock review meeting simulation
- Data interpretation walkthrough
- Real-time analytics demonstration

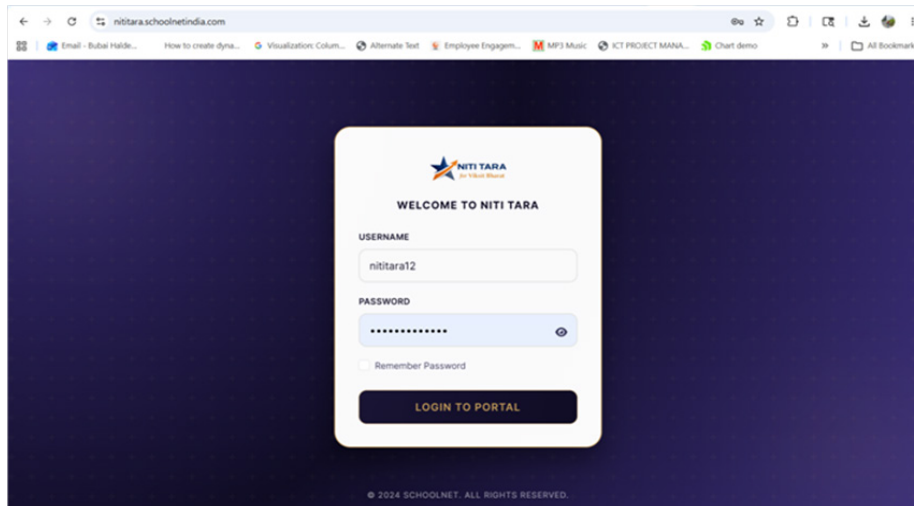

3.4 Quick Start Guide (2-Minute Setup)

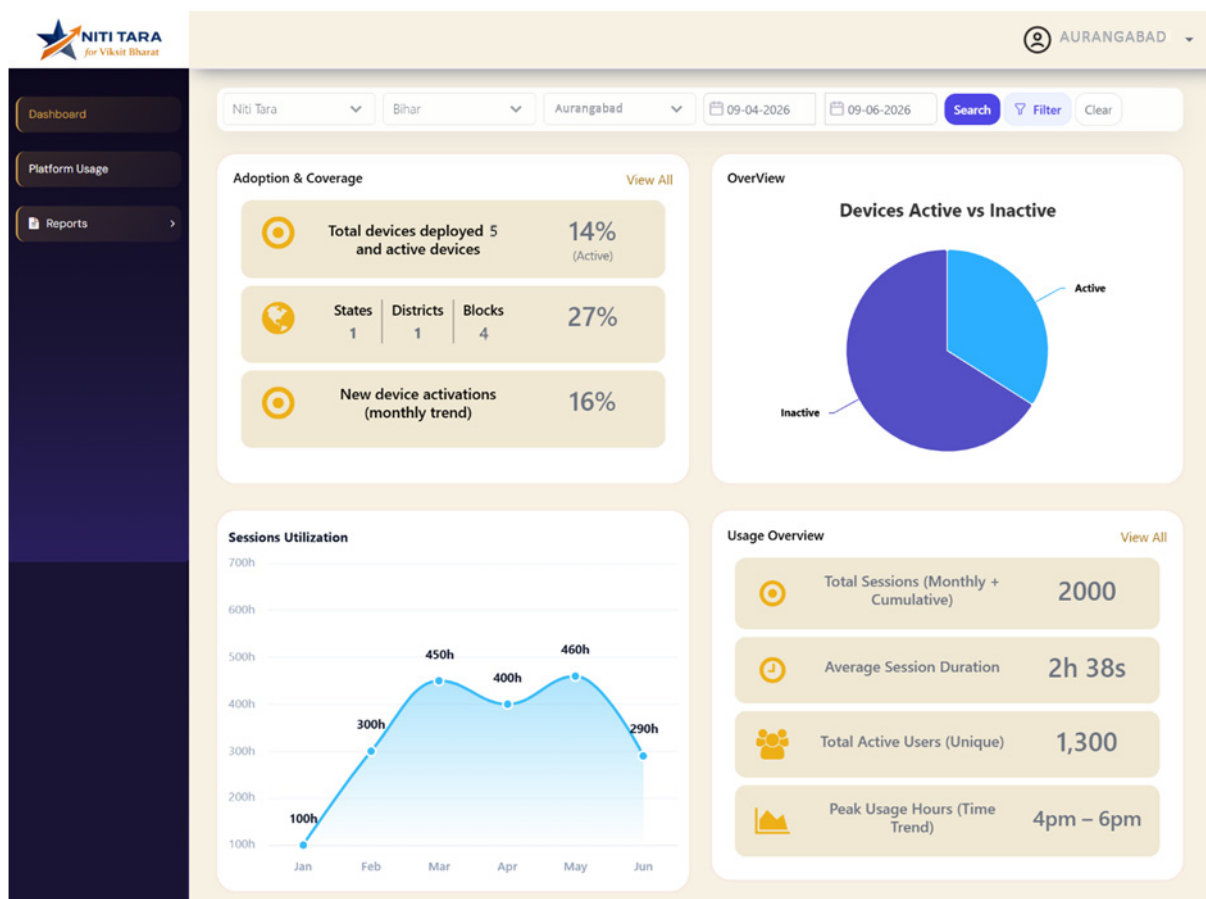

4. Usage Tracking & Monitoring

4.1 Usage Analytics Captured

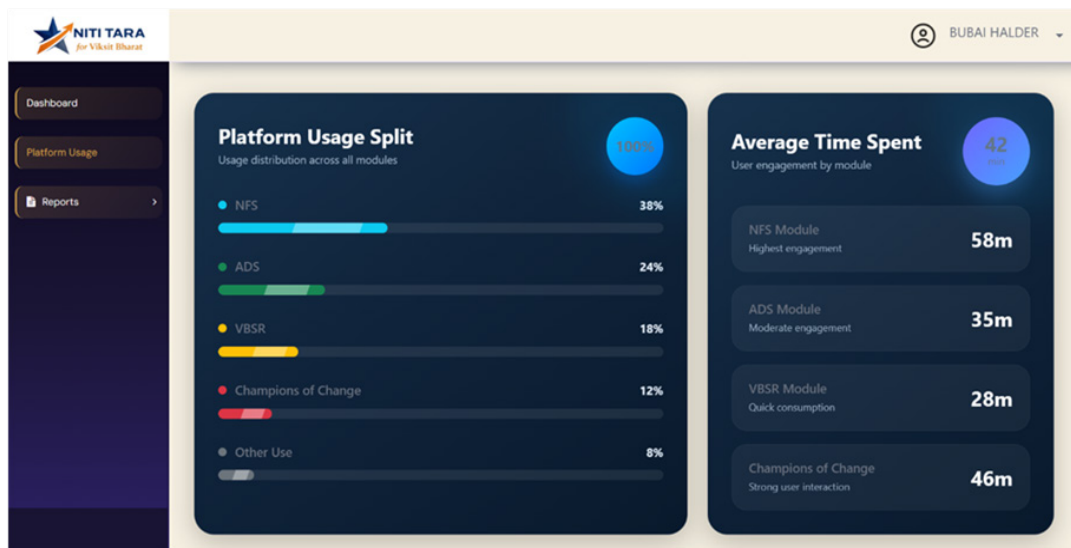

1. Visit the Dashboard URL: <https://nititara.schoolnetindia.com/> and login with credentials for your district.

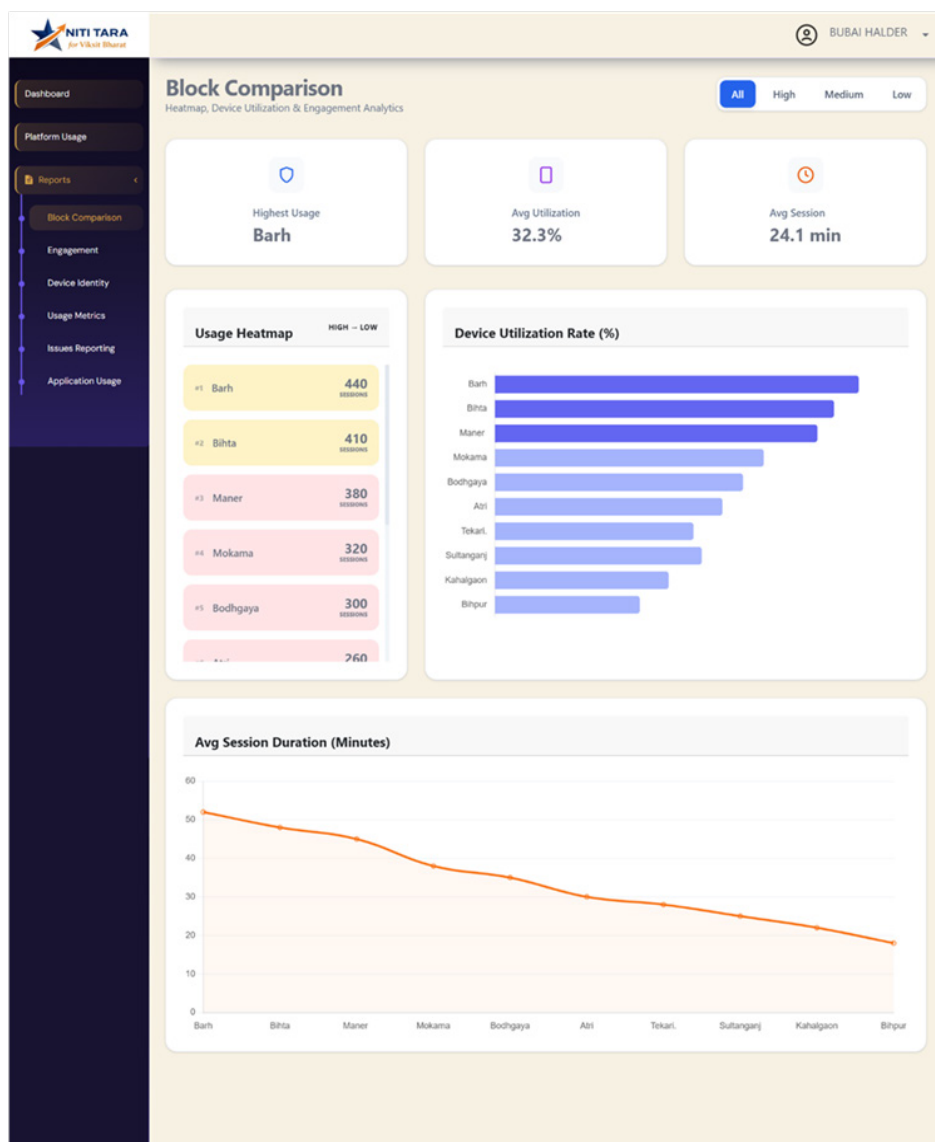

2. The dashboard represents the overall usage and the number of devices which are active and inactive within your district. In addition, the usage overview can be monitored with the session wise utilisation.

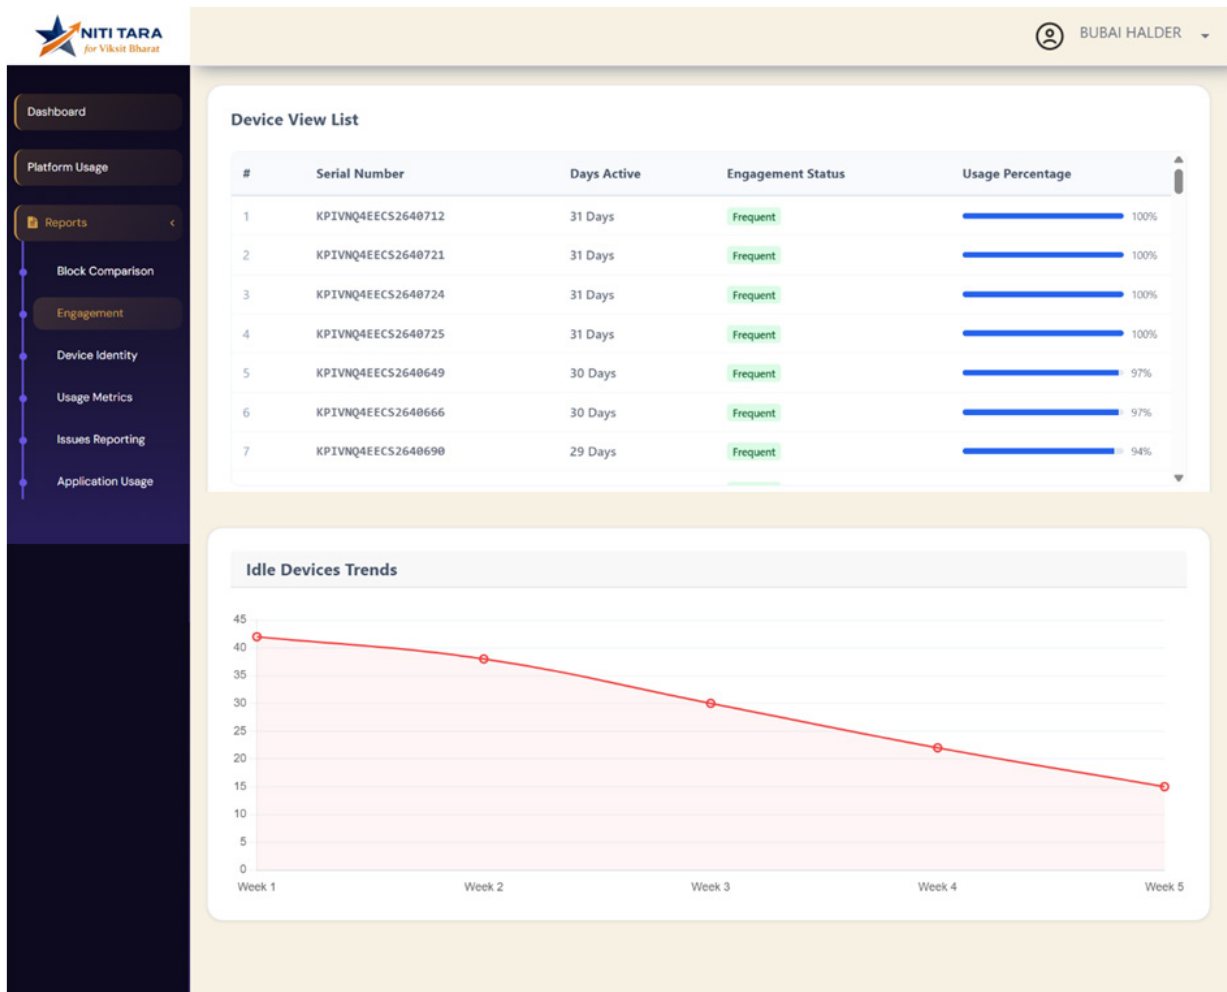

3. Platform Usage

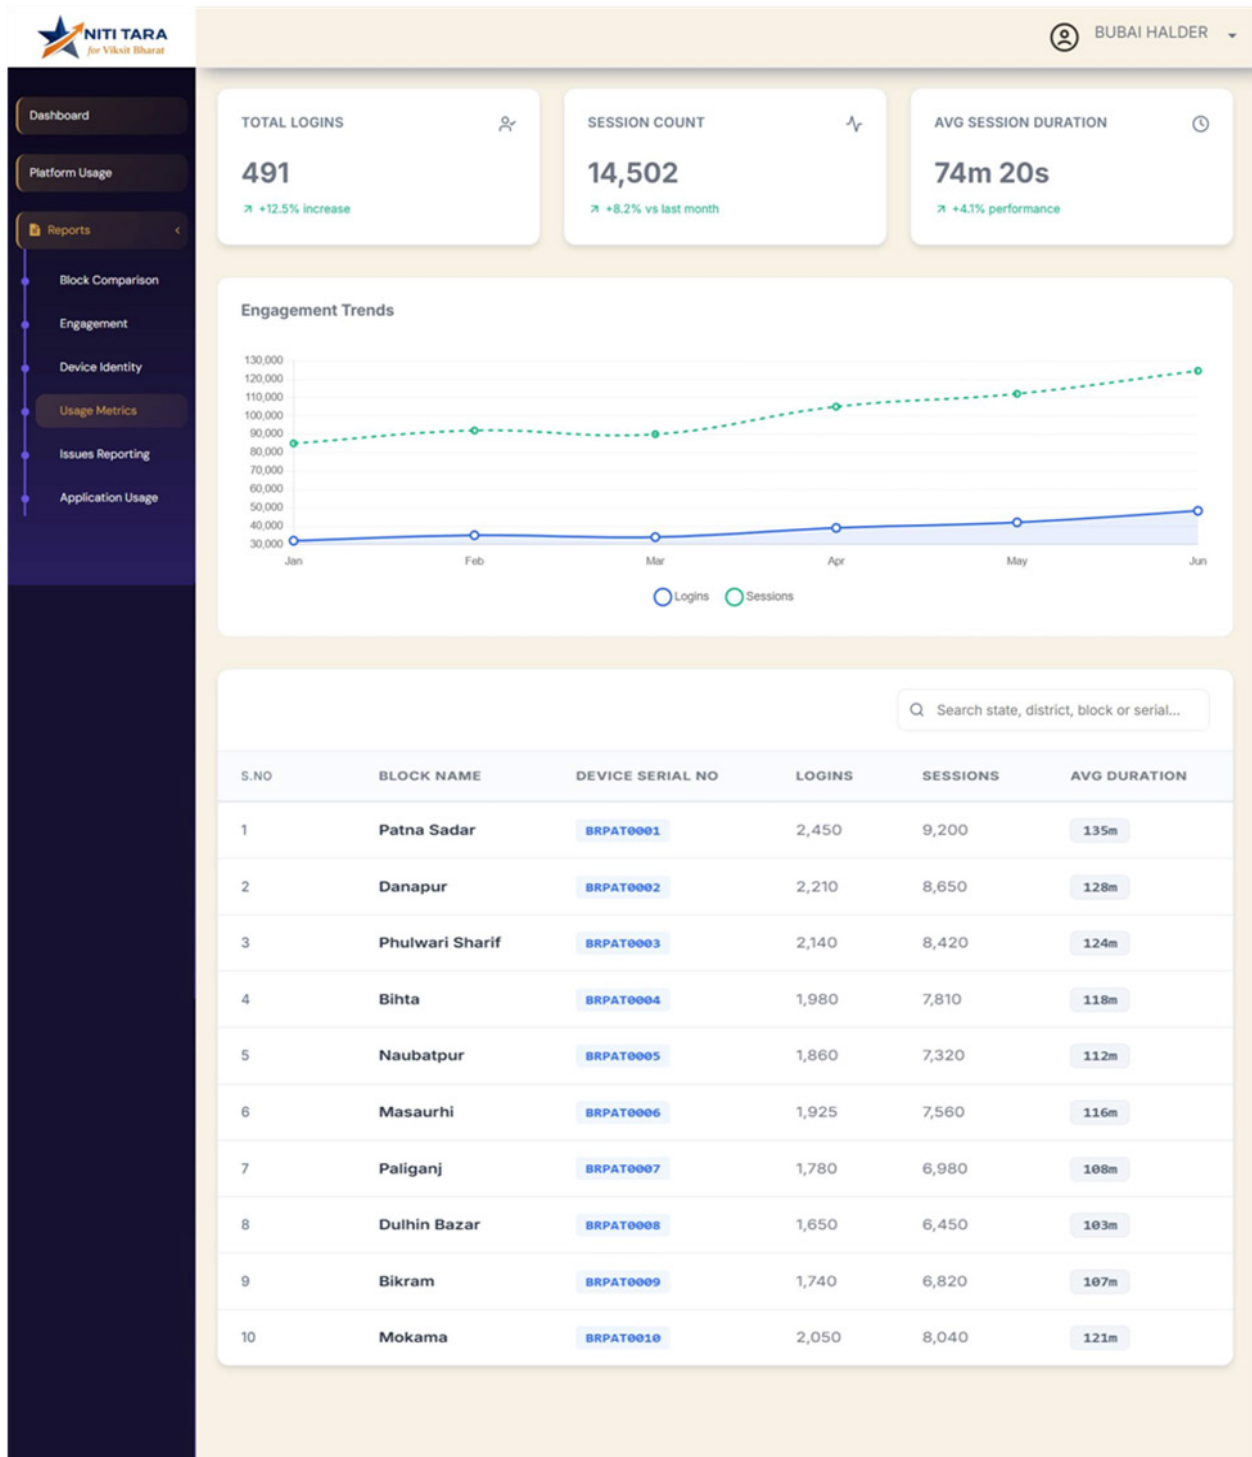

4. Block Comparison

5. Engagement

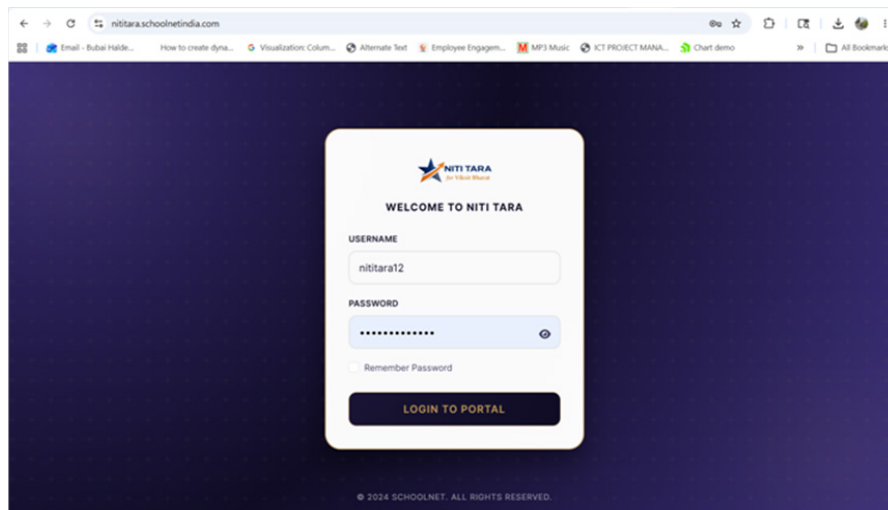

6. Usage Metrics

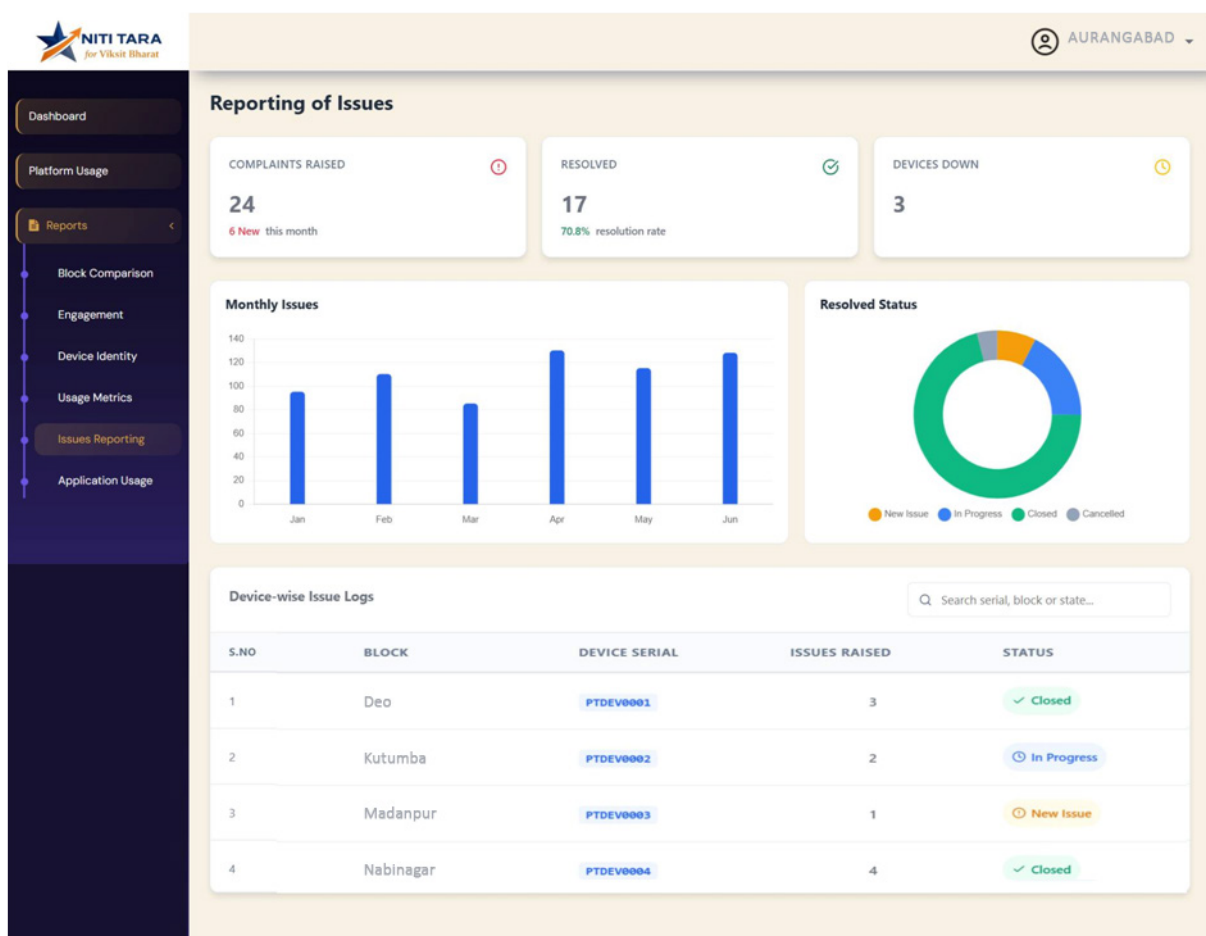

* These images are indicative and for reference only.

4.2 Issue Logs and Service Monitoring

1. Visit the Dashboard URL: <https://nititara.schoolnetindia.com/> and login using credentials for your district.

2. From the landing page, go to Issues Reporting under the Reports menu on the left-hand side. You can view the details of the logged hardware complaints.

4.3 Feedback Mechanism

The purpose is to establish a structured and user-friendly feedback mechanism for the NITI TARA platform and device. This mechanism enables the officials to provide instant feedback regarding:

- NITI TARA device functionality
- Platform usability and performance
- Service quality and support
- Technical issues and suggestions for improvement

The feedback system will support continuous improvement, timely issue resolution, and better user experience.

To give feedback user can click the feedback icon on the right top corner

On clicking on the above icon, the user will be redirected to a google form.

Process Flow

1. User clicks the Feedback button on the NITI TARA desktop.
2. The Google Feedback Form <https://forms.gle/KR2Cw9XhLp8AuWS98> opens automatically in the browser.
3. User fills in the required details and submits the feedback.
4. Submission is recorded centrally for monitoring and action.
5. Concerned support teams review and resolve issues based on priority.

Types of Feedback Captured

The feedback form includes the following categories:

Category	Description
Device Functionality	Hardware performance, startup issues, peripherals, etc.
Platform Experience	Navigation, usability, loading issues, accessibility (including websites)
Content & Features	Relevance and usefulness of platform modules
Technical Support	Support responsiveness and issue resolution
Connectivity Issues	Internet/network-related concerns
Suggestions	Recommendations for improvements
Training Support	Feedback related to orientation/training sessions

Implementation of this feedback mechanism will help ensure:

- Faster issue identification and resolution
- Improved platform usability
- Enhanced accountability of support teams
- Continuous improvement of NITI TARA services
- Better user engagement and satisfaction

5. Frequently Asked Questions (FAQs)

A. About NITI TARA & Its Purpose

1. What is NITI TARA and what are its key features and capabilities?

A portable, internet-enabled, all-in-one governance solution that brings data, planning tools, and collaborative review capabilities directly to districts and blocks. Device Capabilities:

- a. All-in-One Device: Combines a computer, projector, display, audio system & more in a single compact unit
- b. Built for Collaboration: Supports web conferencing with an in-built camera & microphones
- c. Turns any wall into a touch-enabled interactive screen: No separate meeting room needed
- d. Smart & Connected: Machine-to-Machine (M2M) tech for live data sync and automatic software updates; secure access via whitelisted websites
- e. Always Online: SIM-based connectivity, plus Wi-Fi and Bluetooth support
- f. Large-Format Projection: Projects up to 300-inch high-resolution visuals

2. What governance tools, dashboards and applications are available on NITI TARA?

- a. Dashboard to monitor Aspirational District Programme/ Aspirational Block Programme (ADP/ABP): Using quarterly updated KPIs, the dashboard enables monitoring of Aspirational Districts and Blocks as well as departmental performance
- b. Area Development Strategy: 1600+ PM Gati Shakti platform layers in Area Development Strategy tool powered by BISAG-N that can be leveraged
- c. NITI for States Knowledge Access: Access to the NITI for States portal including 7500+ best practices, 5000+ policy resources, 1300+ data profiles including State, District and block profiles
- d. Viksit Bharat Strategy Room (VBSR) Curated Sectoral Insights: Access to curated sectoral analysis (75+ focus areas) and 20+ use cases in the VBSR
- e. AI Enabled Meeting Minutes: AI enabled multi-lingual minute taking software for meeting documentation powered through Bhashini, MEITY

B. Deployment, Installation & Site Readiness

1. What are the requirements for installation of NITI TARA?

The requirements for the installation of NITI TARA includes

- Dedicated District Review Room/Conference Hall with 300–350 sq. ft. area, smooth white projection wall, and 3–5 feet projection distance.
- Dedicated 6A power socket with proper earthing, 1 KVA UPS backup, ventilation, and protection from power fluctuations.
- Installation includes NITI TARA device, accessories kit, strolley bag, and tripod stand.

- Device to be installed on tripod stand with proper alignment, focus, keystone correction, and cable management.
- Engineers perform hardware testing, software configuration, network setup, application validation, and peripheral setup.
- Device supports Wi-Fi, Bluetooth, LAN, HDMI, USB, and Audio I/O connectivity.
- Mandatory documentation includes pre-installation survey, geo-tagged photos, serial number verification, and Installation & Commissioning Report (ICR) signoff.
- Installation completion requires physical setup, software configuration, functional testing, user training, checklist validation, and officer signoff.

2. What should the District/Block Nodal Officer verify at the time of device delivery and installation?

At the time of delivery and installation a district/block/nodal officer must verify the following

- Verify consignee details, number of boxes, serial numbers, and inspect shipment for physical/transit damage during delivery.
- Check box condition, seal integrity, accessories, and sign the Delivery Acceptance Form with date, time, and official seal.
- During installation, verify availability of all hardware and accessories including device, tripod, strolley bag, peripherals, and manuals.
- Ensure proper device setup, stable placement, projection clarity, and alignment.
- Witness functional testing of system, projection, audio, interactivity, peripherals, network configuration, and NITI Aayog applications.
- Confirm completion of user orientation, hands-on training, and basic troubleshooting guidance.

3. What hardware components, accessories and documentation are provided along with the device?

- NITI TARA integrated device with built-in computing, projection, audio, camera, microphone, and interactive functionality.
- Accessories include power cable, wireless keyboard & mouse, stylus with charging cable, dust cover, and projector remote.
- Additional items provided are a strolley bag for safe mobility and a tripod stand for installation setup.
- Documentation/collaterals include User Manual, QR code sticker, and Serial Number sticker pasted on the device.

4. How is the device registered, geo-tagged and mapped in the central dashboard after installation?

After installation, device details including serial number, BIOS serial, MAC address, location, installation status, and nodal officer details are registered in the central dashboard/ERP system for lifecycle tracking.

Geo-tagging is performed through a mobile application by capturing latitude/longitude coordinates and uploading geo-tagged installation photographs.

Each device is mapped to State, District, and Block hierarchy for centralized monitoring, analytics, and governance reporting.

Devices are also linked with assigned Regional Engineers and Zonal Technical Leads for Service Level Agreement (SLA)-based support and escalation management.

The dashboard provides unit-level visibility, geo-location tracking, uptime monitoring, usage analytics, issue logs, and preventive maintenance records.

C. Training & Capacity Building

1. Who will be trained on NITI TARA and what topics are covered during the training sessions?

The NITI TARA training will be conducted for District Collectors, District Level officers, Block development officers, officers mapped to ADP/ABP themes and designated nodal officers nominated by the District/ Block officer and as designated by DM who will be responsible for implementation and usage. The sessions will cover Introduction and detailed usage of NITI TARA, platform overview, user login and access, dashboard navigation, data review and monitoring features, planning and reporting tools, collaboration and information-sharing features and best practices for effective adoption of the platform. In case a trained nodal officer or custodian officer is transferred, the department should nominate a replacement officer at the earliest and communicate the details to the implementation team. Refresher or onboarding training can then be arranged during the quarterly visit to ensure continuity and uninterrupted usage of the NITI TARA platform.

2. Does the training include hands-on practice, live demonstrations and troubleshooting support?

Yes, the training is designed to be interactive and practical. It includes live demonstrations of platform features, guided hands-on practice sessions for participants, and dedicated troubleshooting support to address technical or user-related challenges during and after the training.

3. What should be done if a trained nodal officer or custodian officer is transferred?

In case a trained nodal officer or custodian officer is transferred, the department should nominate a replacement officer at the earliest and communicate the details to the implementation team. Refresher or onboarding training can then be arranged during the quarterly visit to ensure continuity and uninterrupted usage of the NITI TARA platform.

D. Usage, Custodianship & Safeguards

1. Who will act as the custodian of the NITI TARA device and what are their responsibilities?

The Nodal Officer nominated by the DM/DC will be designated as the official custodian of the device. The custodian (Nodal Officer) will be responsible for logging usage, upkeep, reporting technical issues and coordinating training needs.

2. For what purposes can the NITI TARA device be used, and what types of usage are prohibited?

The device shall be used primarily for training, visualisation, planning discussions and experience-sharing workshops under the Aspirational Districts/ Blocks Programme and related government initiatives.

It may be taken to meeting rooms, field demonstration sites or community interaction venues within the district/block as needed, provided proper care and logging is ensured. The device is not to be used for non-government, private, or commercial purposes under any circumstances.

3. Can the device be moved outside the block/district premises? What approvals and records are required?

Movement outside the district/block premises should be permitted only with written approval of the DM, and with proper entry in a movement logbook. Misuse, unauthorised use, or unreported movement outside block/district boundaries will be treated as a violation of protocol and may result in withdrawal of device support.

4. How should the device be stored, secured and maintained when not in use?

When not in use, the device must be stored in a designated secure cabinet or locked storage area within the office of Nodal officer/BDO office/District Headquarters. The device should be placed in its protective carry case and powered down properly as per SOP before storing.

SOP for Shutdown:

To shut down the computer:

- a. Close down all the applications currently open.
- b. Click the Power button available on the home screen
- c. From the available options click the shut down button.

To shut down the projector

- a. Press “Power” button from the projector control panel available on top of the NITI TARA.
- b. Confirmation dialog safety box will appear. Press “Power” button once again to turn off the projector. Just after the shut down, POWER LED will start blinking. Wait till it becomes red.

(It is recommended that the projector lens should be covered with the lens cap when device is not in use. The lens cap protects the lens from dust and scratches.)

E. Support, Maintenance & Insurance

1. How can officials report technical issues, damage or device malfunction and access customer support services?

Officials can report technical issues, damage, or device malfunction through the dedicated NITI TARA Helpdesk using multiple support channels:

- Toll-Free Support: 18001808800

- WhatsApp Support: 7428694964
- Email Support: kyan.support@schoolnetindia.com

While reporting an issue, officials should provide the device serial number, contact details, issue description, and troubleshooting steps already attempted.

The support system follows a structured escalation mechanism from helpdesk support to engineers, zonal leads, and senior technical management for timely issue resolution.

Support workflow includes:

- a) Complaint registration via call, email, or WhatsApp
- b) Remote troubleshooting by helpdesk
- c) Ticket generation and escalation if unresolved
- d) Onsite engineer visit with required spare parts
- e) Issue resolution, user signoff, and closure confirmation

2. What support mechanisms are available, including Helpdesk support and onsite service visits?

The NITI TARA project includes a comprehensive post-installation support framework to ensure continuous technical assistance and issue resolution throughout the device lifecycle.

Support mechanisms include:

- a) Centralized Helpdesk support via Toll-Free, WhatsApp/Chat, and Email
- b) Remote troubleshooting for diagnostics, network support, application guidance, and ticket tracking
- c) Onsite engineer visits for issues unresolved remotely, including scheduled visits and spare part support
- d) Regional and zonal support structure with Central PMU, Zonal Leads, and Regional Engineers
- e) Preventive maintenance and lifecycle support for 5 years
- f) Dashboard-based monitoring for uptime, issue tracking, maintenance, updates, and training logs
- g) Training and operational support, including refresher assistance and user guidance

3. What types of damage or incidents are covered under warranty/insurance/AMC support, and what is not covered?

Warranty/AMC support covers manufacturing defects, hardware/component failure, software issues, device malfunction under normal usage, preventive maintenance, and replacement of defective parts as per support terms.

It does not cover physical damage due to mishandling or negligence, any intentional damage or unauthorized modifications, damage caused by misuse or non-compliance

with operating guidelines .

4. What is the process for reporting theft, loss or major damage, and how can insurance or replacement claims be initiated?

In case of theft, loss, or major damage, the incident must be immediately reported to the centralized NITI TARA Helpdesk via toll-free support, WhatsApp/chat, or email which will be escalated by the support team for insurance/replacement claim processing.

To process the insurance/replacement claim, the following documents must be submitted with carbon copy to nfs-niti@gov.in.

- Police FIR
- Statement/Incident Letter
- Original Delivery Challan and proof of delivery
- Installation report
- Photographs of the damage/loss

The support team verifies the incident, conducts technical/insurance assessment, and processes the claim as per policy terms. Upon approval, replacement/support actions are initiated and updated to the respective stakeholder.
